

**Comfortable scans
for patients. Excellent
image quality for you.**

**See for
yourself at
our Open
House.**

You're invited to our open house on <<month day, year>> to see first-hand how our new state-of-the-art Siemens Healthineers Biograph Vision™ PET/CT can help you care for your patients.

<<Healthcare Facility>>
<<Address Street Address>>
<<Address #2 Street Address>>
<<City>>, <<State>> <<ZipCode>>

With the Biograph Vision PET/CT system, we can:

- **Catch small lesions** with high image quality and outstanding resolution, to support early identification of distant metastasis.
- **Limit radiation exposure** while maintaining high image quality to support patient safety.
- **Enhance patient comfort** on a wide table that accommodates patients up to 500 lbs, a wide opening, and a short tunnel length.
- Support your efforts to determine treatment efficacy and, as a result, **limit side effects** caused by ineffective therapies.
- **Improve patient outcomes, reduce procedure costs** by incorporating PET/CT in evaluation of cancer.
- **Obtain consistent image quality** and quantitatively accurate assessment of disease with standardized exams and automatic daily QC.

You can identify disease quickly and easily without sacrificing patient comfort thanks to the high image quality, quantitative accuracy, and low radiation dose scanning offered at <<facility name>>. Visit our open house to see the difference. RSVP to <<name/email>> by <<date>>.
