Powerful. High quality. Portable. CT imaging at the patient's bedside.

It's just one more way we're transforming CT imaging for critically ill patients.

PORTABLE CT IMAGING HAS ARRIVED AT <Facility Name>

CT SCANNING WHEN TIME IS OF THE ESSENCE

Proven CT application means powerful results for you. When faced with a life-changing medical crisis such as a stroke, your CT experience can make all the difference in your outcome. The SOMATOM On.site, a revolutionary portable head CT scanner from Siemens Healthineers, is transforming imaging care for critically ill patients. The portable design brings high quality imaging directly to the patient's bedside, enabling comprehensive scans performed quickly and accurately for successful diagnosis and treatment planning.

- **Portable scanning brings high quality CT head imaging to the patient, ensuring uninterrupted care**
- **Smart technology automates results quickly for accurate diagnoses**
- **On-demand imaging accelerates time-sensitive diagnosis and treatment decisions**
