

Robotic skills lab

Experience Robotic-assisted Intervention

Speaker

Paul T. Campbell, MD
Interventional Cardiologist
Sanger Heart & Vascular Institute
Concord, North Carolina

Day 1

Arrivals
6:00 pm
Dinner & didactic presentation

Day 2

7:30 am
Travel to hospital

8:30 am - 3:00 pm
Live robotic case observation

3:00 pm
Departure

Course description

The robotic skills lab is designed to familiarize participants with the operations and capabilities of robotic-assisted PCI by providing a combination of didactic education, live case observation and robotic operations simulation in a highly engaged peer-to-peer environment.

Course training topics

- 1 Educate participants on the capabilities of the CorPath GRX System as well as specific features and benefits of the equipment while providing a step-by-step overview of a robotic-assisted intervention
- 2 Highlight critical operations success factors such as the importance of technologist's role in a CorPath GRX case, room set up/equipment location and catheterization lab operations impact
- 3 Showcase clinical evidence including clinical benefits to both patients and staff

Target audience

Clinicians and administrators interested in adopting a CorPath GRX Vascular Robotic Program within their institution.
