Biograph **m**CT: PET•CT for a wide range of patients

ABC Imaging Center
123 Main Street
Townsville, ST 12345

123-456-7890
www.abcimagingcenter.com

Biograph mCT was designed to produce precise and accurate high-resolution images with reproducible results. Now you can detect, characterize and monitor the tiniest cancer lesions, advanced heart disease and neurological disorders such as dementia. Biograph mCT can help you increase your diagnostic confidence so you can deliver accurate diagnoses and treatment plans for all your patients.

Biograph mCT uses technology that reduces radiation exposure. Radiation dose reduction is particularly important when imaging children and patients with frequent follow-up exams.

Biograph mCT can accommodate patients up to 500 lb with a 78 cm open bore and a wide table. And all patients can benefit from the system's fast scan times and short tunnel, which can be more comfortable and may feel less claustrophobic.

Thank you for considering the Biograph mCT and our imaging center for your next PET•CT referral.
