

Breast Health Services for our Servicewomen

Together with the VA, Siemens Healthineers would like to leverage our innovative approach to mammography to help deliver and expand access to superior breast care. Siemens Healthineers stands ready to provide the following technologies and services to help the VA meet the new requirements of the ***Making Advances in Mammography and Medical Options for Veterans Act of 2022 (MAMMO Act)***.

Providing Better Access to Care with Wide-Angle 3D Mammography on MAMMOMAT Revelation

Our technology can deliver tomorrow's technology today by helping the VA bring life-saving screening technology to more Veterans. Further, MAMMOMAT Revelation is ATO certified, meaning we meet or exceed stringent DoD security requirements, which in turn means we should meet applicable VA Enterprise Risk Analysis (ERA) requirements.

Designed for Superior Cancer Detection

MAMMOMAT Revelation is a unique 3D mammography system (digital breast) designed to help find breast cancer earlier¹. This means fewer callbacks and a more definitive diagnosis in less time. This can help the VA provide advanced breast health care to more Veterans in more environments.

Designed for Her

Pain and discomfort are the top reasons why women skip their mammograms. MAMMOMAT Revelation changes that. It was designed for women, by women with unique personalized soft compression technology that adjusts to the anatomy of each woman's breast. Less pressure. More comfort. Greater adherence.

Designed to Fit in any Environment

MAMMOMAT Revelation's ergonomic and workflow features make technologists' lives easier with 6-minute full 3D exams and seamless automation. This, coupled with uptime performance, will help facilities meet growing demands. Count on our expansive network of skilled technicians and service plans that deliver predictable performance and lifecycle costs. Siemens Healthineers responds with cybersecurity features built to protect the VA. Thanks to the Secure Development Cycle, MAMMOMAT Revelation is built for today's operational requirements. Our systems are delivered on the latest operating systems.

How can Siemens Healthineers help the VA with the MAMMO Act beyond technology

Enhanced Access to Breast Health

The VA and Siemens Healthineers have a common goal – more screening for more women to reduce disparities. Allow us to help you in this cause with our expertise in:

- Mobile mammography and mobile screening – we offer turnkey solutions to enable telescreening
- Market research as to where mammography can make the most sense geographically
- Population health solutions to identify and engage patients in their communities to increase screening attendance
- AI solutions to manage workloads, get results faster, and assess risk
- Tools to help referring physicians document breast lesions during clinical breast exams (iBreastExam™)
- Consultation in starting your mammography services
- Training for readers, users, and biomedical staff, as well as seamless IT integration support

Upgrade to 3D – DBT

- Upgrading 2D technologies to Siemens Healthineers 3D Tomosynthesis could prove to be less expensive and more effective than systems currently deployed by the VA
- Siemens Healthineers can provide a 3D training course for VA radiologists to read new 3D systems

Expansion of Availability of Enhanced Testing Services

- Siemens Healthineers equipment can provide Breast Density information at the time of screening, which is required in most states
- AI solutions can also provide risk information to enable quicker diagnoses and more personalized screening
- For women with dense breasts, we can offer supplemental testing (e.g. ultrasound) right away – which is key for remote areas

Mammography Availability for Paralyzed and Disabled Veterans

- Our mammography units' table can be positioned lower than most systems; the space below the detector and table is very thin – an optimal design for wheelchair patients
- Our 3D exams do not require a breath hold – something that can be difficult for all patients, but also those with disabilities
- MAMMOMAT Revelation offers a calming atmosphere – with unique ambient lighting concepts
- We can equip trucks or vans to be fitted to conform with ADA
