

A Siemens Artis zee biplane system is shown in a clinical setting. The system consists of two large, white, C-arm-like gantries that can rotate around a patient table. The patient table is covered with a blue pad and has various controls and a control panel on its side. A large monitor is mounted on a stand, displaying a medical image of a patient's head and neck, with technical data and a timeline visible on the right side of the screen. The Siemens logo is visible on the top of the gantries.
