Biograph mMR Open House

**It's the first system that can perform
simultaneous whole-body MRI and PET**

Now, 3T MRI and cutting-edge molecular imaging come together in a single system. Biograph mMR is the world's first simultaneous, whole-body molecular MRI. By acquiring MRI and PET data simultaneously, Biograph mMR captures metabolic and functional processes at the exact same time for a precise and accurate assessment of disease.

Offer your patients the convenience of one exam — and you'll get faster, precise results.

Join us at our OPEN HOUSE to learn more about Biograph mMR
