

# Patient diversity. Case complexity. One simple solution.

Advanced CT imaging has arrived at

Join us for an open house and experience the power of advanced imaging, now made possible everywhere.

SOMATOM Pro.Pulse, the latest innovation from Siemens Healthineers, is unlocking advanced diagnostic imaging for every patient, everywhere by making Dual Source technology accessible to a wider range of facilities. Backed by the power, speed, and precision capabilities that only Dual Source CT can provide, its intelligent workflow simplifies the scanning process to ensure consistent results for you and a comfortable experience for your patients, no matter the complexity of their case.

## ACCESSIBLE

With a smaller footprint and simpler installation, Dual Source CT can now be installed in more areas outside of traditional hospital locations

## CAPABLE

Power, speed, and precision meet your needs in both routine and advanced CT examinations such as cardiac CT, spectral, and pediatric imaging.

## SIMPLE

Intelligent workflow simplifies the scanning process for consistent results.

## COMFORTABLE

Patient-focused technologies keep patients at ease.

## Join us for an Open House
