Design and Construction Services

Our Design and Construction Services (DCS) delivers customized construction solutions regardless of the complexity of the building program. We can help relieve your concerns about construction schedules or problems by providing a single point of contact who understands your patient-care priorities.

DCS specializes in medical facility construction and helps you get your imaging equipment into service quickly, smoothly, and effectively.

From room modifications to department planning and renovation, modular construction, and/or construction of an entirely new facility, you can outsource responsibility to our DCS experts from start to finish.

For new imaging equipment installation, DCS provides you with a single-source contact who is experienced in your project type.

We offer

Room
Modifications

Planning

Renovation

Construction of a
New Facility

Modular
Construction

Modular Construction

Modular buildings are cost effective and provide you with the flexibility to add new space to your hospital. Modular construction may be your best option for solving critical space issues for new imaging equipment. Among other benefits, it allows for an expedited construction schedule so you can get your imaging equipment from Siemens Healthineers up and running faster—and you can begin seeing patients sooner.

Together with Advanced Medical Space, we offer a high-quality building solution by using an accelerated modular construction process, reducing your construction timeline and costs—and helping you generate faster ROI with your new imaging equipment from Siemens Healthineers.

At Siemens Healthineers, our purpose is to enable healthcare providers to increase value by empowering them on their journey towards expanding precision medicine, transforming care delivery, and improving patient experience, all enabled by digitalizing healthcare.

An estimated 5 million patients globally benefit every day from our innovative technologies and services in the areas of diagnostic and therapeutic imaging, laboratory diagnostics and molecular medicine, as well as digital health and enterprise services.

We are a leading medical technology company with over 170 years of experience and 18,000 patents globally. With more than 48,000 dedicated colleagues in 75 countries, we will continue to innovate and shape the future of healthcare.

The outcomes and statements provided by customers of Siemens Healthineers are unique to each customer's setting. Since there is no "typical" hospital and many variables exist (e.g., hospital size, case mix, and level of service/technology adoption), there can be no guarantee that others will achieve the same results.

On account of certain regional limitations of sales rights and service availability, we cannot guarantee that all products included in this brochure are available through the Siemens Healthineers sales organization worldwide. Availability and packaging may vary by country and is subject to change without prior notice. Some/All of the features and products described herein may not be available in the United States.

The information in this document contains general technical descriptions of specifications and options as well as standard and optional features, which do not always have to be present in individual cases.

Siemens Healthineers reserves the right to modify the design, packaging, specifications, and options described herein without prior notice. For the most current information, please contact your local sales representative from Siemens Healthineers.

Note: Any technical data contained in this document may vary within defined tolerances. Original images always lose a certain amount of detail when reproduced.
