CONFORMANCE STATEMENT OVERVIEW

The **syngo® SC2000™ Workplace** supports the following DICOM Application Entities:

- Verification
 - o Verification AE
- Transfer
 - o Storage AE
 - o Storage Commitment AE
- Query / Retrieve
 - o Query AE
 - o Retrieve AE

Table 1. NETWORK SERVICES

| SOP Classes | Service Class User (SCU) | Service Class Provider (SCP) |
|----------------------------------------------------|-----------------------------|---------------------------------|
| VERIFICATION | | |
| Verification AE | | |
| Verification | Yes | Yes |
| TRANSFER | | |
| Storage AE | | |
| Ultrasound Image Storage | Yes | Yes |
| Ultrasound Multi-frame Image Storage | Yes | Yes |
| Secondary Capture Image Storage | Yes | Yes |
| Comprehensive SR | Yes | Yes |
| Raw Data Storage | Yes | Yes |
| Storage Commitment AE | | |
| Storage Commitment Push Model | Yes | No |
| QUERY / RETRIEVE | | |
| Query AE | | |
| Study Root Query/Retrieve Information Model – FIND | Yes | No |
| Retrieve AE | | |
| Study Root Query/Retrieve Information Model – MOVE | Yes | No |

Table 2. UID VALUES

| SOP Class Name | SOP Class UID | Category |
|----------------------------------------------------|-------------------------------|------------------|
| Verification AE | | |
| Verification | 1.2.840.10008.1.1 | Verification |
| Storage AE | | |
| Ultrasound Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 | Transfer |
| Ultrasound Multi-frame Image Storage | 1.2.840.10008.5.1.4.1.1.3.1 | Transfer |
| Secondary Capture Image Storage | 1.2.840.10008.5.1.4.1.1.7 | Transfer |
| Comprehensive SR | 1.2.840.10008.5.1.4.1.1.88.33 | Transfer |
| Raw Data Storage | 1.2.840.10008.5.1.4.1.1.66 | Transfer |
| Storage Commitment AE | | |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Transfer |
| <hr/> | | |
| Query AE | | |
| Study Root Query/Retrieve Information Model – FIND | 1.2.840.10008.5.1.4.1.2.2.1 | Query / Retrieve |
| Retrieve AE | | |
| Study Root Query/Retrieve Information Model – MOVE | 1.2.840.10008.5.1.4.1.2.2.2 | Query / Retrieve |

Table 3. MEDIA SERVICES

| Media Storage Application Profile | Write Files (FSC or FSU) | Read Files (FSR) |
|-----------------------------------|--------------------------|------------------|
| DVD—Recordable | | |
| STD-US-ID-SF-DVD | Yes | Yes |
| STD-US-ID-MF-DVD | Yes | |
| Compact Disk—Recordable | | |
| STD-US-ID-SF-CDR | Yes | Yes |
| STD-US-ID-MF-CDR | Yes | |

1 INTRODUCTION

This document describes the conformance to the ACR-NEMA DICOM 3.0 Standard by the *syngo® SC2000™ Workplace*, versions VA16D and VA16E from Siemens Healthcare. It shall establish the conformance specifications for this system only, and does not apply to other products offered by Siemens Healthcare or its affiliates.

The *syngo SC2000 Workplace* is a device used to review SC2000-generated ultrasound studies. These studies can be sent using DICOM standard protocols and definitions to other DICOM compliant devices that support SOP classes as defined in Table 2-1: SOP Classes for Storage AE in this document.

The DICOM standard provides a well-defined set of structures and protocols that allow inter-operability of a wide variety of medical imaging devices. The *syngo SC2000 Workplace* provides support for essential services related to ultrasound scanning and connectivity to DICOM compliant devices. *Syngo SC2000 Workplaces* will not support all features supported by the DICOM standard. This document clearly states the DICOM services and data classes that are supported by the applications included with the *syngo SC2000 Workplace*. The intent of this document is to allow users and other vendors who also conform to the DICOM standard to exchange information within the specific context of those elements of the DICOM standard that the *syngo SC2000 Workplace* supports.

This document is written with respect to the adopted portions of the DICOM standard, Version 3. The following sections of this document follow the outline specified in the DICOM Standard NEMA publication PS3.2.¹

1.1 Audience

This document is written for the people that need to understand how the *syngo SC2000 Workplace* will integrate into their healthcare facility. This includes both those responsible for overall imaging network policy and architecture, as well as integrators who need to have a detailed understanding of the DICOM features of the product. This document contains some basic DICOM definitions so that any reader may understand how this product implements DICOM features. However, integrators are expected to fully understand all the DICOM terminology, how the tables in this document relate to the product's functionality, and how that functionality integrates with other devices that support compatible DICOM features.

1.2 Remarks

The scope of this DICOM Conformance Statement is to facilitate integration between the *syngo SC2000 Workplace* and other DICOM products. The Conformance Statement should be read and understood in conjunction with the DICOM Standard.

DICOM, by itself, does not guarantee interoperability. However, the Conformance Statement facilitates a first-level validation for interoperability between different applications supporting the same DICOM functionality as SCU and SCP, respectively.

This Conformance Statement is not intended to replace validation with other DICOM equipment to ensure proper exchange of information intended.

The scope of this Conformance Statement is to facilitate communication with Siemens and other vendors' Medical equipment. The Conformance Statement should be read and understood in conjunction with the DICOM 3.0 Standard [1]. However, by itself it is not guaranteed to ensure the desired interoperability and a successful interconnectivity.

¹ Source: DICOM® Standards Publication Part 2, © NEMA. The DICOM Standard is under continuous maintenance. The current official version is available at <http://dicom.nema.org>.

The user should be aware of the following important issues:

- The comparison of different conformance statements is the first step towards assessing interconnectivity.
- Test procedures should be defined and tests should be performed by the user to validate the connectivity desired. DICOM itself and the conformance parts do not specify this.
- The standard will evolve to meet the users' future requirements. Siemens is actively involved in developing the standard further and therefore reserves the right to make changes to its products or to discontinue its delivery.

Siemens reserves the right to modify the design and specifications contained herein without prior notice. Please contact your local Siemens representative for the most recent product information.

1.3 Terms and Definitions

Informal definitions are provided for the following terms used in this Conformance Statement. The DICOM Standard is the authoritative source for formal definition of these terms.

Abstract Syntax – The information agreed to be exchanged between applications, generally equivalent to a Service/Object Pair (SOP) Class. Examples: Verification SOP Class, Modality Worklist Information Model Find SOP Class, Computed Radiography Image Storage SOP Class.

ACUSON SC2000™ system – The volume imaging ultrasound system used with the syngo SC2000 Workplace; also referred to as the SC2000.

Application Entity (AE) – An end point of a DICOM information exchange, including the DICOM network or media interface software; i.e., the software that sends or receives DICOM information objects or messages. A single device may have multiple Application Entities.

Application Entity Title – The externally known name of an *Application Entity*, used to identify a DICOM application to other DICOM applications on the network.

Application Context – The specification of the type of communication used between *Application Entities*. Example: DICOM network protocol.

Association – A network communication channel set up between *Application Entities*.

Attribute – A unit of information in an object definition; a data element identified by a *tag*. The information may be a complex data structure (Sequence), itself composed of lower level data elements. Examples: Patient ID (0010,0020), Accession Number (0008,0050), Photometric Interpretation (0028,0004), Procedure Code Sequence (0008,1032).

Attribute Macro - A set of Attributes that are described in a single table that is referenced by multiple Module or other tables.

Information Object Definition (IOD) – A data abstraction of a class of similar Real-World Objects which defines the nature and attributes relevant to the class of Real-World objects represented. Examples: MR Image IOD, CT Image IOD, Print Job IOD.

Integrating the Healthcare Enterprise (IHE) – An initiative sponsored by the Radiological Society of North America (RSNA) to document and demonstrate standards-based methods of sharing information in support of optimal patient care. For additional information, see www.rsna.org/ihe.

Functional Group - A set of logically related Attributes that are likely to vary together. May be used in Multi-frame IODs to describe parameters which change on a per frame basis.

Joint Photographic Experts Group (JPEG) – Joint Photographic Experts Group, The group was organized in 1986, issuing a standard in 1992, which was approved in 1994 as ISO 10918-1. The JPEG standard is used by DICOM applications.

Media Application Profile – The specification of DICOM information objects and encoding exchanged on removable media (e.g., CDs), see DICOM PS3.11.

Module – A set of *Attributes* within an *Information Object Definition* that are logically related to each other. Example: Patient Module includes (among others) Patient Name, Patient ID, Patient Birth Date, and Patient Sex.

Negotiation – First phase of *Association* establishment that allows *Application Entities* to agree on the types of data to be exchanged and how that data will be encoded.

Picture Archiving and Communications Systems (PACS) – A DICOM server that accepts medical images from another DICOM system and stores the images for later retrieval.

Presentation Context – The set of DICOM network services used over an *Association*, as negotiated between *Application Entities*; includes *Abstract Syntaxes* and *Transfer Syntaxes*.

Protocol Data Unit (PDU) – A packet (piece) of a DICOM message sent across the network. It contains protocol control information and user data. Devices must specify the maximum size packet they can receive for DICOM messages.

Request (RQ) – A request from one DICOM AE for service from another DICOM AE.

Response (RSP) – A response from one DICOM AE to the request for service from another DICOM AE.

Security Profile – A set of mechanisms, such as encryption, user authentication, or digital signatures, used by an *Application Entity* to ensure confidentiality, integrity, and/or availability of exchanged DICOM data.

Service Class Provider (SCP) – The role of an *Application Entity* that provides a DICOM network service; typically, a server that performs operations requested by another *Application Entity* (*Service Class User*). Examples: Picture Archiving and Communication System (image storage SCP, and image query/retrieve SCP), Radiology Information System (modality worklist SCP).

Service Class User (SCU) – The role of an *Application Entity* that uses a DICOM network service; typically, a client. Examples: imaging modality (image storage SCU, and modality worklist SCU), imaging workstation (image query/retrieve SCU).

Service/Object Pair (SOP) Class – The specification of the network or media transfer (service) of a particular type of data (object); the fundamental unit of DICOM interoperability specification. Examples: Ultrasound Image Storage Service, Basic Grayscale Print Management.

Service/Object Pair (SOP) Instance – An information object; a specific occurrence of information exchanged in a *SOP Class*. Examples: a specific x-ray image.

Structured Report (SR) – A DICOM object which contains measurement, calculations, diagnoses, image references, and other non-image information concerning a patient exam.

syngo® SC2000™ Workplace – The workplace of this conformance statement that is used with the ACUSON SC2000 volume imaging ultrasound system; also referred to as the SC2000 Workplace.

Tag – A 32-bit identifier for a data element, represented as a pair of four digit hexadecimal numbers, the “group” and the “element”. If the “group” number is odd, the tag is for a private (manufacturer-specific) data element. Examples: (0010,0020) [Patient ID], (07FE,0010) [Pixel Data], (0019,0210) [private data element].

Transfer Syntax – The encoding used for exchange of DICOM information objects and messages. Examples: *JPEG compressed (images)*, little endian explicit value representation.

Unique Identifier (UID) – A globally unique “dotted decimal” string that identifies a specific object or a class of objects; an ISO-8824 Object Identifier. Examples: Study Instance UID, SOP Class UID, SOP Instance UID.

Value Representation (VR) – The format type of an individual DICOM data element, such as text, an integer, a person’s name, or a code. DICOM information objects can be transmitted with either explicit identification of the type of each data element (Explicit VR), or without explicit identification (Implicit VR); with Implicit VR, the receiving application must use a DICOM data dictionary to look up the format of each data element.

1.4 Basics of DICOM Communication

This section describes terminology used in this Conformance Statement for the non-specialist. The key terms used in the Conformance Statement are highlighted in *italics* below. This section is not a substitute for training about DICOM, and it makes many simplifications about the meanings of DICOM terms.

Two *Application Entities* (devices) that want to communicate with each other over a network using DICOM protocol must first agree on several things during an initial network “handshake”. One of the two devices must initiate an *Association* (a connection to the other device), and ask if specific services, information, and encoding can be supported by the other device (*Negotiation*).

DICOM specifies a number of network services and types of information objects, each of which is called an *Abstract Syntax* for the Negotiation. DICOM also specifies a variety of methods for encoding data, denoted *Transfer Syntaxes*. The Negotiation allows the initiating Application Entity to propose combinations of Abstract Syntax and Transfer Syntax to be used on the Association; these combinations are called *Presentation Contexts*. The receiving Application Entity accepts the Presentation Contexts it supports.

For each Presentation Context, the Association Negotiation also allows the devices to agree on *Roles* – which one is the *Service Class User* (SCU - client) and which is the *Service Class Provider* (SCP - server). Normally the device initiating the connection is the SCU, i.e., the client system calls the server, but not always.

The Association Negotiation finally enables exchange of maximum network packet (*PDU*) size, security information, and network service options (called *Extended Negotiation* information).

The Application Entities, having negotiated the Association parameters, may now commence exchanging data. Common data exchanges include queries for worklists and lists of stored images, transfer of image objects and analyses (structured reports), and sending images to film printers. Each exchangeable unit of data is formatted by the sender in accordance with the appropriate *Information Object Definition*, and sent using the negotiated Transfer Syntax. There is a Default Transfer Syntax that all systems must accept, but it may not be the most efficient for some use cases. Each transfer is explicitly acknowledged by the receiver with a *Response Status* indicating success, failure, or that query or retrieve operations are still in process.

Two Application Entities may also communicate with each other by exchanging media (such as a CD-R). Since there is no Association Negotiation possible, they both use a *Media Application Profile* that specifies “pre-negotiated” exchange media format, Abstract Syntax, and Transfer Syntax.

2 NETWORKING

This section contains the syngo SC2000 Workplace networking related services.

2.1 Implementation Model

SC2000 Workplace users can review SC2000 system studies directly from the system hard drive. Studies can also be transferred to DICOM workstations and archive servers on a network. Storage Commitment can be used to insure that patient images and data is safely committed. Measurements from Cardiac exams can be exported as DICOM SR Objects. Measurements from Cardiac exams can be exported as DICOM SR Objects.

SC2000 Workplace Real World Activities are indicated by “Real World Activity” names while “SC2000 Workplace AE” indicates the invoked Application Entity. Similarly, the activities associated with service providers are indicated as “Real World Service Activity.”

2.1.1 Application Data Flow

Figure 2-1 and Figure 2-2 provide a functional overview of the SC2000 Workplace’s Application Entities (AE). Relationships are shown between user-invoked activities (in the circles at the left of the AEs) and the associated real-world activities provided by DICOM service providers (in the circles at the right of the AEs).

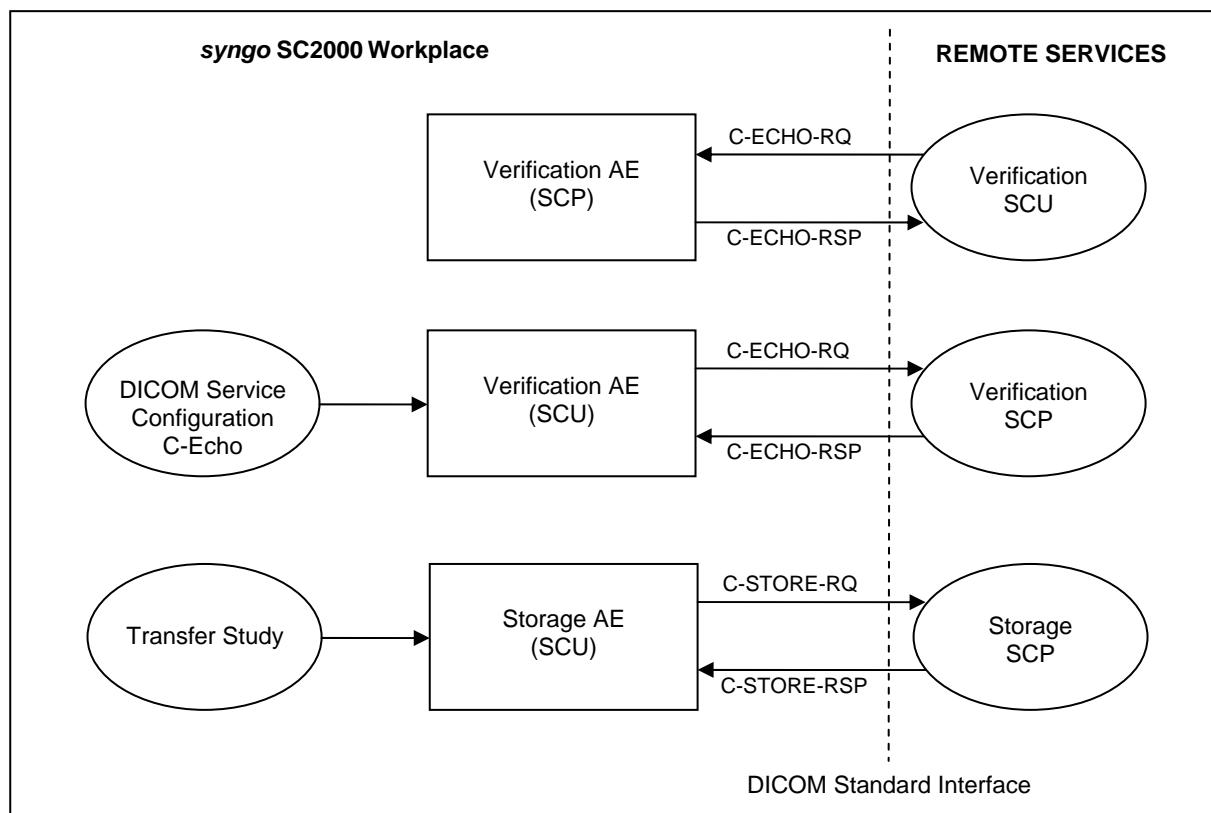

Figure 2-1. Functional Overview

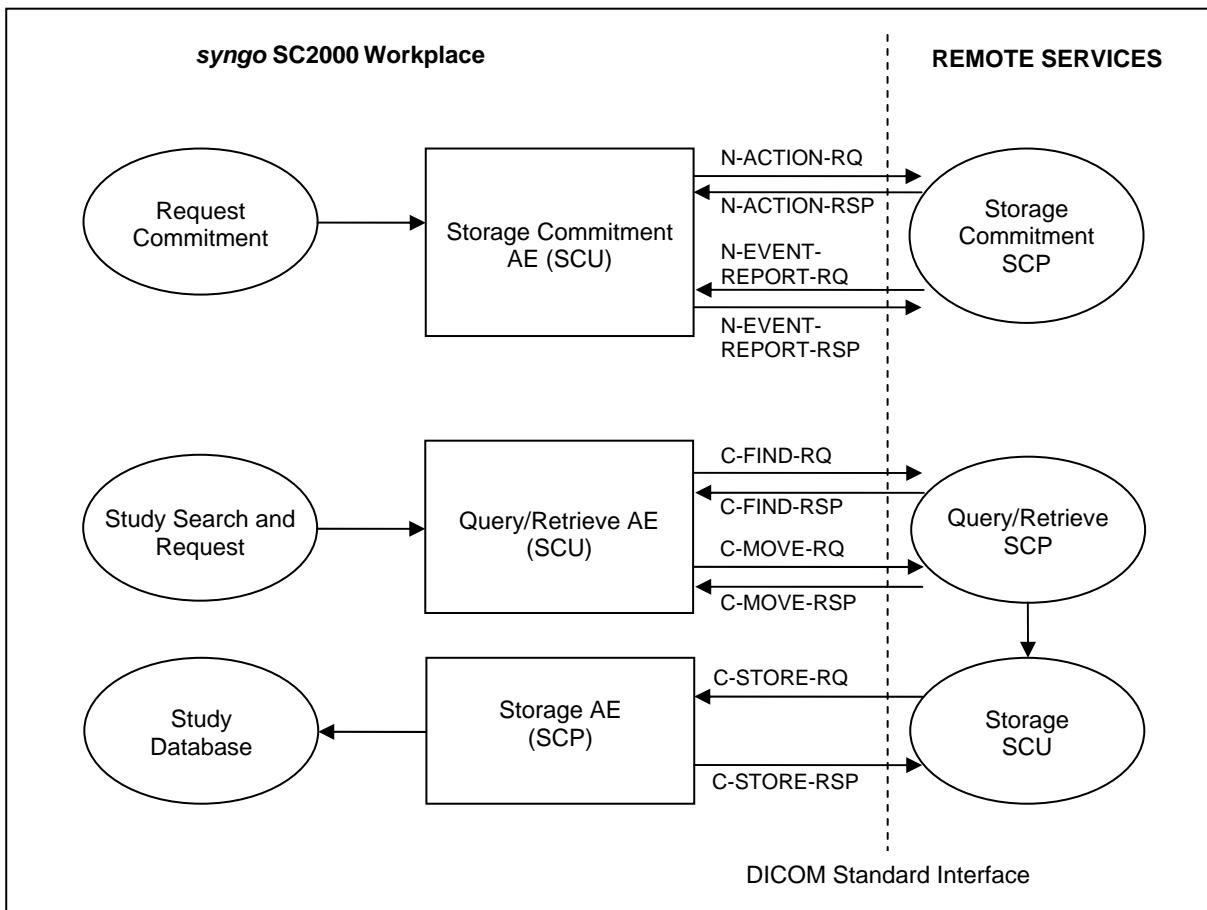

Figure 2-2. Functional Overview (Continued)

2.1.2 Functional Definition of AE's

The SCP components of the SC2000 Workplace operate as background server processes. They exist as soon as the system is powered up and wait for association requests. Upon accepting an association with a negotiated Presentation Context they start to receive and process the request described in the following sections.

2.1.2.1 Verification AE

The DICOM verification service can be used for diagnostic purposes. When used as a diagnostic tool, Verification will return the following messages to the user:

- C-Echo discovery result: Succeeded
- C-Echo discover result: Failed

Verification is available for each service configuration accessed through the Network/Printing pages of User Configuration:

- Store Configuration
- Storage Commitment Configuration
- Query Retrieve Configuration

The SC2000 Workplace supports the Verification service as a SCP and SCU. As a SCU, Verification is activated when the C-Echo button is selected on a service configuration page.

2.1.2.2 Storage AE

The SC2000 Workplace acts as SCU and SCP for the C-STORE DICOM network service.

As an SCU, the SC2000 Workplace Storage Application Entity originates associations for transfer of DICOM Ultrasound single frame images, multi-frame images, raw data objects, and Comprehensive Structured Reports to remote Application Entities.

The system supports automatic and manual storage of captured objects. Manual transfers can be initiated through the export dialog on the Data View UI. If configured for automatic transfer, the system can either transfer objects “in progress” or “on study close”:

- The system automatically stores an image as soon as it is captured and saved to the local disk while the study is currently open and in-progress.
- The system automatically stores all the images belonging to the current study as it closes.

The “in-progress” method distributes the network load over time. The “on study close” method lets the user store studies more accurately in the server. During review of a study, undesired images may be deleted before the study is closed.

In the event of a network failure during a background store, the Storage SCU maintains a queue of failed C-STORE requests. These are periodically retried subsequent to the end of the study. The queue is also retried upon power cycling of the SC2000 Workplace.

The storage request consists of data describing the composite image objects selected for storage and the destination AET. An association is negotiated with the destination AE and the image data is transferred using the C-STORE DIMSE Service. The transfer status is reported to the initiator of the Storage request.

As an SCP, the SC2000 Workplace Application Entity accepts storage requests from configured DICOM nodes and stores received objects into the local database. The C-STORE DIMSE service is used for storing the images.

2.1.2.3 Storage Commitment AE

The SC2000 Workplace serves as a SCU for the DICOM Storage Commitment service. Upon successful completion of a storage job, the system uses the N-ACTION DIMSE Service to request storage commitment from a DICOM storage SCP. This can either be the same as the storage destination or storage commitment can be requested from a different server depending on the system configuration.

The user configures Storage Commitment from the Networking/Printing pages of the User Configuration. The SC2000 Workplace requests commitment of images and structured reports and, upon successful acknowledgement from the storage server, marks the study on the system hard drive as “Archived” (AD). Storage Commitment Request is always sent in an additional Association.

2.1.2.4 Query/Retrieve AE

The query/retrieve service class defines an application-level class of services which facilitates the management of images and patient data against the well-defined information model of DICOM and allows a DICOM AE to retrieve images from a remote DICOM node or to request a remote DICOM AE to initiate a transfer of images to another DICOM AE. The SC2000 Workplace DICOM query/retrieve application supports the query/retrieve services as an SCU.

The Query SCU initiates a C-FIND request to the remote SCP and is invoked directly by the user, using the query parameters entered in the Data View UI. The remote SCP returns a list of responses with defined data, which are displayed to the user. The user can decide to start retrieval or to issue another query.

The SC2000 Workplace supports

- the Study Root Query Model.

As the Move SCU, the system initiates a C-MOVE request to the remote Retrieve SCP. The remote Retrieve SCP in turn starts C-STORE suboperations to the Storage SCP.

2.1.3 Sequencing of Real-World Activities

This section describes the sequencing of Real-World Activities performed by the Application Entities using a UML sequence diagram. Real-World Activities are depicted as vertical bars and arrows show the events exchanged between them.

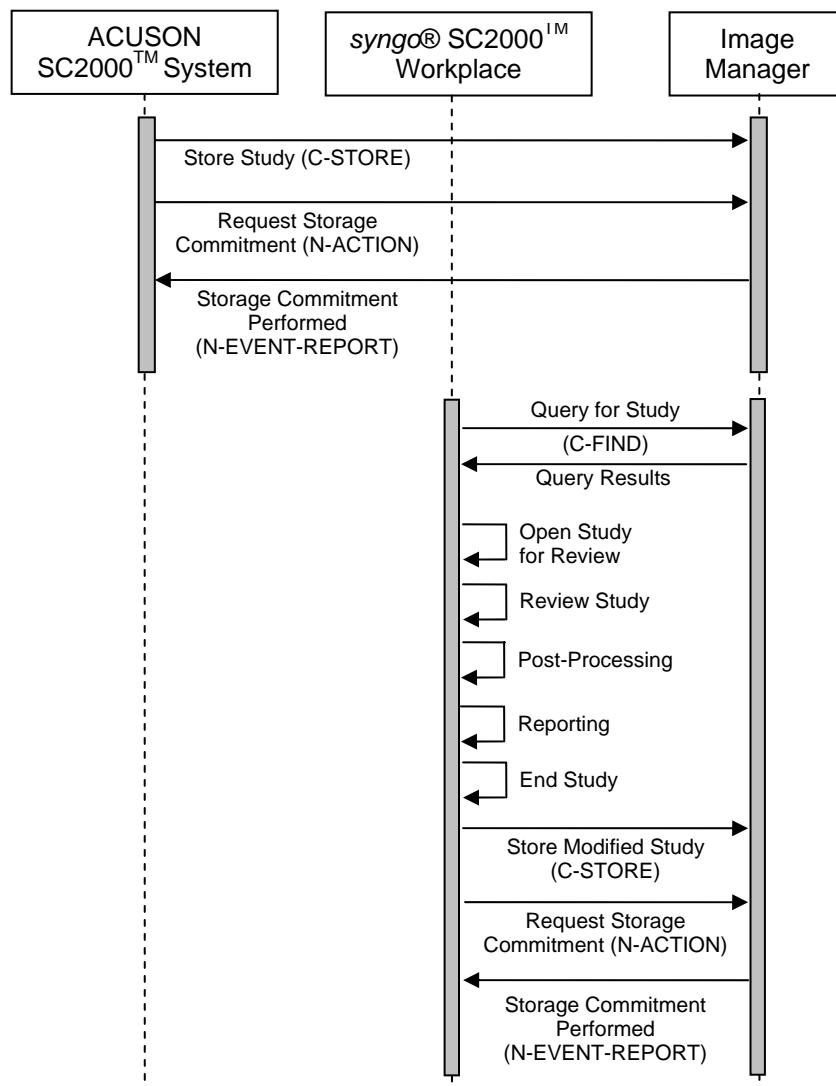

Figure 2-3. Sequence Diagram for Real-World Activities

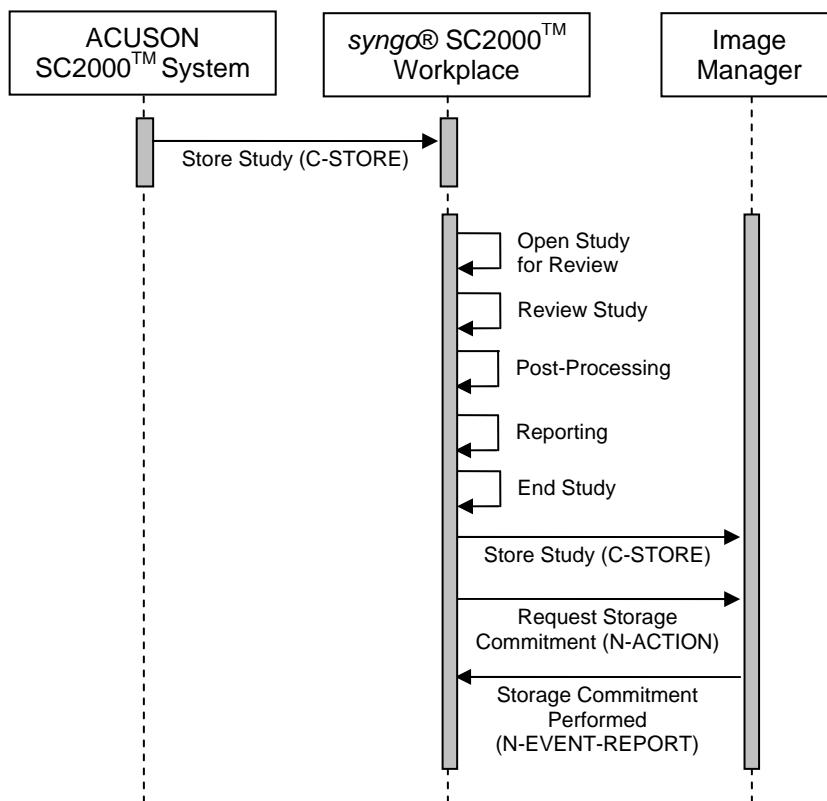

Figure 2-4. Sequence Diagram for Real-World Activities (continued)

2.2 AE Specifications

2.2.1 Storage AE

2.2.1.1 SOP Classes

Table 2-1:
SOP Classes for Storage AE

| SOP Class Name | SOP Class UID | User of Service (SCU) | Provider of Service (SCP) |
|--------------------------------------|-------------------------------|-----------------------|---------------------------|
| Supported Storage SOP Classes | | | |
| Ultrasound Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 | Yes | Yes |
| Ultrasound Multi-frame Image Storage | 1.2.840.10008.5.1.4.1.1.3.1 | Yes | Yes |
| Secondary Capture Image Storage | 1.2.840.10008.5.1.4.1.1.7 | Yes | Yes |
| Comprehensive SR | 1.2.840.10008.5.1.4.1.1.88.33 | Yes | Yes |
| Raw Data Storage | 1.2.840.10008.5.1.4.1.1.66 | Yes | Yes |

2.2.1.2 Association Policies

2.2.1.2.1 General

Table 2-2:
DICOM Application Context

| | |
|---------------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|---------------------------------|-----------------------|

2.2.1.2.2 Number of Associations

Table 2-3:
Number of Associations as an Association Initiator for Storage AE

| | |
|----------------------------------------------------|----|
| Maximum number of simultaneous associations | 10 |
|----------------------------------------------------|----|

Table 2-4:
Number of Associations as an Association Acceptor for Storage AE

| | |
|----------------------------------------------------|---------------------------------------------|
| Maximum number of simultaneous associations | Configurable between 1 and 4, default: 4 |
|----------------------------------------------------|---------------------------------------------|

2.2.1.2.3 Asynchronous Nature

The SC2000 Workplace supports asynchronous communication (multiple outstanding transactions over a single association). On the SCU side, the Window size proposed is infinite. On the SCP side, any non-infinite maximum size will be accepted.

Table 2-5:
Asynchronous Nature as an Association Initiator for Storage AE

| | |
|----------------------------------------------------------------|----------|
| Maximum number of outstanding asynchronous transactions | Infinite |
|----------------------------------------------------------------|----------|

2.2.1.2.4 Implementation Identifying Information

Table 2-6:
DICOM Implementation Class and Version for Storage AE

| | |
|------------------------------------|-------------------------------|
| Implementation Class UID | 1.3.12.2.1107.5.99.3.20080101 |
| Implementation Version Name | SIEMENS |

2.2.1.3 Association Initiation Policy (Storage SCU)

The SC2000 Workplace initiates associations while processing the service operations and internal messages as shown below.

| Operation or Real-World Activity | Association for |
|----------------------------------|-----------------|
| Send Instance | C-STORE, C-ECHO |

2.2.1.3.1 Activity “Send To”

2.2.1.3.1.1 Description and Sequencing of Activities

Storage of a DICOM object is either triggered by a C-MOVE request initiated by an external DICOM AE to the SC2000 Workplace or internally in the SC2000 Workplace.

If an association to a remote Application Entity could successfully be established, each image will be transferred one after another via the same open association.

The automatic retry mechanism is configurable. The user can configure the number of retries as well as the time interval between two retries.

Retry is done if:

- a) The network connection has been lost from the SCU perspective. In this case, retry is performed as soon as the network connection is available again.
- b) The partner is not reachable for other reasons (e.g. partner node has broken down). For this case, a (global, configurable) timeout has been implemented after which retry is performed.

2.2.1.3.1.2 Proposed Presentation Contexts

For all supported images (see SOP Classes in Table 2-1: SOP Classes for Storage AE), the following Transfer Syntaxes are supported.

**Table 2-7:
Proposed Presentation Contexts for Storage AE**

| Abstract Syntax | | Transfer Syntax | |
|-------------------------------------------------------|-------------------------------|--------------------------|------------------------|
| Name | UID | Name List | UID List |
| Ultrasound Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 | Implicit VR LittleEndian | 1.2.840.10008.1.2 |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 |
| | | JPEG Lossless | 1.2.840.10008.1.2.4.70 |
| Secondary Capture Image Storage | 1.2.840.10008.5.1.4.1.1.7 | Implicit VR LittleEndian | 1.2.840.10008.1.2 |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 |
| Ultrasound Multi-frame Image Storage (Clips) | 1.2.840.10008.5.1.4.1.1.3.1 | JPEG Lossy (Baseline) | 1.2.840.10008.1.2.4.50 |
| | | Implicit VR LittleEndian | 1.2.840.10008.1.2 |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 |
| Ultrasound Raw Data Storage (3D volumetric data sets) | 1.2.840.10008.5.1.4.1.1.66 | Implicit VR LittleEndian | 1.2.840.10008.1.2 |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 |
| Comprehensive SR | 1.2.840.10008.5.1.4.1.1.88.33 | Implicit VR LittleEndian | 1.2.840.10008.1.2 |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 |

2.2.1.3.1.3 Photometric Interpretation

Photometric Interpretation (color mode of the pixel image data) is not a negotiable parameter in DICOM 3.0. The Photometric Interpretation Attribute (0028,0004) is set depending on the transfer syntax and the system configuration.

Table 2-8:
Photometric Interpretation

| SOP Class | | Transfer Syntax | | Photometric Interpretation |
|----------------------------------------------|-----------------------------|--------------------------|------------------------|----------------------------|
| Name | UID | Name List | UID List | |
| Ultrasound Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | RGB |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | |
| | | JPEG Lossless | 1.2.840.10008.1.2.4.70 | |
| Secondary Capture Image Storage | 1.2.840.10008.5.1.4.1.1.7 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | RGB |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | |
| Ultrasound Multi-frame Image Storage (Clips) | 1.2.840.10008.5.1.4.1.1.3.1 | JPEG Lossy (Baseline) | 1.2.840.10008.1.2.4.50 | YBR_FULL_422 |
| | | Implicit VR LittleEndian | 1.2.840.10008.1.2 | RGB |

2.2.1.3.1.4 SOP Specific Conformance to SOP Classes

The SC2000 Workplace will not add or change private attributes, even if case objects are compressed or the image header is updated according to IHE [2] Patient Information Reconciliation.

Refer to section 6.1.1, Created SOP Instances, for a detailed list of attributes.

Table 2-9:
DICOM Command Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|----------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------------|
| Error | Sending partially or completely failed | Any none null Code | Failure reported to user and storage job is cancelled. (percentage of transferred instances is shown) |
| Success | Image is successfully stored on file system. | 0000 | Success reported to user |

Table 2-10:
DICOM Command Communication Failure Behavior

| Exception | Behavior |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Timeout | Failure reported to user (Timeout configurable; default 30s). The system retries according to the configured retry parameters. |
| Association Aborted | Failure reported to user and the storage job is cancelled. |

2.2.1.4 Association Acceptance Policy

The SC2000 Workplace attempts to accept a new association for

- DIMSE C-STORE

service operations.

Generally, associations are accepted if all of the following conditions are true:

- The "called AET" matches one of the configured Application Entity Titles of the SC2000 Workplace.
- The "calling AET" is allowed to connect to SC2000 Workplace. This check can be disabled.
- The maximum number of incoming associations is not reached.
- At least one Proposed Presentation Context is supported.

If a Proposed Presentation Context contains more than one Transfer Syntax, the one in the following priority list is chosen (if applicable for the SOP class):

- 1) Explicit Value Representation Little Endian
- 2) Implicit Value Representation Little Endian
- 3) Explicit Value Representation Big Endian
- 4) JPEG Baseline (Process 1)
- 5) JPEG Extended (Process 2 & 4)
- 6) JPEG Lossless, Non-Hierarchical, First-Order Prediction (Process 14)
- 7) JPEG 2000 Image Compression (Lossless Only)
- 8) JPEG 2000 Image Compression
- 9) RLE Lossless

2.2.1.4.1 Activity “Receive Instances”

2.2.1.4.1.1 Description and Sequencing of Activities

The SC2000 Workplace receiving process will accept an association, receive any images transmitted on that association and store the images on disk. It will store some header attributes in the database in order to allow clients to query these attributes.

2.2.1.4.1.2 Accepted Presentation Contexts

| | |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.2.840.10008.1.2.2 | Explicit Value Representation Big Endian |
| 1.2.840.10008.1.2.1 | Explicit Value Representation Little Endian |
| 1.2.840.10008.1.2 | Implicit Value Representation Little Endian: Default Transfer Syntax for DICOM |
| 1.2.840.10008.1.2.4.50 | JPEG Baseline (Process 1): Default Transfer Syntax for Lossy JPEG 8 Bit Image Compression |
| 1.2.840.10008.1.2.4.70 | JPEG Lossless, Non-Hierarchical, First-Order Prediction (Process 14 [Selection Value 1]): Default Transfer Syntax for Lossless JPEG Image Compression |

2.2.1.4.1.3 SOP Specific Conformance to SOP Classes

In case of a successful C-STORE operation, the image has successfully been written on disk either in Explicit Little Endian format or in the compression format received.

The Storage AE of the SC2000 Workplace returns the status "success" when the data is stored to disk and a minimal image header validation has been performed.

The following header attributes must be available and filled:

- Patient Name,
- Study Instance UID,
- Series Instance UID and
- SOP Instance UID

Table 2-11:
Storage C-STORE Response Status

| Service Status | Further Meaning | Error Code | Reason |
|----------------|-----------------|------------|---------------------------------------------------------------------------------------------------------|
| Success | Success | 0x0000 | Image received correctly (success notification is done after receiving, before indexing and storing) |

2.2.1.4.1.4 Other SOP Specific Behavior

- If an image is received that is already stored in the database – identified by the SOP Instance UID – the new image will be ignored. The existing instance is not superseded.
- The Patient Quadruplet (Patient's Name, Patient ID, Date of Birth, Patient Sex) is internally used for unique identification. The Patient ID is specified as a "type 2" attribute by DICOM. Therefore the attribute must be in the message but it may be empty. If the Patient ID is missing, it will be generated and inserted to the index by the SC2000 Workplace for internal purposes.

2.2.2 Storage Commitment AE

2.2.2.1 SOP Classes

Table 2-12:
SOP Classes for Storage Commitment AE

| SOP Class Name | SOP Class UID | User of Service (SCU) | Provider of Service (SCP) |
|-------------------------------------------------|----------------------|-----------------------|---------------------------|
| Supported Storage Commitment SOP Classes | | | |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Yes | No |

2.2.2.2 Association Policies

2.2.2.2.1 General

Table 2-13:
DICOM Application Context

| | |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

2.2.2.2.2 Number of Associations

Table 2-14:
Number of Associations as an Association Initiator for
Storage Commitment AE

| | |
|----------------------------------------------------|-----------|
| Maximum number of simultaneous associations | Unlimited |
|----------------------------------------------------|-----------|

Table 2-15:
Number of Associations as an Association Acceptor for
Storage Commitment AE

| | |
|----------------------------------------------------|---------------------------------------------|
| Maximum number of simultaneous associations | Configurable between 1 and 4, default: 4 |
|----------------------------------------------------|---------------------------------------------|

2.2.2.2.3 Asynchronous Nature

The SC2000 Workplace supports asynchronous communication (multiple outstanding transactions over a single association). On the SCU side the Window size proposed is infinite. On the SCP Side any non-infinite maximum size will be accepted.

Table 2-16:
Asynchronous Nature as an Association Initiator for
Storage Commitment AE

| | |
|----------------------------------------------------------------|----------|
| Maximum number of outstanding asynchronous transactions | Infinite |
|----------------------------------------------------------------|----------|

2.2.2.2.4 Implementation Identifying Information

Table 2-17:
DICOM Implementation Class and Version for
Storage Commitment AE

| | |
|------------------------------------|-------------------------------|
| Implementation Class UID | 1.3.12.2.1107.5.99.3.20080101 |
| Implementation Version Name | SIEMENS |

2.2.2.3 Association Initiation Policy (Storage Commitment SCU)

The SC2000 Workplace initiates associations while processing the service operations and internal messages as shown below.

| Operation or Real-World Activity | Association for |
|-----------------------------------------|----------------------------|
| Storage Commitment | N-ACTION N-EVENT-REPORT |

2.2.2.3.1 Activity “Send Initial Storage Commitment”

2.2.2.3.1.1 Description and Sequencing of Activities

After Sending Images to the Archive, the SC2000 Workplace will initiate a Storage Commitment request if configured. The SC2000 Workplace initiates a new association in order to send the N-ACTION-RQ to the SCP.

2.2.2.3.1.2 Proposed Presentation Contexts

Table 2-18:
Proposed Presentation Contexts for Storage Commitment AE

| Presentation Context Table | | | | | |
|-------------------------------|----------------------|-------------------------------------------------------------------------------|-----------------------------------------------------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name List | UID List | | |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Implicit VR LittleEndian Explicit VR LittleEndian Explicit VR BigEndian | 1.2.840.10008.1.2 1.2.840.10008.1.2.1 1.2.840.10008.1.2.2 | SCU | None |

There is no extended negotiation as an SCU.

2.2.2.3.1.3 SOP Specific Conformance to SOP Classes

Table 2-19:
DICOM Command Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-----------------------------------|--------------------|--------------------------|
| Error | No Retry on Failure | Any none null Code | Failure reported to user |
| Success | Storage Commitment Reply noticed. | 0000 | Success reported to user |

Table 2-20:
DICOM Command Communication Failure Behavior

| Exception | Behavior |
|---------------------|--------------------------|
| Timeout | Failure reported to user |
| Association Aborted | Failure reported to user |

2.2.2.3.2 Activity “Send Reply to Commitment Requests on separate associations”

2.2.2.3.2.1 Description and Sequencing of Activities

The SC2000 Workplace system accepts the N-EVENT-REPORT-RQ on a separate association from the N-ACTION-RQ.

2.2.2.3.2.2 Proposed Presentation Contexts

Table 2-21:
Proposed Presentation Contexts for Storage Commitment AE

| Presentation Context Table | | | | | |
|-------------------------------|----------------------|-------------------------------------------------------------------------------|-----------------------------------------------------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name List | UID List | | |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Implicit VR LittleEndian Explicit VR LittleEndian Explicit VR BigEndian | 1.2.840.10008.1.2 1.2.840.10008.1.2.1 1.2.840.10008.1.2.2 | SCP | None |

There is no extended negotiation as an SCU.

2.2.2.3.2.3 SOP Specific Conformance for SOP Classes

Table 2-22:
DICOM Command Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-----------------------------------|--------------------|------------------------------------------|
| Error | Storage Commitment Reply ignored. | Any none null Code | Storage Commitment will not be repeated. |
| Success | Storage Commitment Reply noticed. | 0000 | Success reported to user. |

There is no special failure behavior.

2.2.2.4 Association Acceptance Policy

Storage Commitment AE does not accept Association requests.

2.2.3 Query AE

2.2.3.1 SOP Classes

The SC2000 Workplace provides Standard Conformance to the following DICOM V3.0 SOP Classes as SCP/SCU.

Table 2-23:
SOP Classes for Query AE

| SOP Class Name | SOP Class UID | User of Service (SCU) | Provider of Service (SCP) |
|----------------------------------------------------|-----------------------------|-----------------------|---------------------------|
| Supported Query SOP Classes | | | |
| Study Root Query/Retrieve Information Model - FIND | 1.2.840.10008.5.1.4.1.2.2.1 | Yes | No |

2.2.3.2 Association Policies

2.2.3.2.1 General

Table 2-24:
DICOM Application Context

| | |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

2.2.3.2.2 Number of Associations

Table 2-25:
Number of Associations as an Association Initiator for Query AE

| | |
|---------------------------------------------|-----------|
| Maximum number of simultaneous associations | Unlimited |
|---------------------------------------------|-----------|

Table 2-26:
Number of Associations as an Association Acceptor for Query AE

| | |
|---------------------------------------------|---------------------------------------------|
| Maximum number of simultaneous associations | Configurable between 1 and 4, default: 4 |
|---------------------------------------------|---------------------------------------------|

2.2.3.2.3 Asynchronous Nature

The SC2000 Workplace supports asynchronous communication (multiple outstanding transactions over a single association). On the SCU side the Window size proposed is infinite. On the SCP Side any non-infinite maximum size will be accepted.

Table 2-27:
Asynchronous Nature as an Association Initiator for Query AE

| | |
|---------------------------------------------------------|----------|
| Maximum number of outstanding asynchronous transactions | Infinite |
|---------------------------------------------------------|----------|

2.2.3.2.4 Implementation Identifying Information

Table 2-28:
DICOM Implementation Class and Version for Query AE

| | |
|-----------------------------|-------------------------------|
| Implementation Class UID | 1.3.12.2.1107.5.99.3.20080101 |
| Implementation Version Name | SIEMENS |

2.2.3.3 Association Initiation Policy (Query SCU)

The SC2000 Workplace will initiate new associations for the following operations as an SCU.

| Operation or Real-World Activity | Association for |
|----------------------------------|-----------------|
| Querying a Remote Node | C-FIND |

2.2.3.3.1 Activity “Querying a Remote Node”

2.2.3.3.1.1 Description and Sequencing of Activities

The associated Real-World activity is a C-Find request initiated by the user of the SC2000 Workplace. The user specifies some attributes the system should use to query its database. If the query user successfully establishes an association to the remote Application Entity, it will send a C-Find request (according to the query model) and will then return the results to the application.

2.2.3.3.1.2 Proposed Presentation Contexts

The SC2000 Workplace will propose Presentation Contexts as shown in the following table.

Table 2-29:
Proposed Presentation Contexts for Query AE

| Presentation Context Table | | | | | |
|-----------------------------------------------------------|-----------------------------|----------------------------------------------------------------------------------|-----------------------------------------------------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name List | UID List | | |
| Study Root Query/ Retrieve Information Model - FIND | 1.2.840.10008.5.1.4.1.2.2.1 | Implicit VR Little Endian Explicit VR Big Endian Explicit VR Little Endian | 1.2.840.10008.1.2 1.2.840.10008.1.2.2 1.2.840.10008.1.2.1 | SCU | No |

2.2.3.3.1.3 SOP Specific Conformance to SOP Classes

Refer to section 6.1.1, Created SOP Instances, for a detailed list of attributes.

The SC2000 Workplace checks for the following status codes in the Query SCP's C-Find-Response.

Table 2-30:
DICOM Command Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|---------------------------------|--------------------|--------------------------|
| Error | No Auto Retry on failure | Any none null Code | Failure reported to user |
| Success | Success logged on the job queue | 0000 | Success reported to user |

Table 2-31:
DICOM Command Communication Failure Behavior

| Exception | Behavior |
|---------------------|--------------------------|
| Timeout | Failure reported to user |
| Association Aborted | Failure reported to user |

The SC2000 Workplace supports the following query levels:

- Study

2.2.3.4 Association Acceptance Policy

Query AE does not accept Association requests.

2.2.4 Retrieve AE

2.2.4.1 SOP Classes

This Application Entity provides Standard Conformance to the following SOP Classes.

Table 2-32:
SOP Classes for Retrieve AE

| SOP Class Name | SOP Class UID | User of Service (SCU) | Provider of Service (SCP) |
|----------------------------------------------------|-----------------------------|-----------------------|---------------------------|
| Supported Query/Retrieve SOP Classes | | | |
| Study Root Query/Retrieve Information Model - MOVE | 1.2.840.10008.5.1.4.1.2.2.2 | Yes | Yes |

2.2.4.2 Association Policies

2.2.4.2.1 General

Table 2-33:
DICOM Application Context

| | |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

2.2.4.2.2 Number of Associations

Table 2-34:
Number of Associations as an Association Initiator for Retrieve AE

| | |
|---------------------------------------------|-----------|
| Maximum number of simultaneous associations | Unlimited |
|---------------------------------------------|-----------|

Table 2-35:
Number of Associations as an Association Acceptor for Retrieve AE

| | |
|---------------------------------------------|---------------------------------------------|
| Maximum number of simultaneous associations | Configurable between 1 and 4, default: 4 |
|---------------------------------------------|---------------------------------------------|

2.2.4.2.3 Asynchronous Nature

The SC2000 Workplace supports asynchronous communication (multiple outstanding transactions over a single association). On the SCU side the Window size proposed is infinite. On the SCP Side any non-infinite maximum size will be accepted.

Table 2-36:
Asynchronous Nature as an Association Initiator for Retrieve AE

| | |
|----------------------------------------------------------------|----------|
| Maximum number of outstanding asynchronous transactions | Infinite |
|----------------------------------------------------------------|----------|

2.2.4.2.4 Implementation Identifying Information

Table 2-37:
DICOM Implementation Class and Version for Retrieve AE

| | |
|------------------------------------|-------------------------------|
| Implementation Class UID | 1.3.12.2.1107.5.99.3.20080101 |
| Implementation Version Name | SIEMENS |

2.2.4.3 Association Initiation Policy

The SC2000 Workplace Retrieve AE sends a C-MOVE-RQ to an SCP node to retrieve images.

2.2.4.3.1 Activity “Move SCU”

2.2.4.3.1.1 Description and Sequencing of Activities

The C-MOVE-RQs are used to retrieve the referenced instances. The Retrieve AE supports the query model Study Root.

2.2.4.3.1.2 Accepted Presentation Contexts

Table 2-38:
Proposed Presentation Contexts for Retrieve AE and Activity MOVE SCU

| Presentation Context Table | | | | | |
|-------------------------------------------|---------------------------|-------------------------------------------------------------------------------|-----------------------------------------------------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name List | UID List | | |
| Study Root Query/Retrieve Model – MOVE | 1.2.840.10008.5.1.4.1.2.2 | Implicit VR LittleEndian Explicit VR LittleEndian Explicit VR BigEndian | 1.2.840.10008.1.2 1.2.840.10008.1.2.1 1.2.840.10008.1.2.2 | SCP | No |

There is no extended negotiation as an SCU.

2.2.4.3.1.3 SOP Specific Conformance to Move SCU Classes

At association establishment time, the C-MOVE presentation context shall be negotiated. When the C-MOVE-RQ is processed, the Move Destination attribute (receiver of images) is ignored. However, the Move Destination AE must conform to the DICOM conventions (value representation AE).

Table 2-39:
DICOM Command Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|---------------------------------|--------------------|-------------------------------------------------------------------------|
| Error | No Auto retry on failure | Any none null Code | Failure reported to user (percentage of transferred instances is shown) |
| Success | Success logged on the job queue | 0000 | Success reported to user |

Table 2-40:
DICOM Command Communication Failure Behavior

| Exception | Behavior |
|---------------------|--------------------------|
| Timeout | Failure reported to user |
| Association Aborted | Failure reported to user |

2.2.4.4 Association Acceptance Policy

Retrieve AE does not accept Association requests.

2.3 Network Interfaces

2.3.1 Physical Network Interface

The SC2000 Workplace is independent from the physical medium over which TCP/IP executes; it inherits this from the OS system upon which it executes.

2.3.2 Additional Protocols

None.

2.3.3 IPv4 and IPv6 Support

IPv4 supported, IPv6 not supported.

2.4 Configuration

DICOM and networking parameters can be configured for both the local SC2000 Workplace and remote DICOM Service Class Providers through the User Configuration – Networking/Printing pages.

2.4.1 Local Host - TCP/IP and General

The SC2000 Workplace's local network parameters are configurable. The following parameters can be configured for the SC2000 Workplace:

- Host Name
- IP address
- Network IP mask
- Router/Gateway IP addresses
- DICOM Storage Application Entity Titles
- Printers

2.4.1.1 DICOM Storage Configuration

Remote DICOM Storage and Storage Commitment Service Class Providers are configured through the Store Configuration or Storage Commitment Configuration of the User Configuration – Networking/Printing pages. The following parameters can be configured for each device:

- Host name
- IP address
- AET - Application Entity Title
- Port number
- Proposed transfer syntaxes

3 MEDIA INTERCHANGE

3.1 Implementation Models

3.1.1 Application Data Flow Diagram

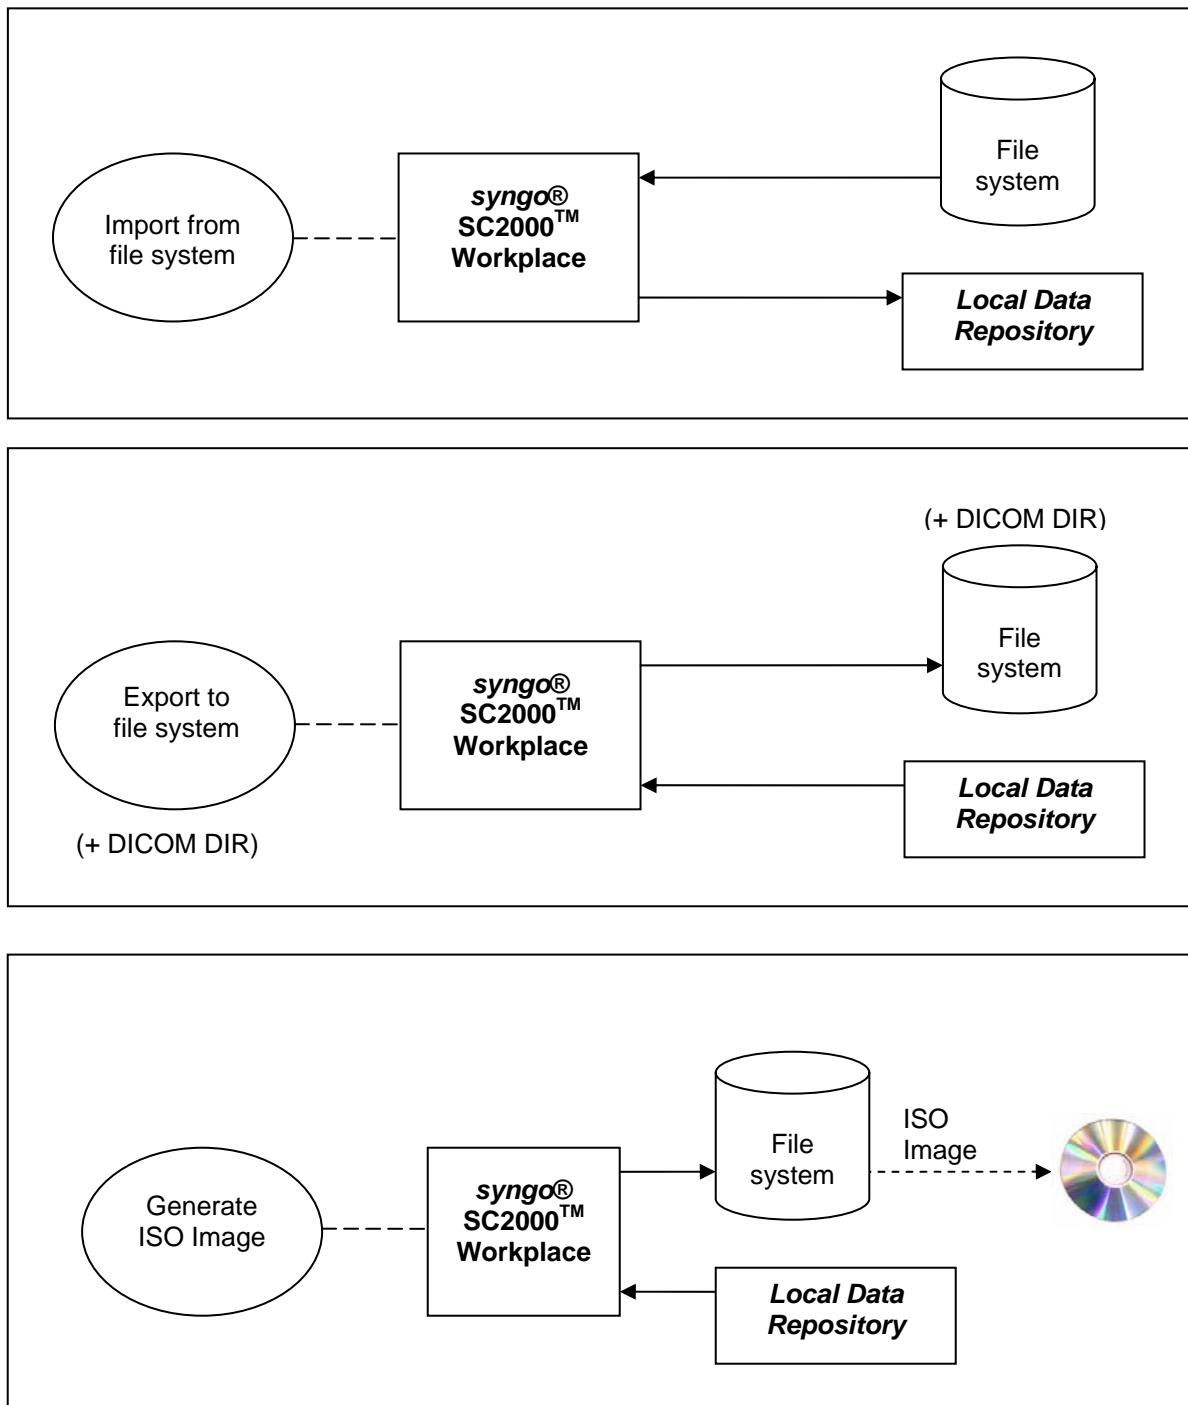

Figure 3-1. Media Application Data Flow Diagram

The SC2000 Workplace provides the functionality to Import or Export DICOM Instances to and from the File System. During exportation, a DICOMDIR may also be generated. A complete ISO Image ready-to-burn can be generated. All SOP Classes defined in Table 2-1: SOP Classes for Storage AE are supported for the Import/Export functionality.

3.1.2 Functional definitions of AEs

The SC2000 Workplace is capable of

- creating a new File-set in the File System (Export to ...)
- importing SOP Instances from the File System onto local storage

3.1.3 Sequencing of Real-World Activities

Not applicable.

3.1.4 File Meta Information for Implementation Class and Version

Table 3-1:
Implementation Class/Version Name – Media Interchange

| | |
|-------------------------------|-------------------------------|
| File Meta Information Version | 0x0001 |
| Implementation Class UID | 1.3.12.2.1107.5.99.3.20080101 |
| Implementation Version Name | SIEMENS |

3.2 AE Specifications

3.2.1 Media Storage AE Specification

The SC2000 Workplace system Media Storage AE provides conformance to the following DICOM SOP Classes as an FSC. The following specifications apply to the AE.

When configuring an uncompressed Transfer Syntax, the STD-US and STD-GEN application profile classes will be extended to store instances of the following SOP classes in compressed format.

Table 3-2:
Application Profiles, Activities, and Roles for DICOM Exchange Media

| Application Profiles Supported | Real World Activity | Role |
|--------------------------------|---------------------|---------|
| STD-GEN-CDR | | |
| STD-US-SC-MF-CDR | | |
| STD-US-ID-MF-CDR | Create CD-R | FSC/FSU |

3.2.2 Implementation Identifying Information

Table 3-3:
DICOM Implementation Class and Version for Media Storage AE

| | |
|-----------------------------|----------------------------|
| Implementation Class UID | 1.3.12.2.1107.5.9.20080101 |
| Implementation Version Name | SIEMENS |

3.3 Media Storage Application Profile

3.3.1 DICOMDIR Keys

The DICOMDIR file will contain the following attributes for the levels Patient - Study - Series - Image (valid for all Application profiles described in this section).

Table 3-4:
DICOMDIR Keys

| Attribute Name | Tag | Type | Notes |
|------------------------------------------------------------------|-------------|------|-----------------------------------------------------------------------------------------------|
| File-Set Identification | | | |
| File-set ID | (0004,1130) | 2 | Volume label of media |
| Directory Information | | | |
| Offset of the First Directory Record of the Root Directory Entry | (0004,1200) | 1 | |
| Offset of the Last Directory Record of the Root Directory Entity | (0004,1202) | 1 | |
| File-set Consistency Flag | (0004,1212) | 1 | 0000H |
| Directory Record Sequence | (0004,1220) | 2 | |
| > Offset of the Next Directory Record | (0004,1400) | 1C | |
| > Record In-use flag | (0004,1410) | 1C | FFFFH |
| > Offset of Referenced Lower-Level Directory Entity | (0004,1420) | 1C | |
| > Directory Record Type | (0004,1430) | 1C | PATIENT, STUDY, SERIES, IMAGE, SR DOCUMENT, RAW DATA |
| > Referenced File ID | (0004,1500) | 1C | contains the filename on media for the Directory Records of Type IMAGE, SR DOCUMENT, RAW DATA |
| > Referenced SOP Class UID in File | (0004,1510) | 1C | for the Directory Records of Type IMAGE, SR DOCUMENT, RAW DATA |
| > Referenced SOP Instance UID in File | (0004,1511) | 1C | for the Directory Records of Type IMAGE, SR DOCUMENT, RAW DATA |
| > Referenced Transfer Syntax UID in File | (0004,1512) | 1C | for the Directory Records of Type IMAGE, SR DOCUMENT, RAW DATA |
| > Record Selection Keys | see below | | |

| Attribute Name | Tag | Type | Notes |
|-----------------------------|-------------|------|--------------------------------------------------------------|
| Patient Keys | | | Directory Record Type PATIENT |
| Specific Character Set | (0008,0005) | 1C | |

3.3.2 Compliance to STD-GEN-CDR

The SC2000 Workplace conforms to the STD-GEN-CDR profile. The following SOP Classes will be supported as an FSC.

Table 3-5:
STD-GEN-CDR Supported SOP Classes

| IOD | SOP Class UID | Transfer Syntax and UID | FSC | FSR | FSU |
|---------------------------------|---------------------------|--------------------------|-----|-----|-----|
| Secondary Capture Image Storage | 1.2.840.10008.5.1.4.1.1.7 | Explicit VR LittleEndian | Yes | No | No |

3.3.3 Compliance to STD-US-SC-MF-CDR

For media conforming to the STD-US-SC-MF-CDR profiles the following SOP Classes and transfer syntaxes will be supported as an FSC.

Table 3-6:
STD-US-SC-MF-CDR Supported SOP Classes

| IOD | SOP Class UID | Transfer Syntax and UID | FSC | FSR | FSU |
|----------------------------------------------|-----------------------------|-------------------------------------------------|-----|-----|-----|
| Ultrasound Multi-frame Image Storage (Clips) | 1.2.840.10008.5.1.4.1.1.3.1 | JPEG Lossy (Baseline) 1.2.840.10008.1.2.4.50 | Yes | No | No |

The following Photometric Interpretations are supported by FSC:

- RGB - Ultrasound Image Storage only
- YBR_FULL_422 - Ultrasound Multi-frame Image Storage (Clips) only

3.3.4 Compliance to STD-US-ID-MF-CDR

For media conforming to the STD-US-ID-MF-CDR profiles the following SOP Classes and transfer syntaxes will be supported as an FSC.

**Table 3-7:
STD-US-MF-CDR Supported SOP Classes**

| IOD | SOP Class UID | Transfer Syntax and UID | FSC | FSR | FSU |
|------------------|----------------------------|--------------------------------------------------|-----|-----|-----|
| Raw Data Storage | 1.2.840.10008.5.1.4.1.1.66 | Explicit VR Little Endian 1.2.840.10008.1.2.1 | Yes | No | No |

4 SUPPORT OF CHARACTER SETS

4.1 Character Sets for syngo SC2000 Workplace

The syngo SC2000 Workplace supports the ISO 8859 Latin 1 (ISO-IR 100) character set.

5 SECURITY

5.1 Security Profiles

- PS 3.15 Annex F: Network Address Management Profiles: DHCP Client, DNS Client supported
- PS 3.15 Annex G: Time Synchronization Profiles supported

5.2 Association Level Security

It is possible to configure whether the DICOM Server will only answer to known AETs or to any AET.

5.3 Application Level Security

- For configuration and maintenance, the Service Technician must login with a separate password.

6 ANNEXES

6.1 IOD Contents

6.1.1 Created SOP Instances

6.1.1.1 US Image IOD Attributes

6.1.1.6 Query: C-Find

The SC2000 Workplace DICOM Query/Retrieve SCU supports hierarchical queries with all mandatory search keys. The interactive querying of attributes on IMAGE level is not supported by the Query SCU. Though, retrieval of individual Objects is possible. The following table describes the search keys for the different query models that the SCU supports. Matching is either wildcard, which means that the user can supply a string containing wildcards, or universal, which means that the attribute is requested as return value.

| Attribute Name | Tag | Type | Matching | User Input | Return Value Display |
|----------------------|-------------|------|------------------|-------------|----------------------|
| Patient Level | | | | | |
| Patient Name | (0010,0010) | R | Wildcard | Enter value | Yes |
| Patient ID | (0010,0020) | U | Wildcard | Enter value | Yes |
| Patient's Birth date | (0010,0030) | O | Universal (Null) | Enter value | Yes |
| Patient's Sex | (0010,0040) | O | Universal (Null) | Enter value | Yes |
| Study Level | | | | | |
| Patient Name | (0010,0010) | R | Wildcard | Enter value | Yes |
| Patient ID | (0010,0020) | R | Wildcard | Enter value | Yes |
| Patient's Birth date | (0010,0030) | O | Universal (Null) | Enter value | Yes |
| Patient's Sex | (0010,0040) | O | Universal (Null) | Enter value | Yes |
| Study Instance UID | (0020,000D) | U | Universal (Null) | | No |
| Study ID | (0020,0010) | R | Universal (Null) | Enter value | Yes |
| Study Date | (0008,0020) | R | Universal (Null) | Enter value | Yes |

| Attribute Name | Tag | Type | Matching | User Input | Return Value Display |
|-------------------------------------|-------------|------|-----------------------------------------------|-------------|----------------------|
| Study Time | (0008,0030) | R | Universal (Null) | - | Yes |
| Accession Number | (0008,0050) | R | Universal (Null) | Enter value | Yes |
| Study Description | (0008,1030) | O | Universal (Null) | Enter value | Yes |
| Referring Physician's Name | (0008,0090) | O | Universal (Null) | Enter value | Yes |
| Name of Physician Reading Study | (0008,1060) | O | Universal (Null) | Enter value | Yes |
| Modalities in Study | (0008,0061) | O | Universal (Null) | Enter value | Yes |
| Retrieve AE Title | (0008,0054) | O | Universal (Null) | | No |
| Number of Study related Series | (0020,1206) | O | Universal (Null) | | Yes |

| >Accession Number | 0008,0050 | O | Single value, Universal | | Yes |
| >Requested Procedure ID | (0040,1000) | O | Single value, Universal | | Yes |

7 APPENDICES

7.1 Appendix A: Echocardiography Structured Report

This appendix lists the DICOM Structured Report (SR) mappings used in the Cardiac Structured Reports of the syngo SC2000 Workplace SR files.

The mappings follow the DICOM SR Template TID 5200: Echocardiography Procedure Report, as described in PS 3.16-2008 of the DICOM Standard, and are organized in a manner similar to TID 5200. The **Label** column identifies the on-screen worksheet label associated with a measurement using the format “[Worksheet] Table Heading: Measurement Label” or “[Worksheet] Measurement Label”. All private code values use the Coding Scheme Designator “99SIEMENS”.

[…] contains additional information about the measurement.

The **HR** column indicates if a measurement has an individual heart rate associated it. The heart rate is defined in the SR by HAS PROPERTIES, NUM, Heart Rate (LN, 8867-4) with VM of 1.

When a Simpson’s Disk Number is associated with a volume as a modifier, it is defined in the SR by HAS CONCEPT MOD, TEXT, Simpson Disk Number (99SIEMENS, SimpsonDiskNum) with VM of 1.

Worksheets are identified in the Label column by the following notation:

| <u>Notation</u> | <u>Worksheet</u> | <u>Notation</u> | <u>Worksheet</u> |
|-----------------|------------------|-----------------|------------------|
| [A] | Arteries | [PV] | Pulmonary Valve |
| [Ao] | Ao/Aortic Valve | [PVn] | Pulmonary Veins |
| [D] | Diastology | [RA] | Right Atrium |
| [LA] | Left Atrium | [RV] | Right Ventricle |
| [LR] | LVA/RVA | [SE] | Stress Echo-LVA |
| [LV] | Left Ventricle | [Sh] | Shunts |
| [M] | M-mode | [TV] | Tricuspid Valve |
| [MV] | Mitral Valve | [V] | Volumes |
| [P] | PISA | | |

7.1.1 Patient Characteristics

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers | |
|--------------------------------|-------|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--|
| Patient Characteristics | | Container: Patient Characteristics (DCM, 121118) | | |
| | Age | Subject Age (DCM, 121033) | | |
| BP | | Systolic Blood Pressure (SRT, F-008EC) | | |
| | | Diastolic Blood Pressure (SRT, F-008ED) | | |
| | BSA | Body Surface Area (LN, 8277-6) | Body Surface Area Formula (LN, 8278-4) [Always set to: BSA(DuBois) = 0.007184*WT^0.425*HT^0.725 (DCM, 122241)] | |
| | Sex | Subject Sex (DCM, 121032) | | |

7.1.2 Left Ventricle

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers | |
|---------------------------------------------------|--------------------------------|-------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|--|
| Left Ventricle | | Container: Findings (DCM, 121070) | | |
| Measurements of Image Mode: 2D mode (SRT, G-03A2) | | | | |
| | [Ao] Aortic Valve: LVOT Area | Cardiovascular Orifice Area (SRT, G-038E) | Finding Site: Left Ventricle Outflow Tract (SRT, T-32650) | |
| X | [Ao] Aortic Valve: LVOT Diam s | Cardiovascular Orifice Diameter (SRT, G-038F) | Finding Site: Left Ventricle Outflow Tract (SRT, T-32650) Cardiac Cycle Point: Systole (SRT, F-32020) | |
| | [Ao] Aortic Valve: LVOT SV | Stroke Volume (SRT, F-32120) | Finding Site: Left Ventricle Outflow Tract (SRT, T-32650) | |
| | [LV] IVS % Thck | Interventricular Septum % Thickening (LN, 18054-7) | Image View: Parasternal long axis (SRT, G-0396) | |
| | [LV] IVS/LVPW | Interventricular Septum to Posterior Wall Thickness Ratio (LN, 18155-2) | | |
| | [LV] LV Major, max | Left Ventricle systolic major axis (LN, 18076-0) | Derivation: Maximum (SRT, G-A437) | |
| | [LV] LV % FS | Left Ventricular Fractional Shortening (LN, 18051-3) | Image View: Parasternal long axis (SRT, G-0396) | |
| | [LV] LVPW % Thck | Left Ventricle Posterior Wall % Thickening (LN, 18053-9) | Image View: Parasternal long axis (SRT, G-0396) | |
| | [LV] AL: LV Mass | Left Ventricle Mass (LN, 18087-7) | Measurement Method: Area-Length Single Plane (DCM, 125205) | |
| | [LV] AL: LV Mass/BSA | Mass/BSA (99SIEMENS, MassBSAIndex) | Measurement Method: Area-Length Single Plane (DCM, 125205) Index: Body Surface Area (LN, 8277-6) | |
| | [LV] AL: LV Mass/Ht | Mass/Height (99SIEMENS, MassHtIndex) | Measurement Method: Area-Length Single Plane (DCM, 125205) Index: Patient Height (LN, 8302-2) | |
| | [LV] Cubed: LV CI | Cardiac Index (SRT, F-32110) | Measurement Method: Cube Method (DCM, 125206) | |
| | [LV] Cubed: LV CO | Cardiac Output (SRT, F-32100) | Measurement Method: Cube Method (DCM, 125206) | |
| | [LV] Cubed: LV EF | Left Ventricular Ejection Fraction (LN, 18043-0) | Measurement Method: Cube Method (DCM, 125206) | |

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|----|---------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| | [LV] Cubed: LV HR | Composite heart rate for LV CO, Cubed (99SIEMENS, LVHRCOCube2D) | |
| | [LV] Cubed: LV SI | Stroke Index (SRT, F-00078) | Measurement Method: Cube Method (DCM, 125206) |

7.1.14 Cardiac Shunt Study

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|-----------------------------------------------------------------------------------------|----------------------------|----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| | Cardiac Shunt Study | Container: Findings (DCM, 121070) | Finding Site: Cardiac Shunt Study (SRT, P3-30031) |
| Measurements of Image Mode: 2D mode (SRT, G-03A2) | | | |
| X | [Sh] ASD Ant-Post Diam | Anterior-Posterior Diameter (99SIEMENS, AntPostDiam) | Finding Site: Atrial Septal Defect (SRT, D4-31220) |
| X | [Sh] ASD Major Diam | Major Axis (SRT, G-A193) | Finding Site: Atrial Septal Defect (SRT, D4-31220) |
| X | [Sh] ASD Minor Diam | Minor Diameter (99SIEMENS, MinorDiam) | Finding Site: Atrial Septal Defect (SRT, D4-31220) |
| X | [Sh] ASD Sup-Inf Diam | Superior-Inferior Diameter (99SIEMENS, SupInfDiam) | Finding Site: Atrial Septal Defect (SRT, D4-31220) |
| X | [Sh] PDA Diam | Diameter (SRT, M-02550) | Finding Site: Patent ductus arteriosus (SRT, D4-32012) |
| | [Sh] Pulm Side Area | Area (SRT, G-A166) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) |
| X | [Sh] Pulm Side Diam | Diameter (SRT, M-02550) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) |
| | [Sh] Sys Side Area | Area (SRT, G-A166) | Finding Site: Systemic side (99SIEMENS, SystemicSide) |
| X | [Sh] Sys Side Diam | Diameter (SRT, M-02550) | Finding Site: Systemic side (99SIEMENS, SystemicSide) |
| X | [Sh] VSD Diam | Diameter (SRT, M-02550) | Finding Site: Ventricular Septal Defect (SRT, D4-31150) |
| X | [Sh] VSD Major Diam | Major Axis (SRT, G-A193) | Finding Site: Ventricular Septal Defect (SRT, D4-31150) |
| X | [Sh] VSD Minor Diam | Minor Diameter (99SIEMENS, MinorDiam) | Finding Site: Ventricular Septal Defect (SRT, D4-31150) |
| Measurements are associated with CW and PW Doppler, so the image mode is not specified. | | | |
| | [Sh] ASD Pk Grad | Peak Gradient (LN, 20247-3) | Finding Site: Atrial Septal Defect (SRT, D4-31220) |
| | [Sh] ASD Vmax | Peak Velocity (LN, 11726-7) | Finding Site: Atrial Septal Defect (SRT, D4-31220) |
| | [Sh] Pulm Side CI | Cardiac Index (SRT, F-32110) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) Index: Body Surface Area (LN, 8277-6) |
| | [Sh] Pulm Side CO | Cardiac Output (SRT, F-32100) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) |
| | [Sh] Pulm Side HR | Composite heart rate (99SIEMENS, CompositeHR) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) |
| | [Sh] Pulm Side SI | Stroke Index (SRT, F-00078) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) Index: Body Surface Area (LN, 8277-6) |
| | [Sh] Pulm Side SV | Stroke Volume (SRT, F-32120) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) |
| X | [Sh] Pulm Side VTI | Velocity Time Integral (LN, 20354-7) | Finding Site: Pulmonary side (99SIEMENS, PulmonarySide) |
| | [Sh] Qp/Qs | Pulmonary-to-Systemic Shunt Flow Ratio (LN, 29462-9) | |
| | [Sh] Qp-Qs | Difference between Pulmonary Valve CO and Aortic Valve CO (99SIEMENS, QpMinusQs) | |
| | [Sh] Sys Side CI | Cardiac Index (SRT, F-32110) | Finding Site: Systemic side (99SIEMENS, SystemicSide) Index: Body Surface Area (LN, 8277-6) |
| | [Sh] Sys Side CO | Cardiac Output (SRT, F-32100) | Finding Site: Systemic side (99SIEMENS, SystemicSide) |
| | [Sh] Sys Side HR | Composite heart rate (99SIEMENS, CompositeHR) | Finding Site: Systemic side (99SIEMENS, SystemicSide) |

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|----|--------------------------------------------|-----------------------------------------------------|------------------------------------------------------------------------------------------------|
| | [Sh] Sys Side SI | Stroke Index (SRT, F-00078) | Finding Site: Systemic side (99SIEMENS, SystemicSide) Index: Body Surface Area (LN, 8277-6) |
| | [Sh] Sys Side SV | Stroke Volume (SRT, F-32120) | Finding Site: Systemic side (99SIEMENS, SystemicSide) |
| X | [Sh] Sys Side VTI | Velocity Time Integral (LN, 20354-7) | Finding Site: Systemic side (99SIEMENS, SystemicSide) |
| | [Sh] VSD Pk Grad [RV] RVSP: VSD Pk Grad | Peak Gradient (LN, 20247-3) | Finding Site: Ventricular Septal Defect (SRT, D4-31150) |
| | [Sh] VSD Vmax | Peak Velocity (LN, 11726-7) | Finding Site: Ventricular Septal Defect (SRT, D4-31150) |

7.1.15 Private Section: Coronary Artery

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|---------------------------------------------------|----------------------------------------------|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| | Coronary Artery | Container: Findings (DCM, 121070) | Finding Site: Coronary Artery (SRT, T-43000) |
| Measurements of Image Mode: 2D mode (SRT, G-03A2) | | | |
| X | [A] Coronary Arteries: Circumflex Diam | Diameter (SRT, M-02550) | Finding Site: Circumflex Coronary Artery (SRT, T-43120) |
| X | [A] Coronary Arteries: Circumflex Diam, Prox | Diameter (SRT, M-02550) | Finding Site: Circumflex Coronary Artery (SRT, T-43120) Topographical Modifier: Proximal (SRT, G-A118) |
| X | [A] Coronary Arteries: LAD Diam | Diameter (SRT, M-02550) | Finding Site: Left Anterior Descending Coronary Artery (SRT, T-4311A) |
| X | [A] Coronary Arteries: Left Main Diam | Diameter (SRT, M-02550) | Finding Site: Left Main Coronary Artery (SRT, T-43107) |
| X | [A] Coronary Arteries: RCA Diam | Diameter (SRT, M-02550) | Finding Site: Right Coronary Artery (SRT, T-43203) |

7.1.16 Private Section: Left Ventricular Analysis

These measurements appear on the LVA/RVA worksheet in the LVA table.

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|----|----------------------------------|-----------------------------------------------------|-----------------------------------------------------------------|
| | Left Ventricular Analysis | Container: Findings (DCM, 121070) | Finding Site: Left Ventricular Analysis (99SIEMENS, LVAnalysis) |
| | EDSI | End Diastolic Sphericity Index (99SIEMENS, EDSI) | |
| | EDV | Left Ventricular End Diastolic Volume (LN, 18026-5) | |
| | EF | Left Ventricular Ejection Fraction (LN, 18043-0) | |
| | ESSI | End Systolic Sphericity Index (99SIEMENS, ESSI) | |

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|----|-------------|---------------------------------------------------------------------------------|-----------|
| | ESV | Left Ventricular End Systolic Volume (LN, 18148-7) | |
| | SV | Stroke Volume (SRT, F-32120) | |
| | DDI16 | Diastolic Dyssynchrony Index (16 segment ASE model) (99SIEMENS, DDI16) | |
| | DISPED16 | Dispersion End Diastole (16 segment ASE model) (99SIEMENS, DISPED16) | |
| | DISPES16 | Dispersion End Systole (16 segment ASE model) (99SIEMENS, DISPES16) | |
| | MED16 | Mean ED time (16 segment ASE model) (99SIEMENS, MED16) | |
| | MES16 | Mean ES time (16 segment ASE model) (99SIEMENS, MES16) | |
| | PostContr16 | Post-contraction Time Volume (16 segment ASE model) (99SIEMENS, PostContr16) | |
| | PreContr16 | Pre-contraction Time Volume (16 segment ASE model) (99SIEMENS, PreContr16) | |
| | PostRelax16 | Post-relaxation Time Volume (16 segment ASE model) (99SIEMENS, PostRelax16) | |
| | PreRelax16 | Pre-relaxation Time Volume (16 segment ASE model) (99SIEMENS, PreRelax16) | |
| | SDI16 | Systolic Dyssynchrony Index (16 segment ASE model) (99SIEMENS, SDI16) | |
| | DDI17 | Diastolic Dyssynchrony Index (17 segment ASE model) (99SIEMENS, DDI17) | |
| | DISPED17 | Dispersion End Diastole (17 segment ASE model) (99SIEMENS, DISPED17) | |
| | DISPES17 | Dispersion End Systole (17 segment ASE model) (99SIEMENS, DISPES17) | |
| | MED17 | Mean ED time (17 segment ASE model) (99SIEMENS, MED17) | |
| | MES17 | Mean ES time (17 segment ASE model) (99SIEMENS, MES17) | |
| | PostContr17 | Post-contraction Time Volume (17 segment ASE model) (99SIEMENS, PostContr17) | |
| | PreContr17 | Pre-contraction Time Volume (17 segment ASE model) (99SIEMENS, PreContr17) | |
| | PostRelax17 | Post-relaxation Time Volume (17 segment ASE model) (99SIEMENS, PostRelax17) | |

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|----|------------|------------------------------------------------------------------------------|-----------|
| | PreRelax17 | Pre-relaxation Time Volume (17 segment ASE model) (99SIEMENS, PreRelax17) | |
| | SDI17 | Systolic Dyssynchrony Index (17 segment ASE model) (99SIEMENS, SDI17) | |

7.1.17 Private Section: Right Ventricular Analysis

These measurements appear on the LVA/RVA worksheet in the RVA table.

| HR | Label | Code Meaning (Coding Scheme Designator, Code Value) | Modifiers |
|----|----------------------------|-----------------------------------------------------------|------------------------------------------------------------------|
| | Right Ventricular Analysis | Container: Findings (DCM, 121070) | Finding Site: Right Ventricular Analysis (99SIEMENS, RVAnalysis) |
| | EDV | Right Ventricular End Diastolic Volume (99SIEMENS, RVEDV) | |
| | EF | Right Ventricular Ejection Fraction (99SIEMENS, RVEF) | |
| | ESV | Right Ventricular End Systolic Volume (99SIEMENS, RVESV) | |
| | SV | Stroke Volume (SRT, F-32120) | |

7.1.18 Private Section: Stress Echo

Beginning with the VA12A release, Left Ventricular Analysis can be performed on images acquired during a Stress Echo stage. The Stress Echo LVA results for a single stage are contained within a Private Stress Echo SR section as described below.

TID 5200 Extension

| | NL | Rel with Parent | VT | Concept Name | VM | Req Type | Condition | Value Set Constraint |
|----|----|-----------------|---------|--------------------------|-----|----------|-----------|----------------------|
| 22 | > | CONTAINS | INCLUDE | Private TID: Stress Echo | 1-n | U | | |

7.2 Appendix B: Supported Units in Structured Reports

The following UCUM units, Version 1.4, are used in the structured reports of the ACUSON SC2000 system.

| Label | Code Value | Code Meaning |
|---------------------------------|------------|-------------------------------------|
| bpm | bpm | beats per minute |
| circs/s | circs/s | circles per second |
| cm | cm | centimeters |
| cm/s | cm/s | centimeters per second |
| cm ² | cm2 | square centimeters |
| cm ² /m ² | cm2/m2 | square centimeters per square meter |
| deg | deg | Degrees of angle |
| g | g | grams |
| g/cm | g/cm | grams per centimeter |
| g/cm ² | g/cm2 | grams per square centimeter |
| g/m ² | g/m2 | grams per square meter |

| Label | Code Value | Code Meaning |
|----------------------|------------|------------------------------------|
| l/min | l/min | liters per minute |
| l/min/m ² | l/min/m2 | liters per minute per square meter |
| m | m | meters |
| m/s | m/s | meters per second |
| m/s ² | m/s2 | meters per square second |
| m ² | m2 | square meters |
| ml | ml | milliliters |
| ml/m ² | ml/m2 | milliliters per square meter |
| ml/s | ml/m2 | milliliters per second |
| ml*% | ml*% | milliliters percent |
| mm | mm | millimeters |
| mm ² | mm | square millimeters |
| mmHg | mm[Hg] | millimeters of mercury column |
| mmHg/s | mm[Hg]/s | millimeters of mercury per second |
| msec | ms | milliseconds |
| [unitless] | 1 | no units |
| % | % | percent |
| years | a | years |
| days | d | days |
| weeks | wk | weeks |
| months | mo | months |
