

# MR Protocol Development & Optimization

Education & Workforce Solutions

➤ [siemens-healthineers.us/clinical-education-mri](https://siemens-healthineers.us/clinical-education-mri)

## Introduction

Advancing medical education with comprehensive training solutions for healthcare professionals can enhance staff competency, increase workforce productivity, and optimize clinical workflow.

Siemens Healthineers remote **MR Protocol Development and Optimization Support** packages can accelerate your training and maximize your system performance.

This offering included in the Siemens Healthineers education packages and is ideal for facilities aiming to:

- Prepare for a new system installation!
- Enhance protocols prior to onsite applications training!
- Optimize protocols at any stage in your system's lifecycle!

Whether you are onboarding new clinicians, updating your protocol tree, or implementing new licenses, our Clinical Education Experts can help you refine existing protocols or build new protocols tailored to your clinical needs on your MAGNETOM MR systems.

# Siemens Healthineers Academy

Your smarter connection to knowledge in digitalizing healthcare.

## Flexible support options

Choose the support package that fits your needs:

- 16-hours (recommended)
- 8-hours
- 4-hours

Combine packages to support specific use cases, such as protocol complexity or volume.

## Use case scenarios

### 16-hour Protocol Preparation Package

This package is ideal for customers seeking a comprehensive, in-depth protocol review and buildout. It supports up to two (2) days of focused collaboration.

This package is beneficial for:

- New MAGNETOM MR system installations
- Complex MAGNETOM MR system upgrades
- Deep Resolve license purchase
- Turbo Suite Excelerate license package
- Other purchased acceleration licenses packages
- Protocol overhaul for improved consistency, image quality, or workflow enhancements!
- New radiology group protocol implementation

### 8-hour Protocol Preparation Package

This package is ideal for customers looking for focused updates that do not require a complete overhaul of new or existing protocols.

This package is beneficial for:

- New radiologist requiring limited protocol modifications.
- Support for new patient examinations (e.g., cardiac, WholeBody, breast, etc.)
- Workflow driven protocol adjustments.
- Clinical driven protocol adjustments

### 4-hour Protocol Preparation Package

This package is ideal for customers looking for focused updates on a smaller number of new or existing protocols.

This package is beneficial for:

- Adjustments to specific protocols (e.g., high body weight MSK examinations)
- Implementation of new licenses that affect a limited number of protocols.
  - myExam Assist
  - New Coil integration
  - New sequence (e.g., QISS, NATIVE, TWIST, Wideband IR Cardiac, GRASP, etc.)
- Other specialized applications

#### Important Note:

The number of protocols developed or optimized varies based on the complexity, clinical goals, and customization required.

## Protocol Preparation Use Case Scenario Comparisons

Use Cases	16-hour	8-hour	4-hour
New System Installation	✓		
Complex System Upgrades	✓		
Deep Resolve License Implementation	✓		
Protocol overhaul for existing customers	✓		
Support for new clinical areas (Ologies)	✓	✓	
Limited adjustments to existing protocols		✓	✓
License implementation for limited protocols		✓	✓

## Ready to unlock greater efficiency and image quality?

**We're here to help you take the next step!**
