

Biograph mCT offers an accurate, fast and comfortable PET-CT exam

We now offer PET-CT exams with the Biograph mCT system from Siemens.

Biograph mCT offers many benefits to our patients and their physicians.

Accuracy: Biograph mCT was designed to produce precise and accurate high-resolution images with reproducible results that are consistent over time — so it can help to increase your physician's diagnostic confidence to deliver an accurate diagnosis and treatment plan for you or your family members.

Speed: Biograph mCT has the capability to perform fast whole-body PET scans.

Comfort: Its advanced design and technology helps to make Biograph mCT as patient-friendly as possible. It features a wide opening and table and a short tunnel, so patients even up to 500 lb can be comfortable and may feel less claustrophobic.
