1 About This Statement

Integrating the Healthcare Enterprise (IHE) is an international initiative to support vendor-independent interoperability between different healthcare systems. Interoperability is periodically tested at so-called *IHE Connectathons*, where vendors prove the successful interconnection of their software with at least three different systems by other vendors. Successful test results of implemented IHE Profiles are published as IHE Integration Statements.

In order to satisfy the highest-quality requirements, ITH icoserve has committed to periodically testing their product *syngo.share* at IHE Connectathons to confirm the compliance with current IHE Integration Profiles.

Vendor

ITH icoserve technology for healthcare GmbH

Product Name

syngo.share

Version

VA28A_BF01

This product implements all transactions required in the IHE Technical Framework to support the IHE Integration Profiles, Actors and Options listed on the following pages.

Note

Profiles are tested regularly at EU and/or US Connectathons.
