

**Designed to
support your
patient's
needs**

Meet our new
advanced X-ray
system with
radiography,
fluoroscopy, and
3D imaging

We've added **Multitom Rax**, an advanced Twin Robotic X-ray system designed for flexibility, precision, and efficient imaging, to our suite. Its automated, highly flexible design helps reduce patient repositioning while supporting a wide range of radiographic, fluoroscopic, and 3D exams—consistently delivered at low radiation dose.

- Unparalleled positioning flexibility for efficient exams and diverse patient needs
- Expanding precision medicine while at the same time improving the patient experience
- Improve diagnostic accuracy in daily routine with less effort and low dose
