

Unlocking the Power of Imagination for Pediatric Patient Care.

Varian's patient engagement program, empowerME, aims to alleviate treatment-related fears with Cosmo for Kids. Specifically designed for pediatric patients, Cosmo for Kids transforms radiation treatment into an engaging and comforting journey for your young superheroes.

Here's why Cosmo for Kids is the perfect companion for pediatric patients:

Cosmo, the Treatment Guide:

Join Cosmo in four captivating animations. Through peer narration from Cosmo's friend, Emma, children learn about their treatment in relatable language and a supportive atmosphere.

Comforting Companion:

As a special touch, each child receives a plush Cosmo or stress toy, serving as a loyal treatment buddy. This comforting companion reminds them that they're not alone while undergoing radiation therapy.

Compatible with Leading Technologies:

Cosmo for Kids animations are crafted for TrueBeam and Halcyon radiotherapy systems, and the ProBeam 360° system. Clinics can proctor sessions tailored to their own technology, offering personalized guidance to each child.

empowerME

Cosmo for Kids is backed by Varian and empowerME. Developed by cancer survivors, empowerME provides patient-centered information to address the challenges patients encounter during treatment. For information about empowerME can be found at varian.com/empowerME.

More information on Cosmo for Kids can be found at myVarian.com.

Cosmo for Kids materials are available under the "Resources" tab and "Marketing Your Center" drop-down selection. The materials include:

Animations

Four animations available to view and download for use with patients

Personalized Care

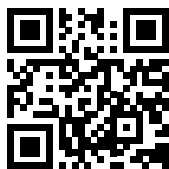

Two animations are tailored to children depending on their immobilization device

Cosmo Toys

Instructions on how to order the Cosmo plush and/or stress toys

Implementation Guidelines

Recommendations of how to implement Cosmo for Kids in the clinical setting
