

SmartSimulator

A smarter way to train on your equipment.

➤ siemens-healthineers.us/smartsimulator

Why do you need SmartSimulator?

As clinical technology rapidly evolves, training staff effectively becomes challenging—especially when balancing operational demands and patient care. SmartSimulator transforms this challenge into an opportunity, delivering flexible, hands-on learning experiences that empower your team to master new systems, streamline workflows, and harness advanced capabilities without impacting daily operations. Keep your team confident, your workflow smooth, and your facility at the forefront of innovation.

What is SmartSimulator?

SmartSimulator is a cloud-based, educational tool that allows your staff the ability to train and practice on a simulated version of a Siemens Healthineers medical device's interface. This simulated environment will help you reduce your team's ramp-up times for new equipment, features, and workflows by giving them access to train at any time.

- 5 users¹
- 30 hours of access²
- 25 GB cloud-based storage
- 12-month subscription
- Training workbooks available

The SmartSimulator has several use cases and is available across multiple systems

- Enhance staff confidence through hands-on virtual experience with your medical equipment, even when it's not accessible.
- Increase your team's scanning efficiency to fully leverage system capabilities from day one and decrease ramp-up times.
- Improve clinical workflow and performance by allowing your team to train on complex cases with your systems' new technology in a simulated environment.

Peer testimonials on the benefits of using SmartSimulator

"The pre-education was very helpful and having that resource is awesome. This combined with their onsite training made the transition very smooth."

Terry Meierkort, Lead Technologist – Orlando Health, Orlando Regional Medical Center

"The install of the SOMATOM go.All has been optimal. From the first day, we were able to perform all the urgent examinations of the clinic (~15) and from the second day all external and hospital patients (~30)."
"...This process allowed us to become familiar with the platform, which we did not know, very quickly and very smoothly."

Nicolas Couëpel, Technologist – CIM Laennec, Saint-Grégoire

Individual education & practice

SmartSimulator provides individual education and practice for an interactive learning experience, in a safe environment, anytime, anywhere, on a computer or tablet.

Classroom education & practice

SmartSimulator supports various education methods and environments. From classroom training to onsite workshops to virtual formats, it allows you greater versatility and dynamic interaction between trainers and trainees.
