

Advance MAX SMART

Maximize efficiency in the digital era –
the smart way

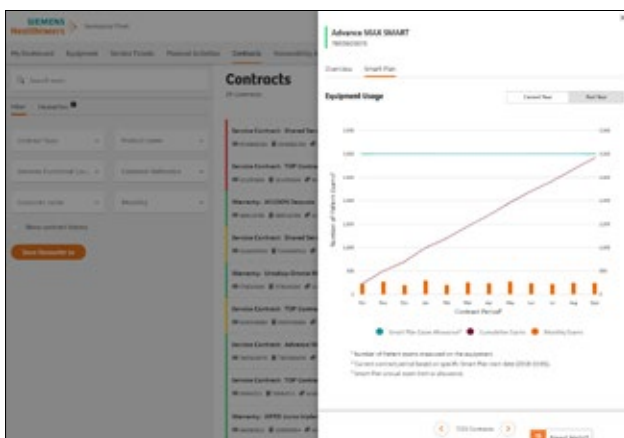

Healthcare providers need to stay financially flexible but secure, even in business ramp-up or expansion phases and with volatile case mixes. On the other hand, diagnostic quality and cybersecurity standards can't be compromised – inclusive of equipment that serves as a backup or is used for specialty exams only. Variations in throughput due to changing patient volumes mean unpredictable revenues and cashflow – which is when providers look for partners to share benefits and risks.

Advance MAX SMART is the service agreement from Siemens Healthineers for maximized efficiency and excellent clinical outcome in the digital era. It comprises a wealth of innovative and intelligent services that keep you cutting-edge, connected, and competitive. At their core are AdvanceNow, our long-term update & upgrade service that keeps imaging equipment cybersecure and highly efficient throughout its entire serviceable life, as well as SmartUse, which provides a financing model based on your throughput.

This helps you to stay at the forefront of digital advancements and to match your revenues and costs in a smart way. At the same time, your fundamental regulatory, quality, and financial needs are covered through our Planned and Corrective Maintenance services as well as our OEM Service Parts.

Advance MAX SMART covers the service needs for medical equipment in a digital era, enabling you to actively shape your digital future and manage your financials according to your equipment use.

- **Being cutting-edge is our joint Aspiration** – deliver precision medicine effectively with innovations that keep your equipment secure, future-proof, and compliant with regulatory guidelines
- **Risk-benefit sharing is an Opportunity** – match your revenues and costs while keeping the latter under control to stay financially sound in situations where business can be volatile
- **Diagnostic quality is a Must** – be competitive and benefit from excellent clinical outcomes by getting the maximum from our full range of personal and digital support services and touchpoints
