

# The power of versatility.

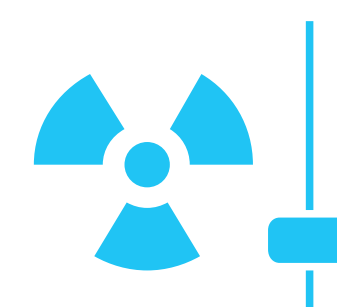

## AN INDUSTRY LEADING STATE-OF-THE-ART IMAGE-GUIDED THERAPY SYSTEM HAS ARRIVED AT

Our new angiography system offers excellent image quality with dose reduction technology for patients and staff.

For more information, please contact:

### WE PUT PATIENT SAFETY FIRST

With structure-sensitive algorithms that permit an even greater reduction of radiation dose while maintaining optimal image quality.

### FASTER SCAN TIMES AND INCREASED PATIENT COMFORT

Extremely fast scans allow for less contrast agent and higher image quality.

### MORE FLEXIBILITY THROUGH EXPANDED PATIENT ACCESS

The system allows optimal patients access across patient types – from pediatric to bariatric.

**A cutting-edge robotic imaging system to improve clinical outcomes for your interventional procedures.**
