

## Press Release

Kuala Lumpur, Malaysia, December 10, 2025

For Immediate Release

### Siemens Healthineers Malaysia Honoured with ESG PLUS Award for Industry Specific Excellence in Healthcare and Pharmaceuticals

- Siemens Healthineers Malaysia won the Industry Specific ESG Excellence Award (Healthcare and Pharmaceuticals).
- The award represents Siemens Healthineers' commitment in sustainable transformation within local healthcare sector.

(L-R): Choo Teng Heng (Product Manager, Laboratory Solutions), Jan Tiedermann (Finance Director), of Siemens Healthineers Malaysia, YB Datuk Seri Dr. Noraini binti Ahmad (Deputy Minister of Women, Family & Community Development), YB Puan Sri Puan Sri Datin Seri Dato' Akmal Abdul Salam (Chairwoman, ESG PLUS Awards 2025), and Gan Hui Hong (Head of Laboratory Solutions, Siemens Healthineers Malaysia) at the ESG PLUS Awards 2025.

*Kuala Lumpur, 10 December 2025* — Siemens Healthineers Malaysia is proud to announce its recognition as the recipient of the Industry Specific ESG Excellence Award (Healthcare and Pharmaceuticals) at the recent ESG PLUS Awards 2025, held at Sheraton Kuala Lumpur. This marked a significant milestone as the company's first such accolade for sustainability in Malaysia.

*"At Siemens Healthineers, our purpose is to pioneer breakthroughs in healthcare for everyone, everywhere, sustainably. This recognition reflects our commitment to integrating sustainability into every facet of our operations and innovations, ensuring that we not only advance healthcare but also do so with minimal impact and purpose,"* said Jan Tiedermann, Finance Director, Siemens Healthineers Malaysia.

This award reflects Siemens Healthineers leadership in driving sustainable transformation within clinical laboratories. Central to this achievement is the Atellica Solution portfolio, which has set global benchmarks for environmental performance in laboratory diagnostics. Through the adoption of ACT Ecolabel-certified products and the My Green Lab certification programme, Siemens Healthineers has enabled laboratories to achieve up to 48% reductions in energy consumption and up to 54% reductions in water usage, while increasing operational throughput and reducing lifecycle emissions<sup>1</sup>.

The company's ACT Ecolabel and My Green Lab initiatives have also been instrumental in helping healthcare providers recognize measurable cost savings and environmental benefits. These efforts are complemented by sustainable packaging, improved waste management, and remote service delivery, all contributing to a lower carbon footprint and healthier communities.

*"Our laboratory solutions are designed not only for performance and reliability but also to empower our partners to achieve their sustainability goals. By reducing resource consumption and hazardous waste, we are supporting care providers in delivering more sustainable healthcare that allow them to reinvest their focus into what truly matters, patient care,"* said Gan Hui Hong, Head of Laboratory Solutions, Siemens Healthineers Malaysia.

Siemens Healthineers' focus on sustainability is embedded in its global strategy, with a clear ambition to achieve net zero emissions across its value chain by 2050. The company's ESG framework is built on decarbonisation, circular economy, and eco-design, aligned with the United Nations Sustainable Development Goals. In Malaysia, these principles are brought to life through collaborations with government agencies, hospitals, and academic institutions, as well as ongoing investment in local talent and community engagement.

This recognition by the ESG PLUS Awards 2025 is a testament to Siemens Healthineers Malaysia's dedication to sustainable excellence and its role as a trusted partner in advancing the nation's healthcare ecosystem. The company looks forward to building on this momentum and achieving even greater strides in sustainability in the years ahead.
