

# Comfortable scans for patients. Excellent image quality for you.

Our new  
**Biograph Vision  
PET/CT** offers high  
image quality for  
more cases.

**BIOGRAPH Vision**

## How can this PET/CT system help you care for your patients?

### With the Biograph Vision™ PET/CT system, we can:

- **Catch small lesions** with high image quality and outstanding resolution, which supports early identification of distant metastasis.
- **Limit dose levels** while maintaining high image quality to support patient safety.
- **Enhance patient comfort** on a wide table that accommodates patients up to 500 lbs, a wide opening, and a shorter tunnel length.
- Support your efforts to determine treatment efficacy and, as a result, **limit side effects** caused by ineffective therapies.
- **Improve patient outcomes, reduce procedure costs, and minimize reliability risk** by incorporating PET/CT in evaluation of cancer.
- **Obtain consistent image quality** with standardized exams and automatic daily QC.

You can identify disease quickly and easily without sacrificing patient comfort thanks to the high image quality offered at <<facility name>>. To learn more about our new PET/CT system or to schedule an exam, visit <<facility web address>> or call <<facility phone number>>.
