

Identifying disease faster
—and for more patients
—just got easier

See how at
our Open
House.

You're invited to our open house on <<month day, year>> to see first-hand how our new Siemens Biograph Horizon™ PET/CT system can help you care for your patients.

With the Biograph Horizon PET/CT system, we can:

- **Catch smaller lesions earlier** with high image quality and outstanding resolution, which supports early identification of distant metastasis.
- **Limit dose levels** while maintaining high image quality to support patient safety.
- Support your efforts to determine treatment efficacy and, as a result, **limit side effects** caused by ineffective therapies.
- **Improve patient outcomes, reduce procedure costs, and minimize reliability risk** by incorporating PET/CT in evaluation of cancer.
- **Obtain consistent image quality** with standardized exams and automatic daily QC.

Identifying disease faster—and for more patients—can now be easier thanks to the high image quality offered at <<facility name>>. Visit our open house to see the difference the Biograph Horizon can make. RSVP to <<name/email>> by <<date>>.
