# Breast Health 360°

The highest degree of care.  
Because we care.

Seeing the whole picture also means seeing your entire journey as you deliver the best possible care to your patients. Siemens Healthineers is at your side with a holistic, personalized portfolio of solutions that we call our 360° approach: We've got you covered in every step of the Breast Health Journey from discovery to recovery. From obtaining a patient's medical history to screening and diagnosis, treatment, and follow-up—we provide accurate, human-centric, and economical solutions to empower your decisions. Thanks to our new business segment Varian, we are expanding the potential of cancer treatment even further.

**Profit from expert knowledge across all imaging modalities with a global player: Siemens Healthineers**

## Patient history

From the very beginning, it's important to make sure that all information about a patient's history is accessible to every doctor and nurse involved in the treatment.

### Insight BD

Objective, volumetric classification supporting instant risk stratification and personalized breast care pathways.

### Varian ARIA® oncology information system

A comprehensive, electronic patient record optimized for the oncology setting and managing the patient journey.

## Screening

Every case is unique, and every patient needs to be treated as an individual. Technological innovations make screenings reliable, precise, and more comfortable than ever before, helping doctors make key decisions faster.

### MAMMOMAT Revelation

Our flagship mammography system for both FFDM and tomosynthesis, designed for superior cancer detection.

### Abbreviated Breast MRI

Fast, 15-minute table time breast MRI protocol for screening high-risk patients.

### MAMMOVISTA B.smart

Covers the full spectrum of multimodal diagnostics from mammography to MRI and ultrasound.

### iBreastExam

Confirm and document your clinical breast exams reliably, quickly, and painlessly. FDA-cleared technology measures changes in tissue stiffness that may warrant further imaging.

## Diagnosis

Doctors rely on a wide range of cutting-edge procedures and scans to get to the bottom of what's going on as quickly as possible. The more information we have, the better equipped we are to find a solution.

### 50° Wide-Angle Biopsy

Biopsy under the guidance of 50° Wide-Angle Tomosynthesis to achieve high target accuracy.

### Breast MRI

Using MRI in diagnosis helps to individualize treatment decisions, e.g., in surgical strategies.

### ACUSON Sequoia

The ACUSON Sequoia ultrasound system enables exceptional breast imaging and advanced applications to help improve diagnostic accuracy.

### Mammotome Revolve™

The MAMMOMAT Revelation with the Mammotome Revolve™ ST dual vacuum-assisted breast biopsy system delivers clinical confidence, from procedure to pathology.

## Treatment

Clinicians can choose from a variety of highly effective treatments and personalize each patient's treatment plan to meet their individual needs.

### Biograph Family of PET/CT Scanners

Biograph PET/CT scanners provide imaging of early signs of metastatic disease for staging accuracy.

### SOMATOM go.Sim & go.Open Pro

Radiotherapy (RT) scanners are optimized for workflow and designed to accommodate every patient anatomy.

### Varian TrueBeam® radiotherapy platform

Highly versatile C-arm medical linear accelerator that simplifies delivery of high-precision, image-guided radiotherapy.

### Varian Halcyon® radiotherapy system

A powerfully intuitive system designed to optimize productivity and enable greater access to care.

### Breast cancer tumor markers

Can be used to monitor breast cancer treatment and follow-up, including earliest signs of metastatic disease.

## Follow-up

A diverse assortment of state-of-the-art technologies and procedures provides doctors with excellent tools for comprehensive and comfortable support during aftercare.

### Varian Noona® ePRO application for electronic patient reported outcomes

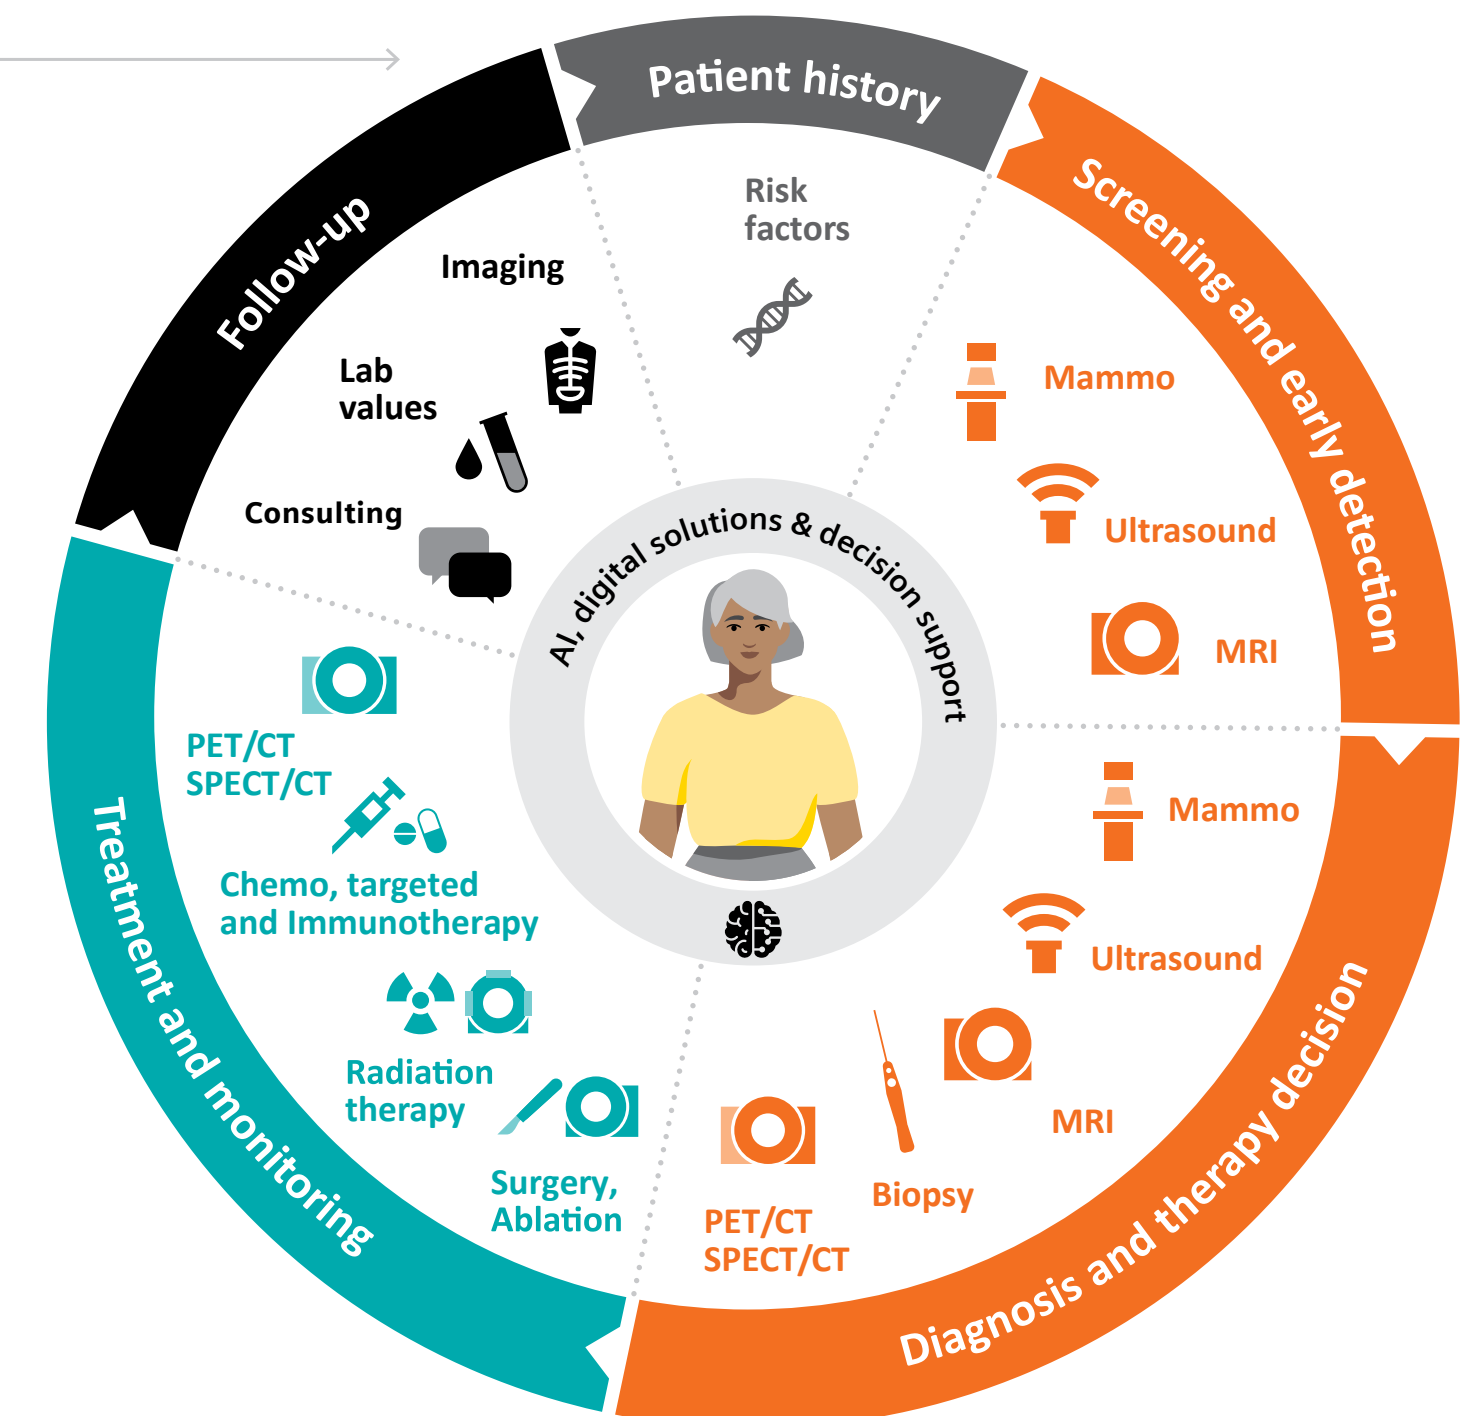

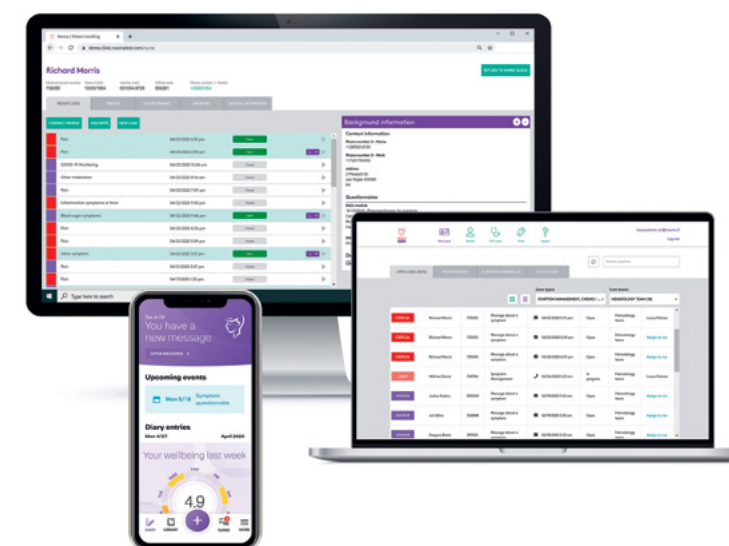

A user-friendly patient engagement application that connects the patient with the care team and provides real-time symptom information for making important clinical decisions.

### Laboratory diagnostics

Broad range of laboratory testing solutions to understand risk factors, make timely treatment decisions, implement appropriate therapies, and monitor treatment.

### Consulting

Offering a broad range of strategic, financial, and performance transformation consulting services to help address your organizations complex needs. Siemens Healthineers Consulting & Transformation capabilities are enabled by the expertise of ECG Management Consultants.
