

# Cancer care. As individual as you are.

When it comes to cancer care, we believe your treatment should be as individual as you are.

*That's why we have installed the new SOMATOM® Confidence RT Pro system.*

This imaging system can provide the high-quality visuals doctors need to more effectively proceed with radiation therapy planning. As a result, you may receive a more precise treatment strategy.

If you or a loved one needs cancer care, know that we are dedicated to providing the best possible treatment.
