# Biograph mCT offers PET•CT in one accurate, fast, comfortable exam

Helping physicians improve diagnostic confidence

[www.usa.siemens.com/mCT](http://www.usa.siemens.com/mCT)

Biograph mCT is a PET•CT imaging system designed to produce accurate high-resolution images with reproducible results for oncology, cardiology and neurology. You can feel confident physicians will receive the information they need to help make a more informed diagnosis and create an effective treatment plan.

A fast scan means you'll spend less time in the exam, and advanced dose-reduction technologies ensure less radiation

exposure in comparison to other systems available on the market. Because of system improvements such as a wider opening and shorter tunnel, you may feel more comfortable and less claustrophobic.

Ask your physician how Biograph mCT can help improve the diagnosis and treatment of the most challenging diseases — in one fast exam.
