Nurses often spend considerable time searching for missing equipment. The paper “The impact of operational failures on hospital nurses and their patients” reports the time wasted per shift is stated with 72 minutes. This is valuable time that could be spent on more meaningful activities such as patient care.

Another impact of missing equipment is a delay in clinical workflows that could have severe consequences for the patient.

**RealTime Asset Finder** is a digital service that enables your team to locate medical equipment in your organization in just a few seconds, increasing workforce and workflow productivity. It also allows assets to be filtered by feature, type, or status, which makes the task of finding your assets and keeping them where you need them as simple as clicking a button. The asset information is displayed on a virtual web interface, which, with the correct credentials, can be easily accessed through a web browser on any computer by any member of staff that requiring these tracking capabilities.

**RealTime Asset Finder helps you to:**

- increase staff productivity;
- increase patient satisfaction;
- avoid workflow interruptions.
RealTime Asset Finder features include:

- **Intuitive and scalable interface**—enable any device, whether a phone or a PC, with Asset Finder capabilities, and benefit from the easy-to-use application.

- **All information available in one place**—include all the types of asset you would like to track, from wheelchairs to sophisticated medical equipment such as ultrasound devices.

- **Filter function**—quickly identify your assets with the filter function. You can filter by different categories, such as features, weight, size, vendor, department, serial number, color, etc.—all in one easy-to-use interface.

RealTime Asset Finder has a scalable interface and can be used on any device—whether a mobile device or desktop PC.

Easily locate medical equipment in your organization in just a few seconds.

More RealTime Location Services will be released in the near future. Stay tuned!
