

Asset Planning Session

Maximize the potential of your Siemens Healthineers systems

Keep improving your performance and be prepared for future challenges

By utilizing data analysis and structured evaluation, Siemens Healthineers supports in optimizing the asset lifecycle, ensuring that your assets are aligned with your organization's strategies. This allows you to understand and keep up with innovations, improve workflows, reduce energy consumption, expand your clinical capabilities, and stay competitive without necessarily investing in new systems. Additionally, it ensures that your systems have the latest operating software to improve your cybersecurity.

An Asset Planning Session is a collaborative meeting designed to support you in planning and optimizing the performance of your Siemens Healthineers installed systems.

Essential elements of an Asset Planning Session:

- Market Analysis
- Customer Strategy Discussion
- Asset Analysis (with Lifecycle Analysis, Energy Savings Analysis, Cybersecurity)

Your benefits

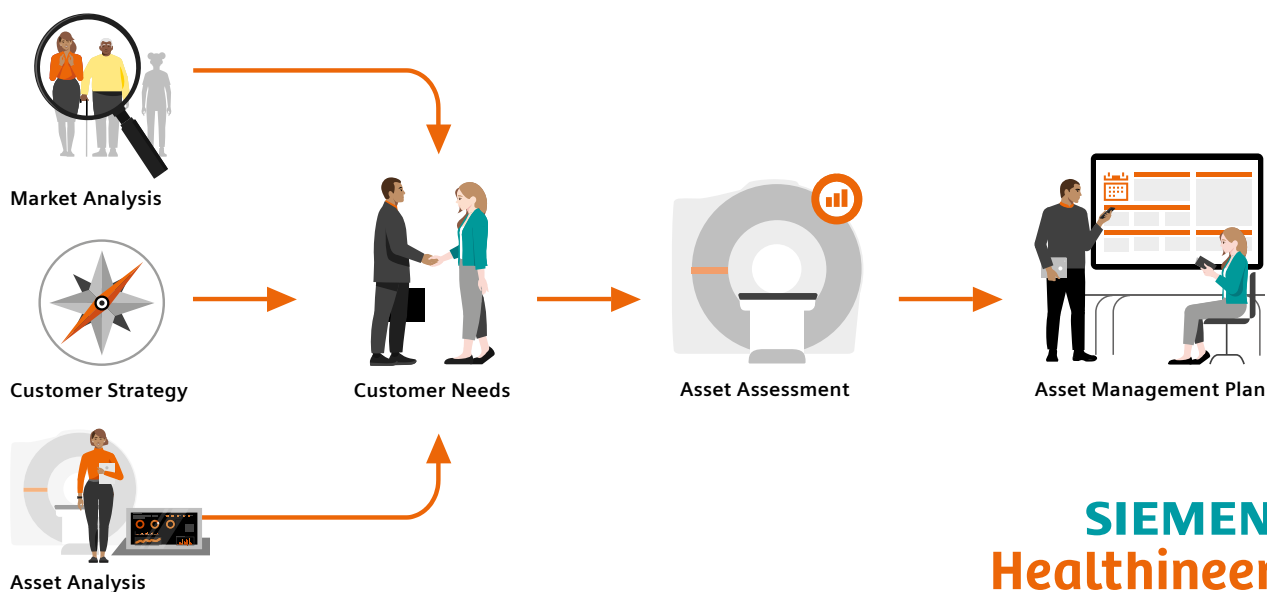

- Identifying your business growth opportunities
- Aligning your assets with your strategy
- Maximizing the potential of your department

How to book your Asset Plannings Session

You can either contact your local Siemens Healthineers representative for a personal consultation or arrange a virtual Asset Planning Session with the necessary specialists. In both cases, they will provide all the relevant materials and resources and lead the session.
