

RSNA 2017

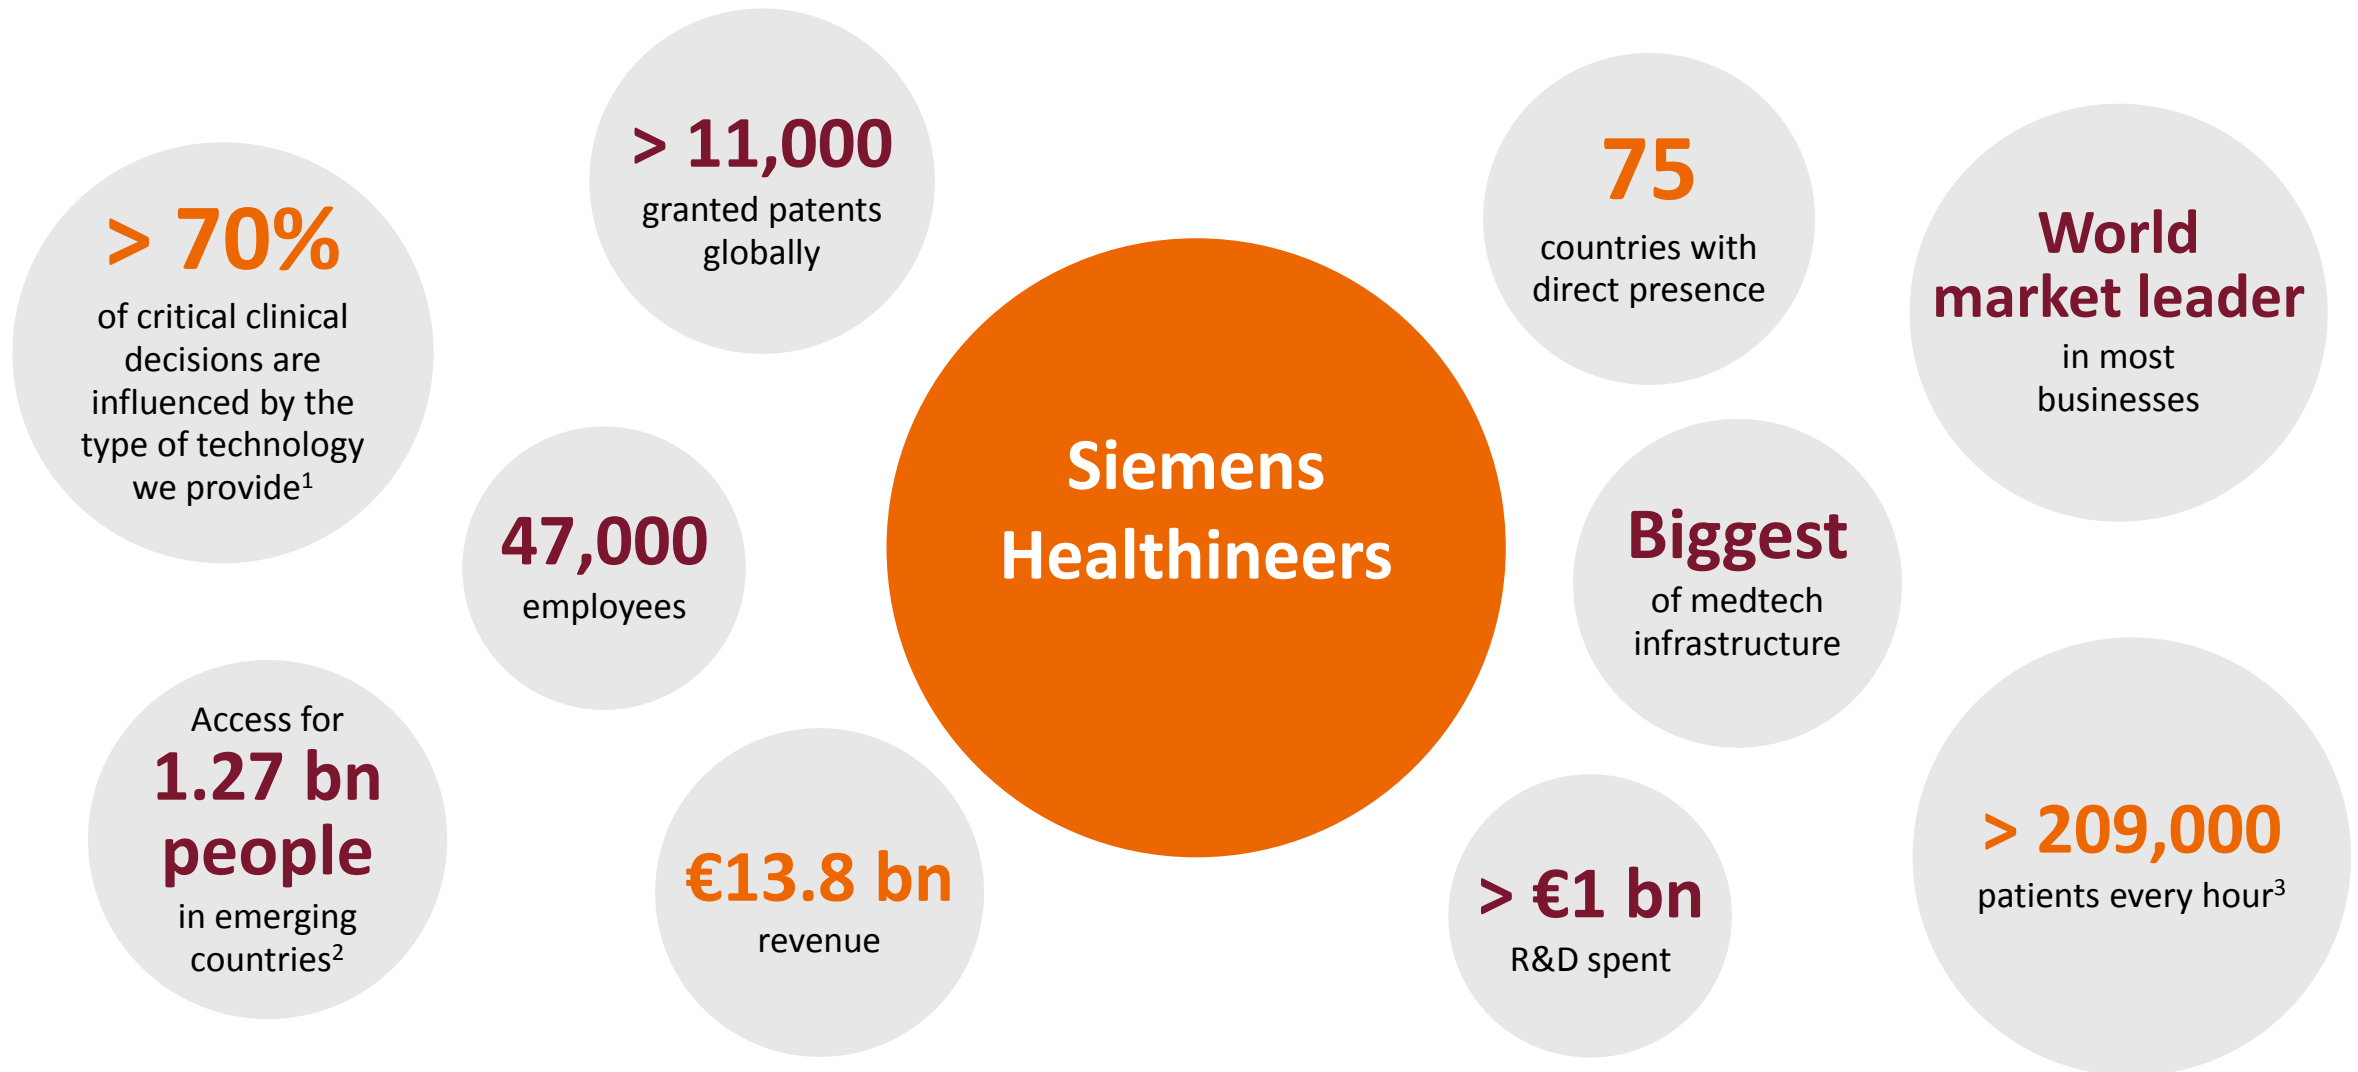

# Welcome to our Media Breakfast

Walter Maerzendorfer  
November 2017

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as “expect,” “look forward to,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project” or words of similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens’ management, of which many are beyond Siemens’ control. These are subject to a number of risks, uncertainties and factors, including, but not limited to those described in disclosures, in particular in the chapter Risks in the Annual Report. Should one or more of these risks or uncertainties materialize, or should underlying expectations not occur or assumptions prove incorrect, actual results, performance or achievements of Siemens may (negatively or positively) vary materially from those described explicitly or implicitly in the relevant forward-looking statement. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated. Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

# Who we are

1) AdvaMedDX, "A Policy Primer on Diagnostics", June 2011, page 3

1) The FAST 3D Camera is pending 510(k) clearance, and is not yet commercially available in the United States.

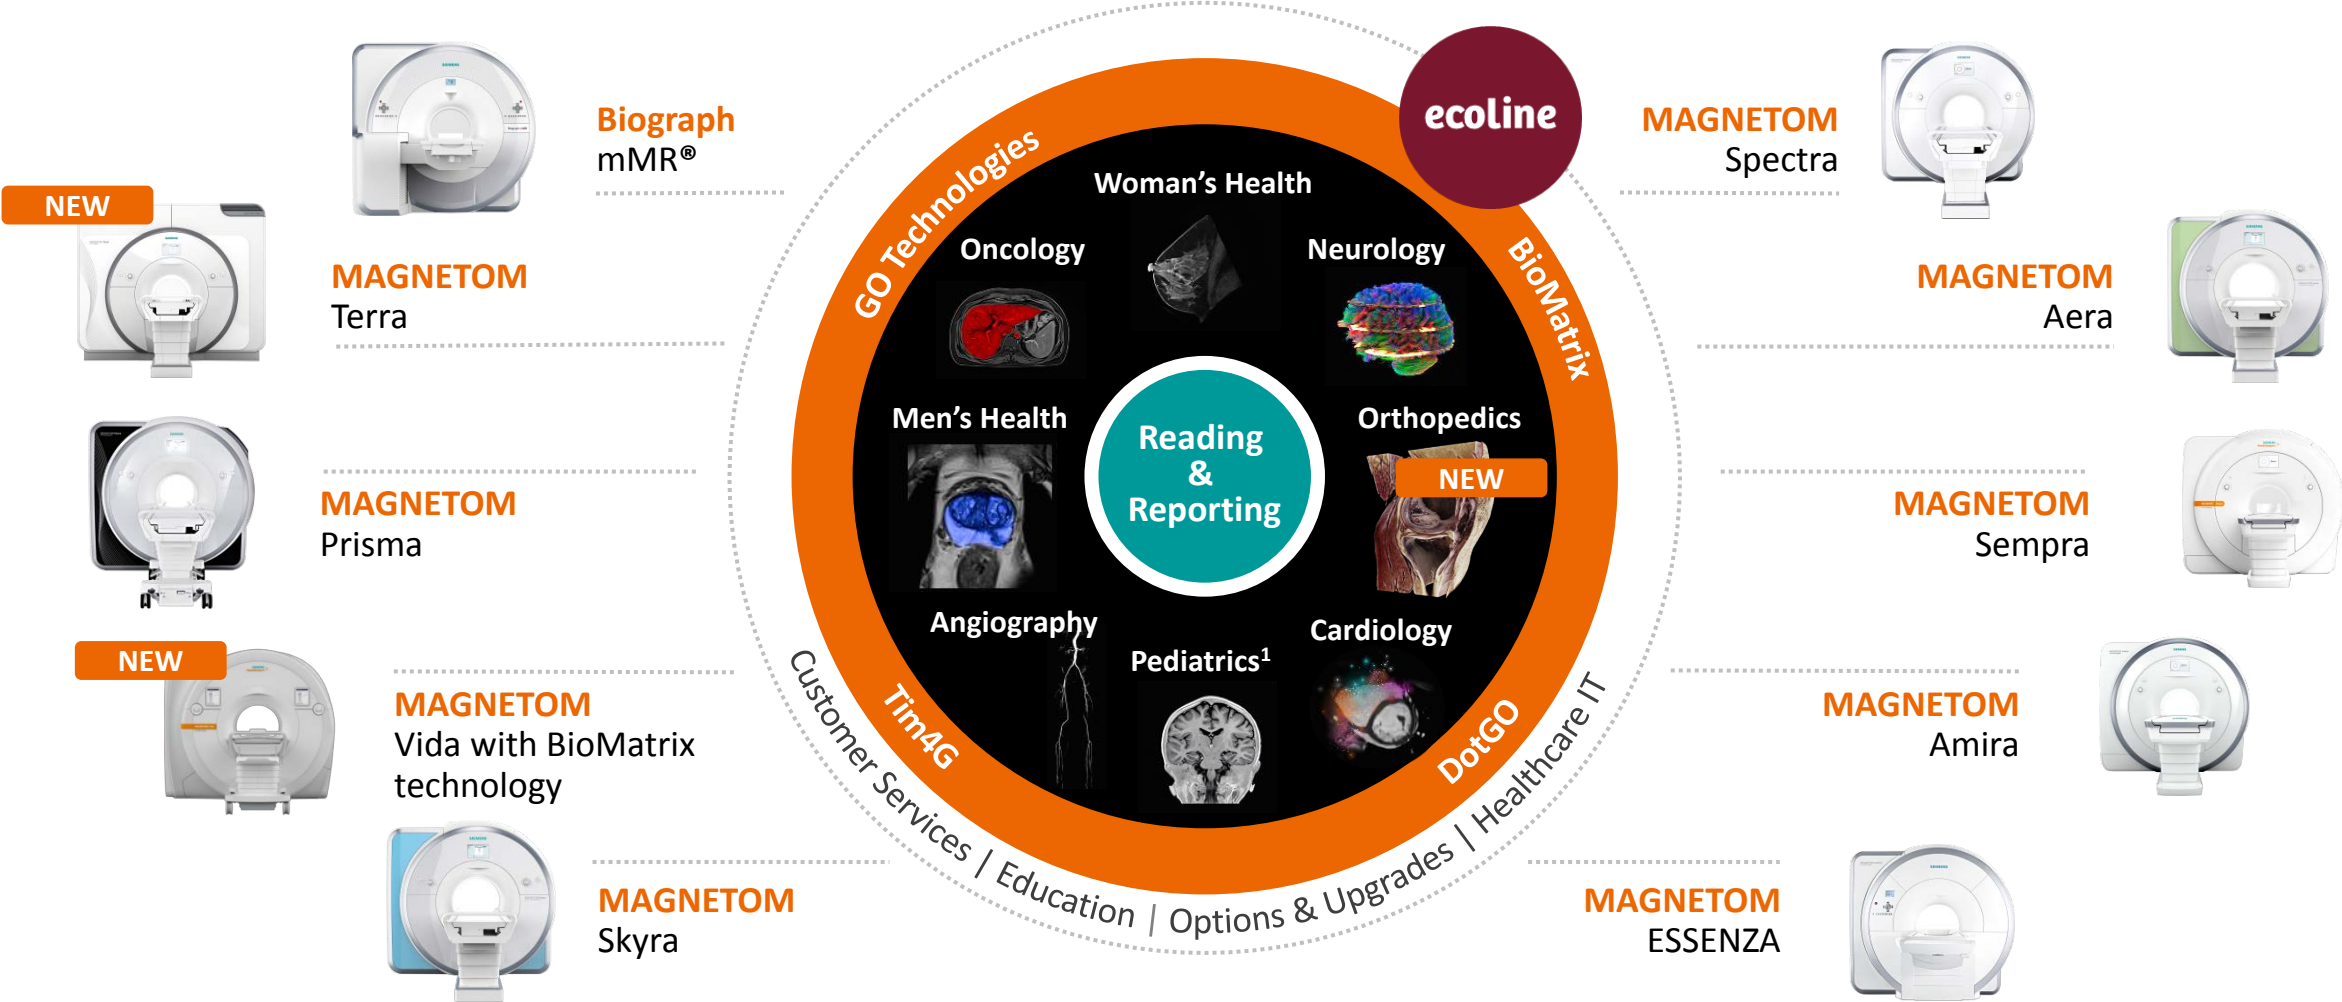

2) This product is pending 510(k) clearance, and is not yet commercially available in the United States.

3) Biograph Vision and its features and applications are currently under development and are not for sale in the U.S. Their future availability cannot be guaranteed. They do not yet fulfill all the essential requirements according to the European Medical Device Directive (93/42/EEC) and its national implementations and are not yet commercially available in the European Union.

4) Cios Spin is currently under development; is not for sale in the U.S. Its future availability cannot be guaranteed.

# A strong MR portfolio

## Innovating Magnetic Resonance

1) MR scanning has not been established as safe for imaging fetuses and infants less than two years of age. The responsible physician must evaluate the benefits of the MR examination compared to those of other imaging procedures.

# A strong MI portfolio

## Innovating Molecular Imaging

They do not yet fulfill all the essential requirements according to the European Medical Device Directive (93/42/EEC) and its national implementations and are not yet commercially available in the European Union.

2) These products are not commercially available in all countries. Due to regulatory reasons, its future availability cannot be guaranteed. Please contact your local Siemens organization for further details.

# A strong XP portfolio

## Innovating general X-ray

### Twin Robotic X-ray

Multitom Rax

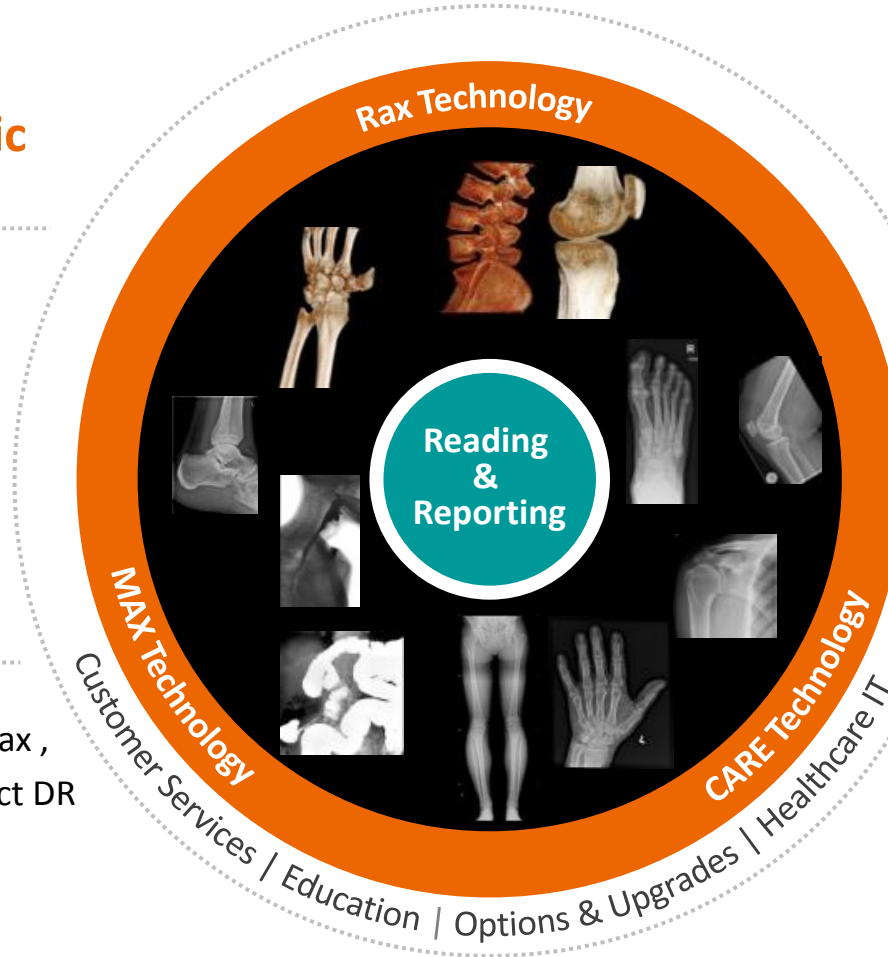

### Radiography

Ysio Max,

Multix Fusion Max,

Multix Select DR

### Mobile X-ray

Mobilett Mira Max,  
Mobilett XP Series,  
Polymobil Plus,  
Multimobil 10

### Fluoroscopy

Luminos Agile Max,  
Luminos dRF Max,  
Luminos Select,  
Luminos RF Classic

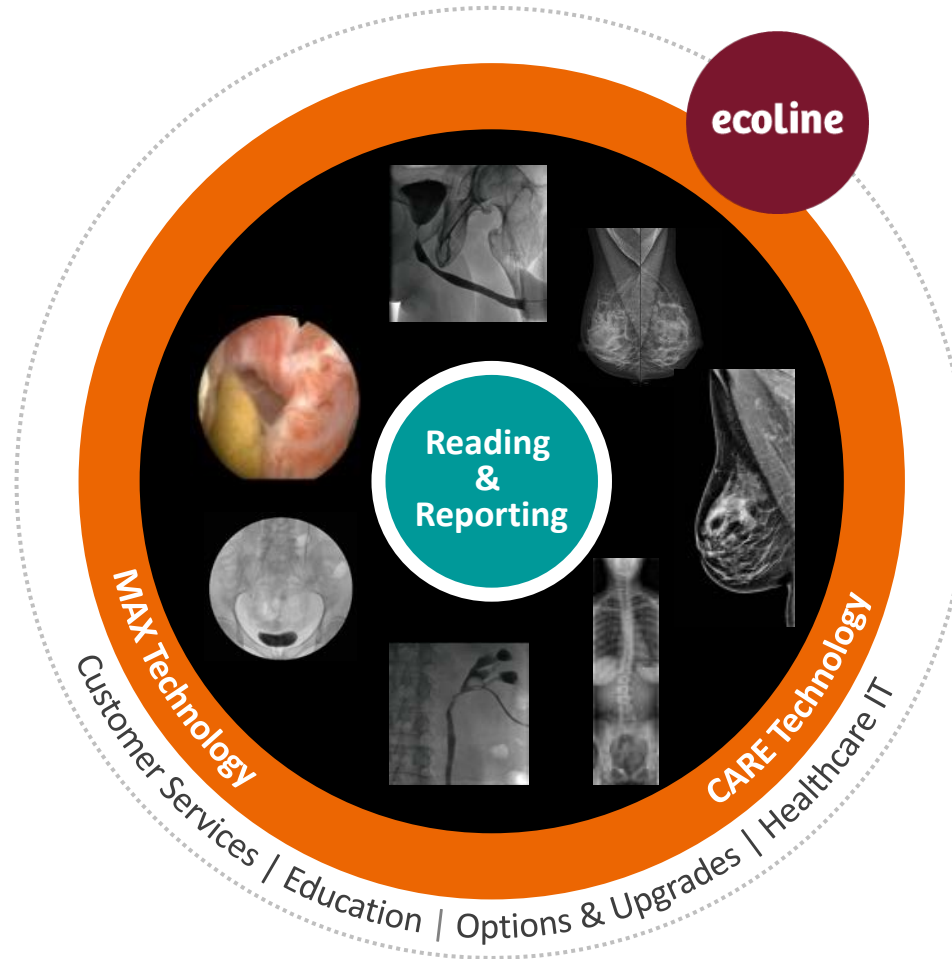

# A strong portfolio

## Innovating Urology & Women's Health

### Urology

Urooskop Omnia Max,  
Modularis series

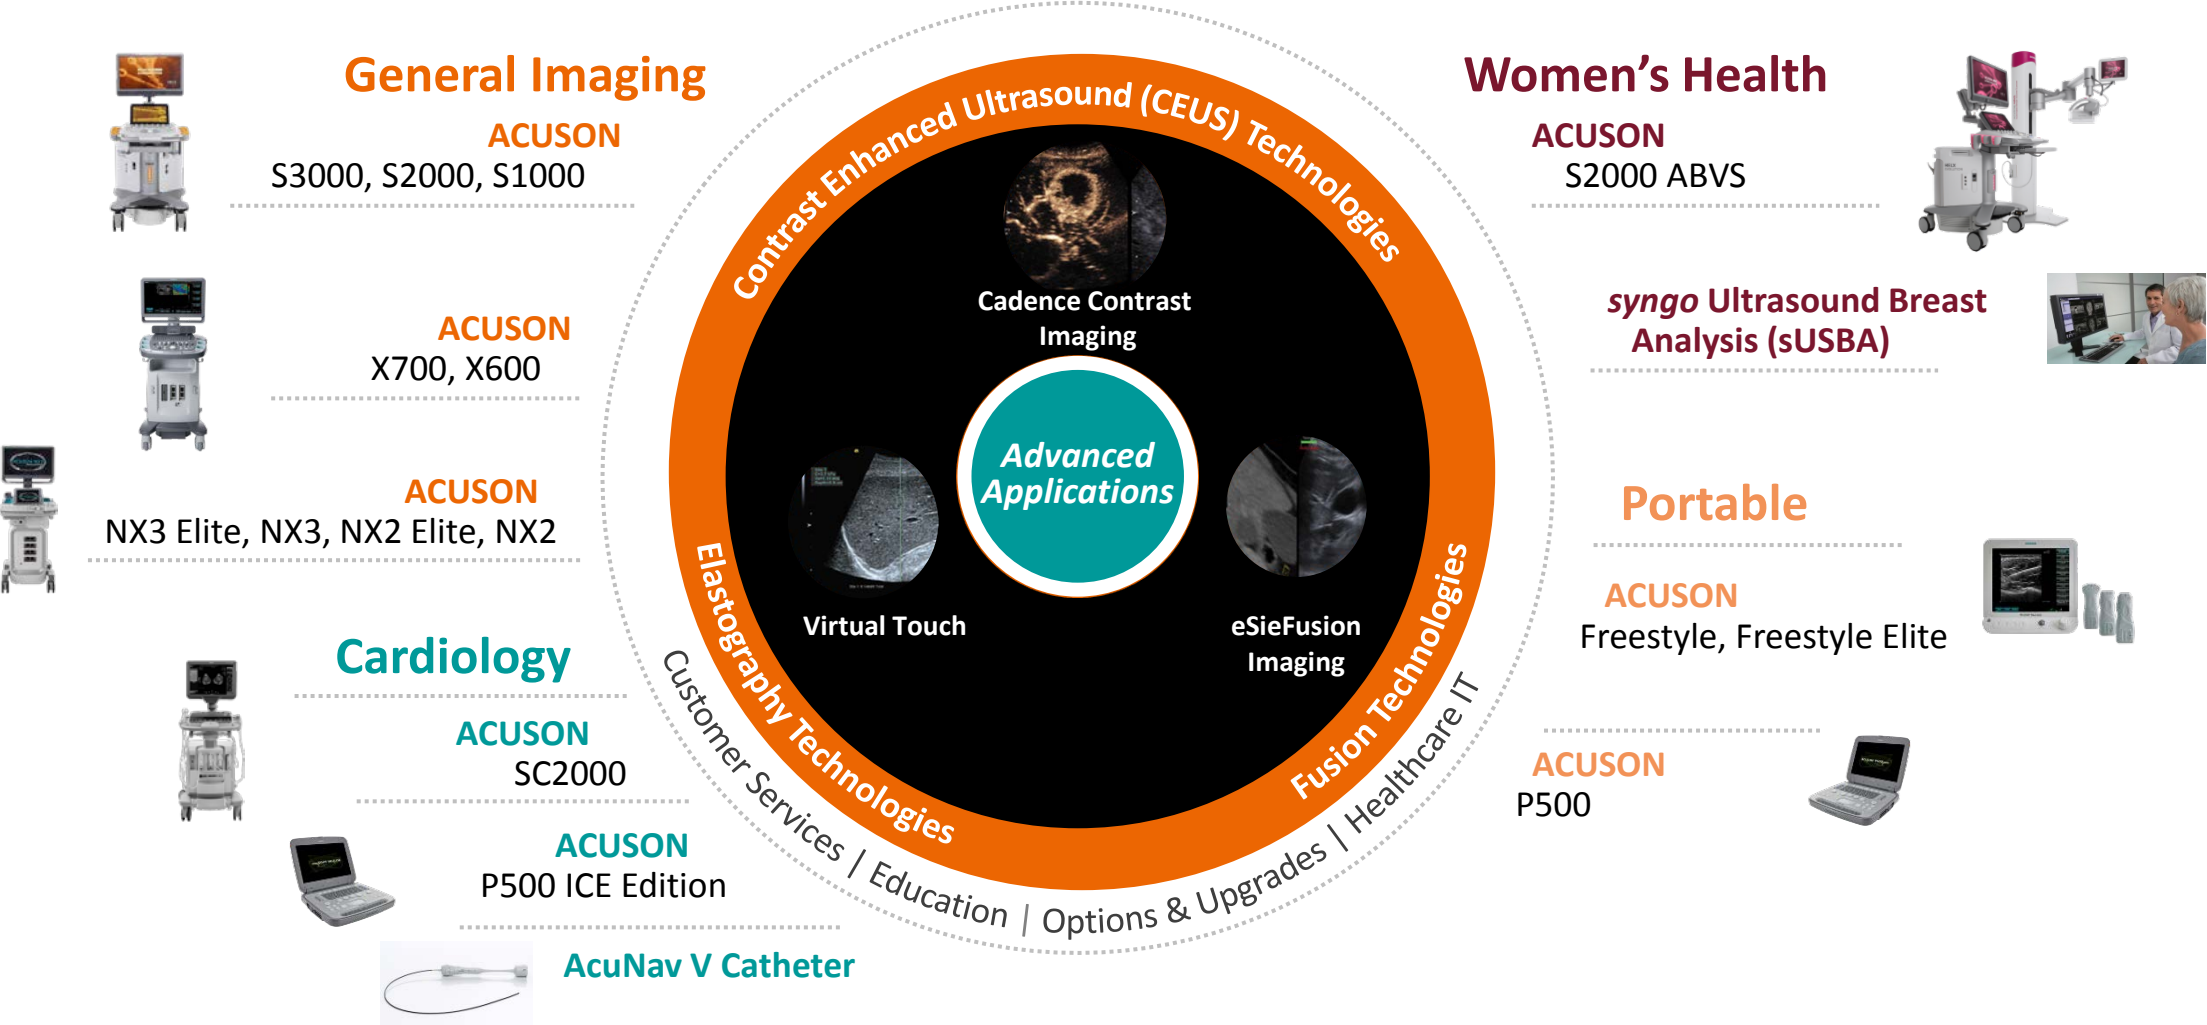

### Women's Health

Mammomat Revelation<sup>1</sup>,  
Mammomat Inspiration,  
Mammomat Fusion,  
Mammomat Select

1) This product is pending 510(k) clearance, and is not yet commercially available in the United States.

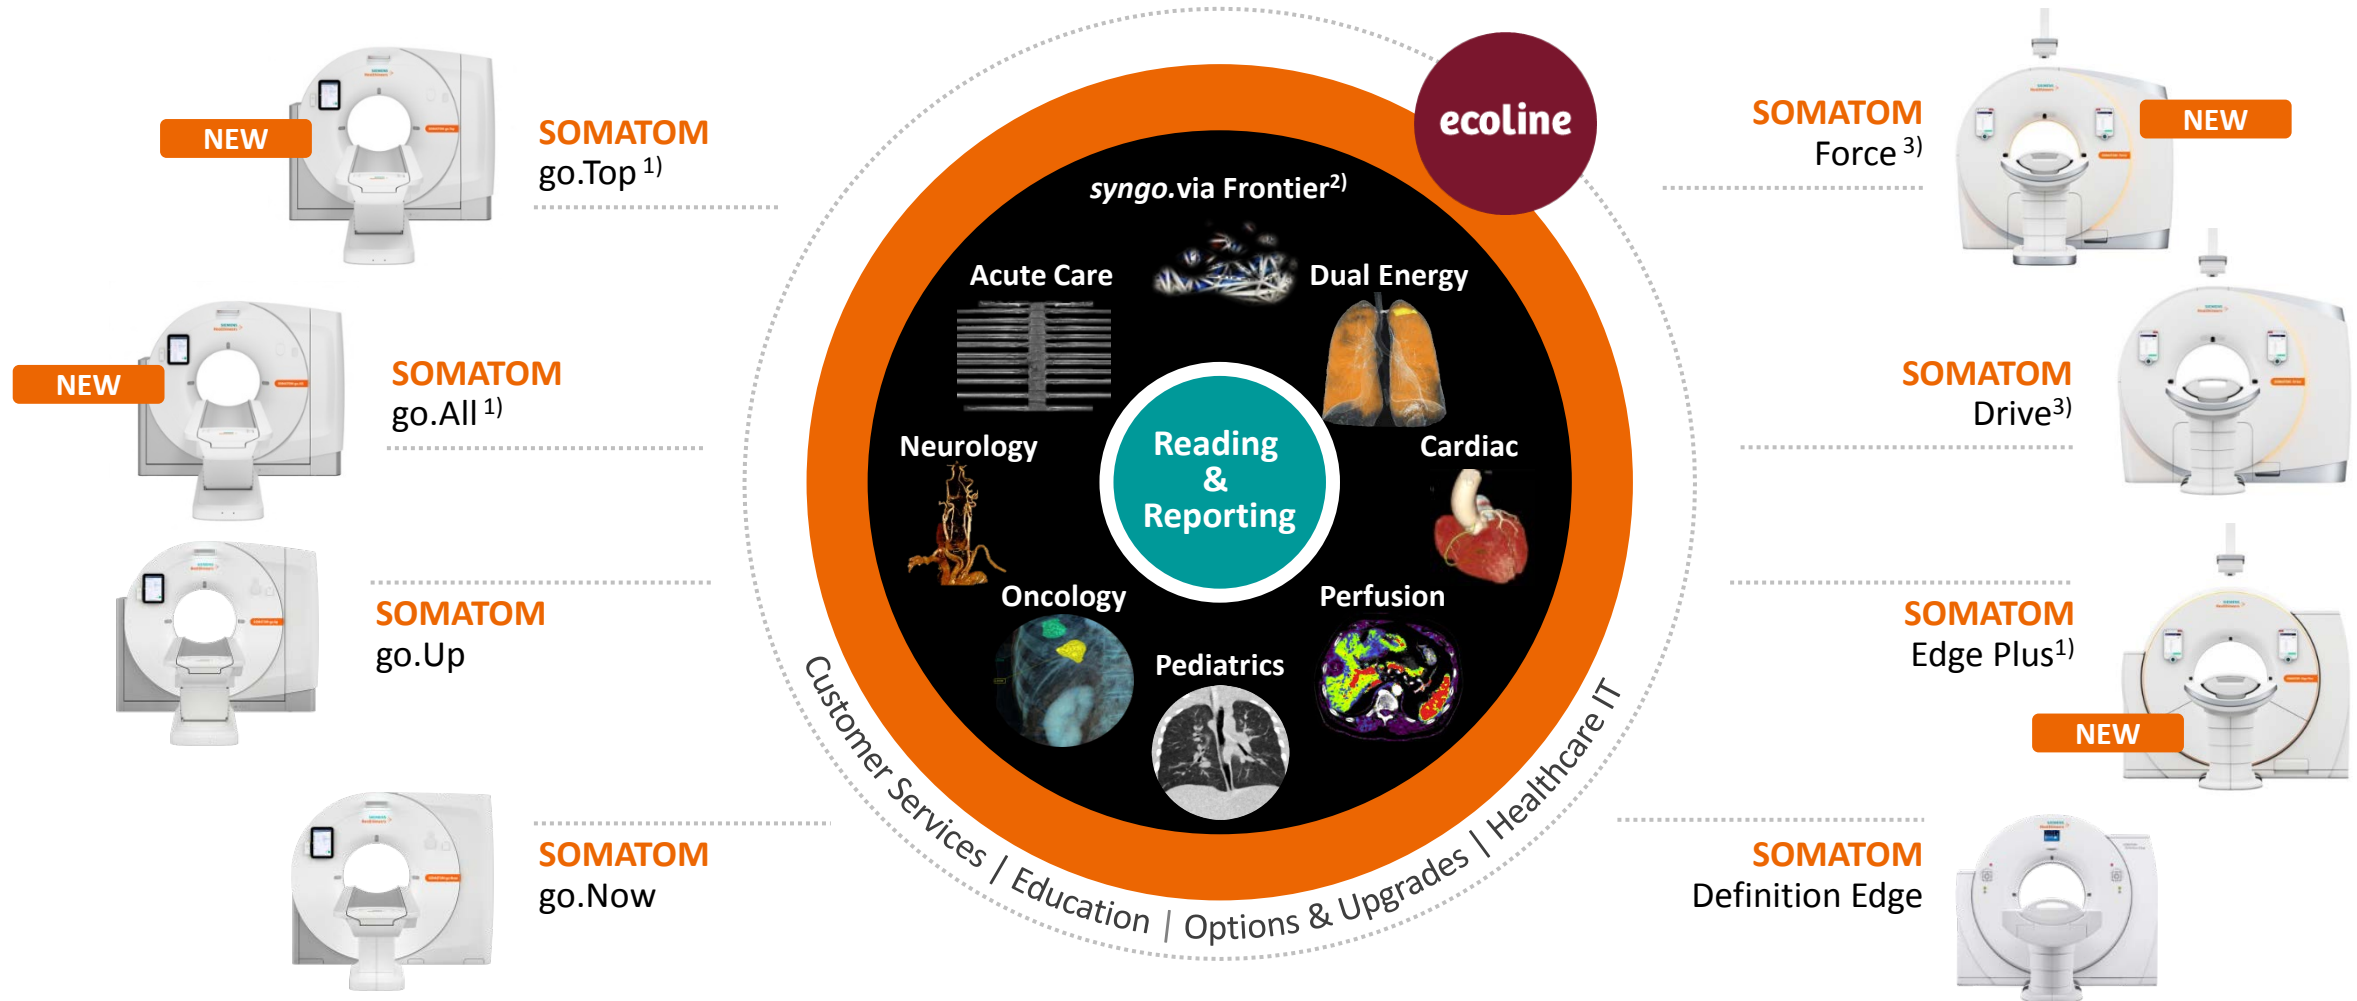

# A strong US portfolio

## Innovating Ultrasound

# A strong CT portfolio

## Innovating Computer Tomography

1) This product is pending 510(k) clearance, and is not yet commercially available in the United States.

2) For research use only. Not for clinical use.

3) The FAST 3D Camera is pending 510(k) clearance, and is not yet commercially available in the United States.

# Patient-centric technologies of SOMATOM go.platform now available for the full clinical spectrum

**SOMATOM go.Now**

**SOMATOM go.Up**

**SOMATOM go.All<sup>1)</sup>**

**SOMATOM go.Top<sup>1)</sup>**

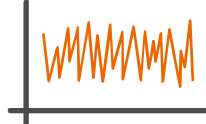

1) This product is pending 510(k) clearance, and is not yet commercially available in the United States.

# Patient positioning is significantly influencing dose and image quality

In **95%** of all patients, isocentering is incorrect  
About **2.6 cm** mean deviation

**3 cm**  $\triangleq$

**+ 18%** peripheral dose   
**+ 6%** noise 

# FAST Integrated Workflow will literally change views in patient positioning

## Introducing the first FAST Integrated Workflow with FAST 3D Camera<sup>1)</sup>

- ✓ Standardized positioning
- ✓ Isocentric positioning
- ✓ Correct body region recognition
- ✓ Correct scan direction setup

1) The FAST 3D Camera is pending 510(k) clearance, and is not yet commercially available in the United States.

# FAST Integrated Workflow and FAST 3D Camera<sup>1)</sup> introduced to our premium systems, both Single and Dual Source

**SOMATOM Edge Plus<sup>2)</sup>**

**SOMATOM Drive**

**SOMATOM Force**

1) The FAST 3D Camera is pending 510(k) clearance, and is not yet commercially available in the United States.

2) This product is pending 510(k) clearance, and is not yet commercially available in the United States.

# Contrast media enhanced 100 kV imaging at BMI 51 for whole-body evaluation with SOMATOM Edge Plus<sup>1)</sup>
