Virtual Clinical Workshop

Virtual learning with experts and peers on specialized clinical topics

If your staff only have limited access to experts and peers to collaborate and gain insights into specialty clinical topics, this will often create uncertainty and result in a lack of confidence. For you to remain competitive, you also need to boost your staff's clinical expertise by keeping up to date with clinical trends in medical imaging. To make this happen, you need to enhance your staff's understanding of applications. This will aid in accurate diagnosis of daily operations – in a time and resource-efficient way.

Virtual Clinical Workshops are interactive clinical specialty workshops led by clinical experts from the healthcare industry, with a strong focus on collaborating with peers in a virtual setting. Experts present real patient case studies to guide the participants in analyzing current clinical trends.

With a Virtual Clinical Workshop, you benefit from more flexibility by joining us in a digital learning environment which is convenient for your schedule. These specialty workshops allow you to constantly enhance your clinical expertise so that you can conduct new or complex examinations with confidence.

Our Virtual Clinical Workshops help you to

- **get access to experts and peers** to collaborate and gain insights into specialty clinical topics often creates uncertainty and results in a lack of confidence among staff
- **boost your clinical expertise** by keeping up to date with clinical trends in medical imaging to remain competitive at all times
- **enhance your understanding of applications** for accurate diagnosis in daily operations – in a time- and resource-efficient way

Virtual Clinical Workshops are interactive clinical specialty workshops led by clinical experts and peers.

Clinical experts with subject matter knowledge bring their insights to the case study presentations given in a virtual setting that provides cost-efficient education on clinical trends related to specialty topics. The workshops can be complemented with simulated postprocessing of

imaging workflows. These workshops will help you improve your clinical practice by enhancing skills in reading, interpreting, and applying the literature. This helps you expand your clinical capabilities in your daily routine.

1. Request your training

- Reach out to your Siemens Healthineers representative

2. Start your pre-learning

- Access learning activities from any smart device using PEPconnect

3. Attend your training

- Participate in a interactive virtual workshop sessions focusing on current clinical trends
- Collaborate with experts and peers in real time through virtual webcast solutions
- Enhance your clinical expertise with practical exercises on case studies

4. Get certified

- Receive certification of attendance
