

Stand up to downtime with Guardian

System downtime impacts more than just revenue. Patient safeguards, scheduled exams, and staff productivity all stop when your equipment does.

Guardian Program™ fights unplanned downtime with around the clock monitoring and rapid problem resolution. Protect what matters with Guardian—live, real-time, remote monitoring of your Siemens Healthineers medical equipment.

siemens-healthineers.us/guardian

83% of organizations surveyed said Guardian provided them with peace of mind knowing their systems were being monitored in real-time

Source: TechValidate. TVID: F42-5C6-707

Customers who increased their systems' uptime with Guardian experienced...

5 more working days per annum*

\$83,300 in additional revenue*

Smooth workflow/less downtime

Increased patient satisfaction

Continuous repair effort

Accelerated speed-to-response

Confidence and peace-of-mind

*Based on five interventional (angiography and Interventional X-ray System) exams per day (\$3,260 per exam) and 250 working days annum.

Protect your peace of mind with the knowledge that your most valuable systems are being closely watched for even the slightest performance deviation. If issues are discovered, they're resolved fast—via remote repairs or onsite visits—often before you even realize a problem exists.

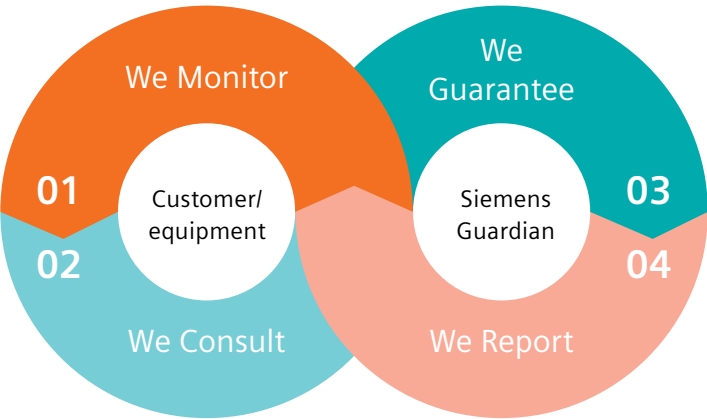

Experience the power of real-time monitoring

1 Real-time Smart Remote Services Preventative Event Monitoring

Using a secure remote connection and the latest software, trained engineers, supported by artificial intelligence and automatic ticketing, monitor your system, anticipating any malfunction, and optimizing performance.

2 Expert Decisions and Proactive Response

In case of malfunction, we'll repair the problem remotely or send an engineer to your site – often resolving a problem long before you were aware of it.

3 Continuous Effort Guarantee

Regardless of your challenge, we guarantee our engineers will work on the issue tirelessly so that it's quickly resolved – simple as that.

4 Evaluate Performance

We provide easy-to-understand reports for one-stop access to system maintenance and performance analytics.

Customizable plans to fit every need

- Guardian Premium and Select for imaging & laboratory diagnostics equipment protects critical investments with real-time monitoring and rapid problem resolution
- Guardian with TubeGuard, available for select Computed Tomography (CT) systems, additionally predicts tube malfunction with continuous real-time monitoring
- Guardian with ImageGuard, for select SPECT and SPECT/CT systems, also optimizes uptime with proactive diagnostics of the entire system, including detectors
