Accurate, fast, comfortable PET•CT exams for bariatric patients

Biograph mCT offers excellent care for patients up to 500 lb

With a large opening and a wide bed, Biograph mCT makes it possible for patients up to 500 lb to receive high-quality PET•CT imaging in one fast exam — so their physicians have the best information possible for making diagnostic and treatment decisions.

A fast scan means you'll spend less time in the exam, and advanced dose-reduction technologies ensure less radiation exposure in comparison to other systems available on the

market. Because of system improvements such as a wider opening and shorter tunnel, you may feel more comfortable and less claustrophobic.

The result? Biograph mCT offers physicians the information they need to help improve their diagnostic confidence and the ability to create well-informed treatment plans for their patients. If you need a PET•CT scan, ask your physician about Biograph mCT today.
