SIEMENS
medical

Are you facing the challenge of building or restructuring a healthcare facility and getting it ready for the future? What is the best way to realize this vision on schedule and within budget? And which partner can truly offer a tailored, one-stop solution? Whether you need expert support with design, implementation, financing, engineering or performance enhancement – we provide you with an integrated solution. You can trust us as a dependable partner in planning, building, and restructuring healthcare facilities. Through our global presence in conjunction with our local partnerships, we provide a high level of additional value. This means that we turn your vision into reality and provide you with a comprehensive and reliable implementation out of one hand.

You have a vision – leave the details to us.

The Global Solutions division of Siemens Medical goes beyond IT and medical technology. Leveraging the experience and know-how of a specialized team, we're focused on helping you achieve measurable results. One project at a time. One goal at a time. We can help you achieve new levels of patient care and efficiency. Our solutions are scalable, and projects range in size and complexity to encompass everything from facilitating reorganization along a cardiovascular service line, to managing your equipment or building an entire hospital from the ground up. These projects can last a few weeks or span several years, but each transforms healthcare – and delivers measurable results. Thanks to more than 125 years of experience and innovation, we enable you to step into the future and realize your fullest potential.

Driving performance. Together we can.

With compliments

Together we build.

You expect a future-proof turnkey solution that simply works. This is where our workflow-driven methodology comes in. We are committed to a unique partnership: Let's take the main steps to success together.

No matter what your individual requirements are ...

Whether consulting, planning or implementation – everything we provide is part of a one-stop solution, supporting the needs and targets of your medical organization. Our global presence and our project management expertise are the foundation for a successful project realization – wherever your facility is located.

Together we succeed.

...you can count on comprehensive partnership – from consulting to implementation.

Tailor-made solutions

“The project went extremely well.”

Gerhard Deutinger, MA,
Administrative Director,
Krems State Hospital, Austria

Radiotherapy Center at Krems State Hospital Krems, Austria

“Without this model, we would not have a radiation therapy center here today.”

Gerhard Deutinger, MA,
Administrative Director,
Krems State Hospital, Austria

Siemens developed the concept, financing, logistics, equipment plan, and services. The project was implemented in a budget-friendly and turnkey manner despite the strict deadlines.

The Siemens-tailored turnkey solution for the new Radiotherapy Center, part of the Krems State Hospital, consisted of planning, architectural design, construction, acquisition and implementation of all medical and nonmedical equipment. The design was based on an optimized, patient-oriented workflow which resulted in a one-stop solution for the customer. The management and coordination by Global Solutions helped to complete the project in 24 months on budget.

Achieving your goals and moving your enterprise forward is a collaborative process.

Together we will.

Together we did.

Tailor-made solutions

“The project went extremely well.”

Gerhard Deutinger, MA,
Administrative Director,
Krems State Hospital, Austria

“All our products, IT solutions, and services must enable our customers to provide the most high-quality, patient-centered healthcare possible.”

Erich Reinhardt, PhD,
Member of the Managing Board of
Siemens AG and CEO and President
of Siemens Medical Solutions

The design was based on an optimized, patient-oriented workflow which resulted in a one-stop solution for the customer. The management and coordination by Global Solutions helped to complete the project in 24 months on budget.

Inkosi Albert Luthuli Central Hospital Durban, South Africa

The project scope included a solution for the planning and implementation of all medical and nonmedical equipment as well as the furnishing of the 846-bed hospital in Durban. During the 15-year contractual period Siemens is responsible for the technical and medical equipment management, life-cycle replacement and coordination of third-party suppliers' equipment and services. Our PACS solution plays a key role in distributing and storing digital images for the 176 ICU beds, 19 operating rooms and 20 medical clinics.

International Neuroscience Institute (INI) Hannover, Germany

The 100-bed International Neuroscience Institute (INI) specializes in interdisciplinary neurosurgery and neurology care and has integrated teaching and research facilities. As the general contractor for the total project, Siemens had overall responsibility for architectural planning, building technology, communication technology, acquisition and implementation of medical equipment.

Hospital da Luz Lisbon, Portugal

Hospital da Luz is an integrated healthcare campus featuring an acute-care hospital, a nursing home, and assisted-living apartments. Siemens experts ensured a workflow-oriented planning and the implementation of the infrastructure, medical technology and information systems. The integrated IT solution provides physicians and nurses with complete information at each point of care, ensuring optimal service for the patients.

Together we did.

On account of certain regional limitations of sales rights and service availability, we cannot guarantee that all products included in this brochure are available through the Siemens sales organization worldwide. Availability and packaging may vary by country and is subject to change without prior notice. Some/All of the features and products described herein may not be available in the United States or Japan.

The information in this document contains general technical descriptions of specifications and options as well as standard and optional features which do not always have to be present in individual cases.

Siemens reserves the right to modify the design, packaging, specifications and options described herein without prior notice. Please contact your local Siemens sales representative for the most current information.
