

Relocate your system with Siemens Healthineers

Minimize disruption, maximize patient care

Minimize impact to your patients when relocating your imaging equipment to another operating location.

Siemens Healthineers expert relocation, decommissioning and storage services offers you a seamless, signature experience.

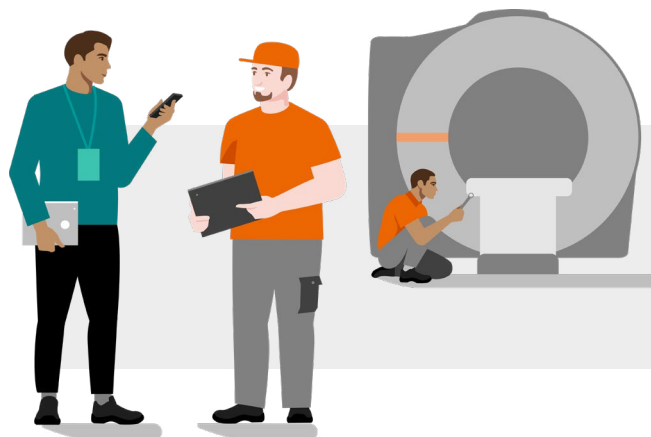

Whether you need to move a portable unit between buildings or complete a turn-key suite relocation across the country, Siemens Healthineers offers a seamless premium experience. In addition to the physical location change, you receive on-site calibration, acceptance testing and clinical education as required by product and customer specific conditions.

Why choose Siemens Healthineers?

- Environmentally controlled storage
- Resources deployed rapidly to fulfill cross functional tasks
- Seamless service contract coverage
- Equipment and facility damage risks minimized
- Expertise project management
- Transportation and rigging expertise
- Turn-key construction
- Siemens Healthineers certified installation
- On-site calibration and acceptance testing
- Clinical education

Decommissioning safeguards:

- Transportation and rigging management
- Hazardous materials safely removed from products
- Customer compliance assistance with disposal of hazardous materials
- Patient data removal providing HIPAA compliance
- Facility damage risks minimized
- Project Management

Feel confident with our relocation programs backed by decades of industry know-how and expertise.
