

High-Quality Imaging at Low Dose

Name of Your Institution

is pleased to announce we have expanded our diagnostic imaging capabilities with the recent installation of the new **Siemens SOMATOM® Scope** CT scanner.

Our Scanner Offers:

Patient-Friendly Design

- Increased patient safety using low dose techniques.
- Modern system design allows for excellent patient access.
- Highly detailed imaging with very short breath-hold requirement using multislice CT.
- Ability to accommodate patients up to 440 lbs
- Short scan time

Dose Reduction Features

- Innovative technology automates customized dose for each patient based on size, weight, and anatomy, providing high-quality images at a minimized dose.
- Industry's leading detector material provides exceptional image detail at reduced dose.

Exceptional Clinical Benefits

- Fast, minimally invasive vasculature evaluation of the head, neck, thorax, abdomen, pelvis, and extremities using CT Angiography.
- Cutting-edge technology delivers high-quality images, allowing visualization of small details.
