The Optimize Mammography Imaging Training Program

Maximize Your Mammography Quality & Workflow

A Unique Training Program...

To help you meet your facility's challenges by **enhancing** your digital mammography efficiency.

A woman with blonde hair tied back, wearing a light pink short-sleeved polo shirt, is smiling and looking towards the camera. She is standing in front of a blurred background that appears to be a medical or laboratory setting, with a piece of equipment visible on the left.

The fact is:

All mammography technologists
require **ongoing** training.

With **Optimize Mammography Imaging Training**, your staff will learn how to:

- **Optimize** the use of mAs and kVs for better image quality.
- **Manipulate** images if noise occurs.
- **Analyze** glandular dose to adjust technique.

And with staff trained in **mammography best practices**, your department can:

- Provide better, **high quality** images.
- Work **more** efficiently.
- **Improve** consistency across technologists and shifts.

Why this training program?

Optimize **Mammography Imaging Training** is broken down into **three** sections:

Virtual Instructor-led Training

or

On-Site Workshop

Each section delivered in a **2-hour online module**.
Accommodates staff schedules
and facility budgets.

All 3 sections in **one 8-hour training session** at your
facility. Didactic and hands-on
training experience.

Make it work for you.

It's your system—make it work for you. Learn how to use it more effectively, efficiently, and safely with **Optimize Mammography Imaging Training.**

Get Started Today!

Learn more about this program and how Siemens can help you unleash the potential of your mammography imaging investment.
