ARTIS icono Biplane

Diagnosing and treating neurological diseases require fast and efficient care

Stroke • Arteriovenous Malformations • Aneurysms

At *Siemens Healthineers* we strive to deliver the best care possible for our patients. *We are proud to introduce our newest technology.*

ARTIS icono Biplane

A system to exceed the standards of Neurointerventions.

As minimally invasive procedures become more routine, they can also be more complex.

The right technology can make a big difference in how we care for our patients.

86 billion

A typical human brain has 86 billion neurons.
Let's fight for every one.

The ARTIS icono allows us to:

- Have clearer visualization of the entire brain
- Diagnose and treat with ease and confidence
- Lower radiation exposure to support patient safety

Clarity and detail like never before
