

# Outcome-based education XP

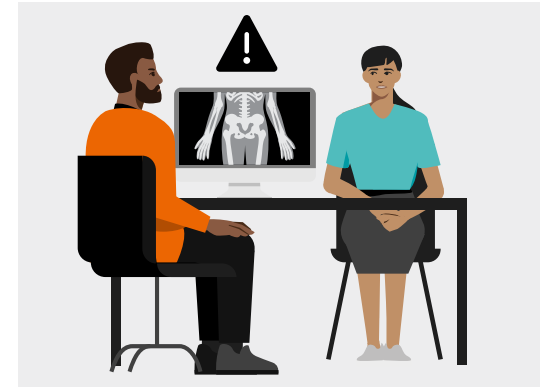

➤ [siemens-healthineers.us/education](https://www.siemens-healthineers.us/education)

Traditional clinical education methods are often **not focused on the specific organization's challenges**.

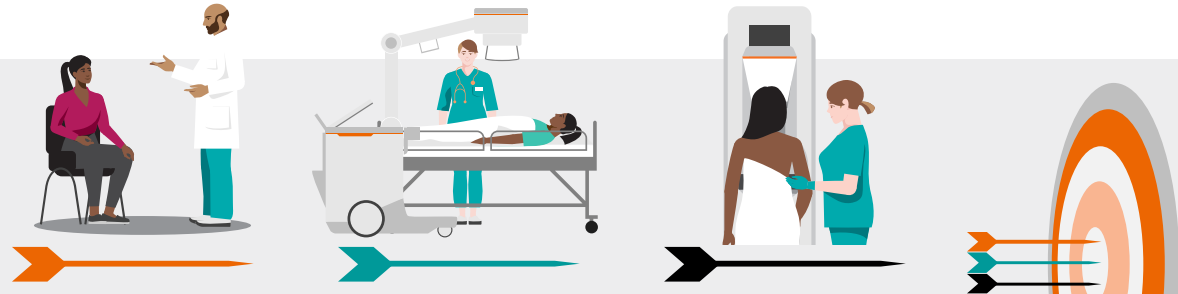

This non-specific and overwhelming education means **staff cannot achieve their target skills** to their full capability.

So, the staff **lacks the skills, knowledge, and confidence** to provide the best standard of patient care.

## The solution?

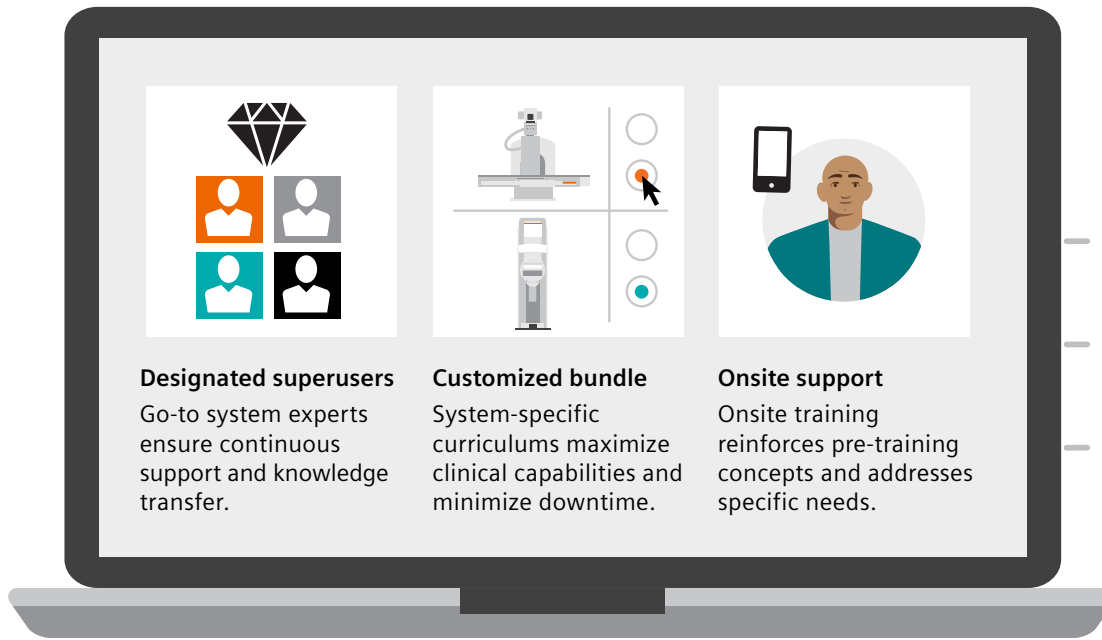

Outcome-based education for radiography, fluoroscopy, and mammography

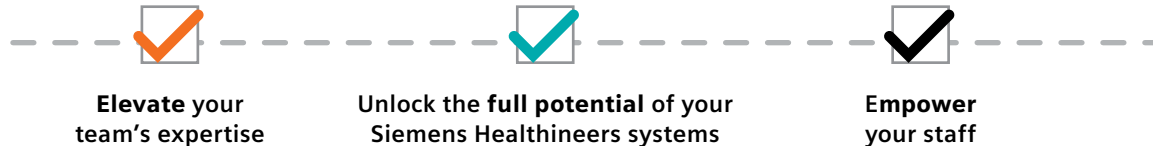

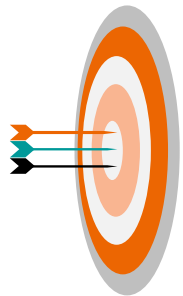

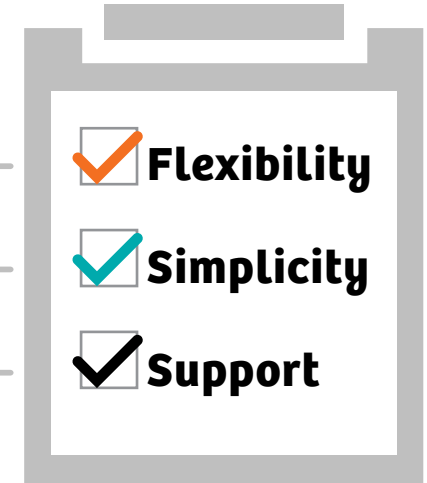

At Siemens Healthineers, we're committed to unlocking the **full potential of your systems** through outcome-based education.

**Don't just purchase a system, invest in a journey towards excellence**

## Outcome-based education delivers:

**Outcome-based education** for radiography, fluoroscopy, and mammography allows you to provide the **best standard of patient care.**
