Patients have different shapes, sizes, and medical conditions—all of which create challenges in MRI.

Our new MAGNETOM® Vida 3T wide bore scanner, with BioMatrix technology, automatically adjusts to the unique needs of each patient.

From head-to-toe, the technology provides high quality 3T images for both routine clinical exams and the most advanced cases.

With the MAGNETOM Vida and BioMatrix, we can provide consistent MRI exams—with greater speed and comfort—so that you can accurately diagnose and treat your patients.
