

What you need to know for your PET/CT exam.

At <<facility name>>, we take pride in providing our patients with the highest levels of cancer care.

That's why we use a Siemens Biograph Horizon™ PET/CT system, which offers a high level of image quality. With it, we can provide your doctors with the type of high-quality imaging they need to find even the smallest cancer cells earlier and be more confident in their diagnoses. As a result, they can provide you with a more personalized—and potentially more definitive—treatment strategy.

Your PET/CT imaging appointment is on _____.

Your PET/CT Exam Checklist

- ✓ Remove all metal objects, such as a belt or jewelry.
- ✓ Bring images from previous examination (including X-rays) with you.
- ✓ Discuss with your doctor how many hours you will need to fast before the examination.
- ✓ Let your physician know if you have had previous allergic reactions.

If you have any additional questions or concerns before your exam, please contact us at <<facility phone number>>.
