# Evolve.Express

Upgrade to the future—now

# Focus on investment protection

With upgrades to the latest technology throughout the entire product life cycle

Demand for obsolescence protection has increased as institutions retain their imaging equipment for a longer period of time in order to prevent departmental inefficiencies. To remain competitive, healthcare providers must continually provide high-quality care made possible by having the latest and most relevant technology installed on their systems through upgrades.

## Evolve.Express from Siemens Healthineers

That is why we offer Evolve.Express—hardware and software upgrades available with many of our service plans—for our eligible CT, MRI, PET/CT, SPECT/CT, and SPECT systems.

---

## We offer better business outcomes as a result of hardware and software upgrades through the Evolve Program and Evolve.Express

---

We go beyond traditional “break-fix” services, offering automatic upgrades on software and hardware to help ensure operational efficiencies and maximize image quality throughout the life of the system.

The **Evolve Program** preemptively secures your access to our healthcare innovations. The software and/or hardware upgrade purchased within 24 months of system installation is delivered within 3 to 5 years of purchase, as part of your service agreement.

Subsequent to the program, we offer **Evolve.Express**, which extends the life cycle of your magnetic resonance and molecular imaging systems by offering another opportunity to upgrade to the latest hardware and/or software. The upgrade delivery time frame is between 6–12 weeks after the contract is closed.

Evolve.Express is the second opportunity to get an Evolve upgrade:

- If you participated in the Evolve program, you will receive an additional hardware and/or software upgrade with a service agreement. If you did not participate in the Evolve Program, you will have the opportunity to receive a hardware and/or software upgrade with a service agreement.

- Evolve.Express gives you access to the latest clinical applications.
- Evolve.Express provides one system upgrade, which leads to a higher performance and a longer product life cycle.
- Without Evolve.Express, your system remains at the same performance level.

	Evolve Program	Evolve.Express
<b>Upgrade Includes</b>	Latest software and/or hardware available for eligible systems	Latest software and/or hardware available for eligible systems
<b>Availability</b>	< 24 months after system installation with a service contract	> 24 months after system installation with a service contract
<b>Contract Duration</b>	4-5 years	4 years
<b>Delivery Time frame of Upgrade</b>	3-5 years	6-12 weeks

We are your partner to help you adapt to the rapidly changing healthcare environment. You are not only upgrading the technology you need, you are preparing yourself to face the challenges while performing to your full potential today and preparing for tomorrow.

# Take measures to maximize your system's potential

In the transition to value-based care, healthcare industry stakeholders are facing various challenges to staying financially viable, including those from healthcare reform and consumerism. Imaging equipment needs to stay current to match healthcare institutions' needs.

---

## Clinical imperatives

---

- Increase quality of care by expanding your imaging equipment with increased functionalities and cutting-edge applications that offer new or specialized features, are more accurate in their aid to diagnosis, and speed up your performance.

---

## Operational optimization

---

- Increase system performance and optimize the life span of your equipment with the latest upgrades.

---

## Financial performance

---

- Upgrade your systems to potentially achieve more efficient and cost-effective performance at a fraction of a new equipment purchase price.

# Evolve.Express

---

## Maximize your system's potential

---

If you make significant investments in state-of-the-art technology, you can't afford to let your systems become obsolete. By including Evolve.Express in your service contract, your system's hardware and software will be upgraded to the latest versions—the moment they become available. Evolve.express is only available for our eligible CT, MRI, PET/CT, SPECT/CT, and SPECT systems—please check with your representative for more information.

Maximize performance with the latest clinical applications

Help ensure compliance with the latest IT security requirements

Effectively expand into new imaging service lines

Cost effectively keep your imaging system technology current and extend the life of your equipment investment

On account of certain regional limitations of sales rights and service availability, we cannot guarantee that all products included in this brochure are available through the Siemens sales organization worldwide. Availability and packaging may vary by country and is subject to change without prior notice. Some/All of the features and products described herein may not be available in the United States.
