Our Symbia® Intevo combines the industry's highest SPECT sensitivity with diagnostic-quality CT for attenuation correction and localization. From one exam, you receive the functional information and localization you need to support high clinical confidence and better treatment strategies.

With a more complete picture of your patient's condition, you can now deliver more efficient and, potentially, more effective care and support better patient satisfaction. SPECT/CT imaging can be particularly helpful for cases involving:

- Oncology
- Cardiology
- Endocrinology
- Orthopedics
- Parathyroid
- Osteomyelitis
- Obese patients
- Pediatrics
