Onsite Tailored Hands-on

Equipment training
in your clinical environment –
tailored to your needs

In any healthcare institution, if an operator lacks knowledge on system equipment features and functionalities, this can result in inefficient use of medical equipment. In addition, when end users can't expand their clinical capabilities to conduct specialized examinations, overall workforce productivity decreases, too. This leads to knowledge gaps and inefficiencies to your clinical operations.

Onsite Tailored Hands-on is a tailored training event, which will improve your staff's knowledge and skills while focusing on the clinical applications that are important to you.

Onsite Tailored Hands-on provides specialized training performed directly on your equipment, including practical exercises based on clinical examples.

Onsite Tailored Hands-on helps you to

- **optimize operations with staff education** focused on equipment features, protocol setup, protocol enhancements, and clinical workflows
- **increase confidence by expanding your staff's clinical capabilities in your own environment** with guidance from an education expert on specialized applications
- **achieve a faster return on investment** by optimizing your daily operations and throughput with targeted training that fosters productivity

Onsite Tailored Hands-on provides a personalized and flexible learning experience for your employees.

Onsite Tailored Hands-on facilitates optimal equipment operations by keeping your staff's professional knowledge up to date with information on system functionalities and software advancements through

targeted training events. You can optimize your daily operations by fostering productivity with this targeted training program.

1. Request your training

- Reach out to your Siemens Healthineers representative

2. Start your pre-learning

- Access learning activities from any smart device using PEPconnect

3. Attend your training

- Performed directly on your equipment
- Follow a personalized and flexible training program
- Focus on clinical applications important to you
- Gain confidence with practical clinical workflow exercises on your equipment

4. Get certified

- Receive certification of attendance
