

Introducing a New Baseline for Your Practice and Your Patients

Biograph mMR for Simultaneous Whole-body MRI and PET

Now available at ABC Imaging Center in Townsville — 000-000-0000

A New Baseline for Your Practice and Your Patients

For the first time, state-of-the-art 3T MRI and cutting-edge molecular imaging are fully integrated in a single-gantry scanner: **Biograph mMR**. ABC Imaging Center brings you this groundbreaking system, giving new meaning to the word “baseline” and helping you to redefine the way you visualize, diagnose, treat and manage disease in oncology, neurology and cardiology.

Your patients will benefit from receiving a lower radiation dose compared to some other imaging exams, having one scan instead of two, and getting results quickly.

Call our center today to see how Biograph mMR can change the way you practice medicine.
