

Breast Care Excellence with Mammography Imaging **MAMMOMAT® Inspiration**

MLO Projection

Mammography is a fast, simple procedure used to screen for or detect breast cancer.

Indications include:

- Screen for breast cancer in women without symptoms
- Detect breast cancer with symptoms such as a lump or thickening in the breast, nipple discharge, or dimpling of the skin on one area of the breast
- Locate suspicious breast tissue to remove for examination under a microscope

Technical and clinical benefits:

- Lowest possible dose
- Early detection
- Decreased procedure time
- Advanced features for patient comfort
