Your patients can get low-dose CT lung cancer screening at

<Facility Name>

We're improving access to low-dose CT lung screening by taking the Siemens Healthineers SOMATOM go.Up CT scanner on the road.

The self-contained mobile lung screening vehicle seamlessly integrates low-dose CT technology with a fully mobile and easy to drive vehicle, serving all communities by delivering high-quality images at minimal dose levels. With consistent, reliable image quality for diagnostic decision-making, it's a trusted solution for both patients and physicians alike.

Reach more patients WITH MOBILE CT LUNG CANCER SCREENING.

Please invite your patients to join us at <date, event> for low-dose CT lung cancer screening.

Mobile
Reaching at-risk patients closer to where they live, the self-contained low-dose CT lung screening unit is easy to drive and set up.

Convenient
Bringing fast, low dose CT screening to the community, offering increased convenience to your patients.

Uncompromised
The fully diagnostic CT scanner is equipped with dose-efficient technologies to ensure image quality without compromise.

Consistent
Intuitive, AI-guided workflows ensure consistency across all CT examinations and technologists for standardized results.
