

Point of Care Informatics

Atellica Connect POC Insights

Meeting your point-of-care
management needs and
performing beyond expectations

siemens-healthineers.com/atellicaconnect

Manage your network effortlessly with Atellica Connect POC Insights

The frontlines of care can be chaotic. In an instant, people, processes, and point-of-care testing data can all converge in a whirlwind of competing priorities. To navigate these situations more easily, point-of-care managers and staff need simplicity and intuitive functionality with software developed from extensive input from POC coordinators, leveraging decades of experience.

When pressure builds at the point of care, smarter data management empowers healthcare teams to direct attention to the immediate priority—delivering quality patient care.

Inspired by you. Designed with you.

Introducing Atellica® Connect POC Insights, a solution to manage your point-of-care data all in one place with a smarter, standardized, user-driven platform that puts you in control of your data. Built with customer input from concept to delivery and elevating trusted industry-leading tools, it's a solution designed just for you.

Your workflow, your way.

Organize the chaos of multiple sites, hundreds of devices, and thousands of operators with an effortless, user-driven platform that allows you to manage your POC data all in one place. Navigate to device errors, manage operator status, and monitor QC in just a click to quickly review and resolve any ongoing issues.

Common Healthcare IT Pain Points

Complex IT Environment

- Multiple device vendors
- Limited flexibility, e.g., vendor-specific data managers
- Limited hospital IT budgets

Users are required to complete training for each middleware system.

Hospital networks must install multiple servers for each middleware system installed.

Users are tasked with learning to navigate and complete their daily tasks using multiple operating systems.

Information Overload

- Huge aggregation of POC data points (e.g., patient and device information)
- Lack of appropriate tools to analyze data quickly

Analyzing reports with no graphs can be challenging, and they are difficult to change.

Static reports must be manually adjusted regularly for multiple connected sites.

Operator Training

- Operator errors
- Manual-entry errors
- Lack of training capacity
- Managing operator training and certification status

Ensuring operator proficiency and certification can be difficult when there are thousands of operators certified to use multiple devices.

Manually tracking operator certification status can take a lot of time out of a POC coordinator's day.

Untrained operators are prone to making errors, which can lead to invalid results being delivered.

Network Inefficiency

- Cost of multiple IT solutions
- Time spent managing workflows
- No technical validation of data
- Device downtime

Use of multiple middleware systems requires time, effort, and money for daily maintenance.

Users must be trained to use each middleware system to complete their daily tasks.

Ineffective workflows and missing device overview data can lead to frequent device downtime.

Managing Quality & Compliance

- Accessing and creating reports
- Lack of External Quality Assurance (EQA)
- Maintaining QC
- Audit tracking

New audit requests cannot be properly addressed due to difficulty accessing data and the inability to quickly change data perspectives.

Reports are available but static and manual.

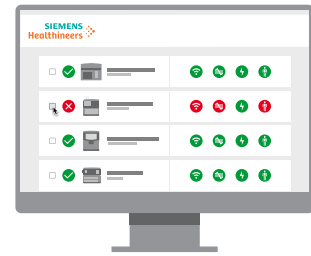

Providing You with Solutions

Streamlined IT Environment

Consolidate multiple middleware products and streamline your entire IT infrastructure into one solution to improve operability and spend more time on patient care.

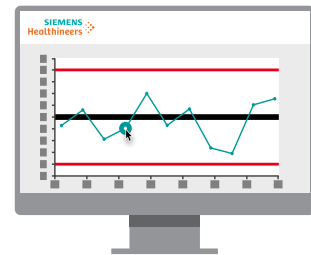

Consolidated Operations | Single Solution

Information Consolidation

Visualize and review your entire POC network's data with built-in analytics that allow you to analyze data trends and resolve network issues with a few clicks.

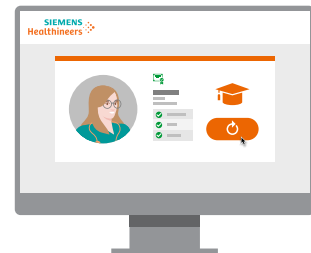

Dashboard and KPIs | Interactive Data

Automated Operator Training

Use multiple competency criteria for faster operator training and take advantage of the built-in e-learning module. Gain valuable insights into the effectiveness of operator training and review options for recertification.

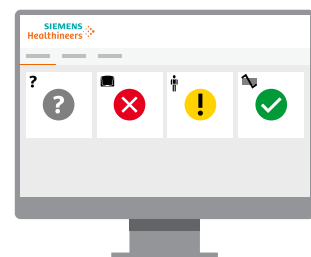

Auto Recertification | Training Audit

Improved Efficiency

Manage your point-of-care data all in one place with an effortless, user-driven workflow that puts you in control and helps create a more intuitive experience for the user.

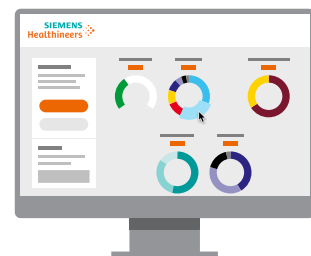

Automate Manual Tasks | Technical Validation

Manage Quality & Compliance

Identify noncompliance issues faster, with direct navigation from the dashboard in just a click to quickly review, resolve, and improve quality.

Quality Monitoring | Comprehensive Reporting

Atellica Connect POC Insights

Features and Benefits

Innovative Point-of-care Testing Management

- Interactive Status Dashboard**
 - Customizable Notifications**
 - Alert-driven Navigation**
 - Digital Audit Trail**
- Atellica Connect POC Insights features an interactive dashboard with customizable notifications to put you in control of your data and work the way that suits you best.
 - Alert-driven navigation with guided resolution simplifies processes and reduces time spent problem solving.
 - With smart analytics, all system changes are automatically documented so you can quickly produce reports for audits and checks without taking up valuable staff time.

Device Management

- Maintenance and Monitoring**
 - Remote Control and Configuration**
 - Non-connectable Devices**
- Atellica Connect POC Insights provides efficient device monitoring, enabling early detection of malfunctions or deviations by alerting you of device errors and maintenance issues to help ensure patient safety and optimal device performance.
 - With remote control and configuration of devices (when available) and manual entry for non-connectable devices, you can streamline your device management workflows to save valuable staff time and improve operational efficiency.

Patient Result Management

- Monitoring**
 - Autovalidation Rules**
 - Result Reporting**
- Atellica Connect POC Insights safely monitors your patient testing data with quality standards and autovalidation rules set by you.
 - With real-time alerts, you can easily navigate to results that require your immediate attention so that you can review, resolve and improve your POCT operations.

Operator Management

- Monitoring**
 - Operator Import**
 - Integrated e-Learning**
 - Auto Recertification**
 - Complete Certification Records**
- Atellica Connect POC Insights provides centralized oversight of all point-of-care testing operators, their certifications, and training activities in your network.
 - Accelerate operator training with the integrated e-learning platform, which enables customized training courses and automatic operator recertification.

Analytics and Compliance

- Smart Reporting**
 - Quality Control**
 - Workload**
 - Device Events**
 - Operator Certifications**
- By centralizing information and creating streamlined processes for easier access and insights into your data, Atellica Connect POC Insights enables data-driven decision making, allowing you to turn raw data into actionable insights that can help optimize the operation of your network.

At Siemens Healthineers, we pioneer breakthroughs in healthcare. For everyone. Everywhere. Sustainably. As a leader in medical technology, we want to advance a world in which breakthroughs in healthcare create new possibilities with a minimal impact on our planet. By consistently bringing innovations to the market, we enable healthcare professionals to innovate personalized care, achieve operational excellence, and transform the system of care.

Our portfolio, spanning in vitro and in vivo diagnostics to image-guided therapy and cancer care, is crucial for clinical decision-making and treatment pathways. With the unique combination of our strengths in patient twinning,* precision therapy, as well as digital, data, and artificial intelligence (AI), we are well positioned to take on the greatest challenges in healthcare. We will continue to build on these strengths to help overcome the world's most threatening diseases, enable efficient operations, and expand access to care.

We are a team of more than 71,000 Healthineers in over 70 countries passionately pushing the boundaries of what is possible in healthcare to help improve the lives of people around the world.

**Personalization of diagnosis, therapy selection and monitoring, aftercare, and managing health.*
