You're invited to our open house on <<month day, year>> to see first-hand how our new Siemens Healthineers Biograph Vision™ PET/CT system can help your patients.

With the Biograph Vision PET/CT system, we can:

- **Catch smaller lesions earlier** with high image quality and outstanding resolution, which supports early identification of distant metastasis.
- **Limit dose levels** while maintaining high image quality and increased scan speeds to support patient safety.
- Support your efforts to determine treatment efficacy and, as a result, **limit side effects** caused by ineffective therapies.
- **Improve patient outcomes, reduce procedure costs, and minimize reliability risk** by incorporating PET/CT in evaluation of cancer.
- **Obtain consistent image quality** with standardized exams and automatic daily QC.

Identifying cancer faster—and for more patients—can now be easier thanks to the high image quality we can provide. See how the Biograph Vision can help your patients.
