

DICOM Conformance Statement

Product Name: ACUSON Bonsai™
Ultrasound System

Release: VB10

Date: June 2020

1 CONFORMANCE STATEMENT OVERVIEW

This document describes the conformance to the ACR-NEMA DICOM 3.0 Standard by the ultrasound system of ACUSON Bonsai™. We specify ultrasound system generally refer to the products above in this document. The ultrasound system implements the necessary DICOM services to download worklists from an information system, save acquired Ultrasound (US) images and associated Structured Reports to a network storage device and/or removable media, print to a networked hardcopy device, query and retrieve the US images from a networked storage system, and inform the information system about the works actually done. Table 1 provides an overview of the supported network services, Table 2 lists the supported Media Storage Application Profiles, and Table 3 lists the supported Structured Report Templates.

The **ACUSON Bonsai™ Ultrasound System** supports the following DICOM Application Entities:

Table 1
NETWORK SERVICES

| SOP Classes | User of Service (SCU) | Provider of Service (SCP) |
|----------------------------------------------------|-----------------------|---------------------------|
| Transfer (Storage) | | |
| Verification | Yes | Yes |
| Ultrasound Image Storage | Yes | Yes |
| Ultrasound Multi-frame Image Storage | Yes | Yes |
| Secondary Capture Image Storage | Yes | Yes |
| Encapsulated PDF Storage | Yes | Yes |
| Raw Data Storage | Yes | Yes |
| Enhanced US Volume Storage | Yes | No |
| Query/Retrieve | | |
| Study Root Query/Retrieve Information Model – FIND | Yes | No |
| Study Root Query/Retrieve Information Model – MOVE | Yes | No |

| SOP Classes | User of Service (SCU) | Provider of Service (SCP) |
|-----------------------------------------------|-----------------------|---------------------------|
| Workflow Management | | |
| Modality Worklist Information Model – Find | Yes | No |
| Modality Performed Procedure Step | Yes | No |
| Storage Commitment Push Model | Yes | No |
| Print Management | | |
| Basic Color Print Management | Yes | No |
| Basic Grayscale Print Management | Yes | No |
| Notes, Reports, Measurements, Transfer | | |
| Comprehensive SR Storage | Yes | Yes |

Table 2
MEDIA SERVICES

| Media Storage Application Profile | Write Files (FSC / FSU) | Read Files (FSR) |
|-----------------------------------------------------------------------------------------------|-------------------------|------------------|
| Compact Disk - Recordable | | |
| STD-US-SC-SF&MF-CDR | Yes / Yes ¹ | Yes |
| DVD | | |
| STD-US-SC-SF&MF-DVD STD-US-SC-SF&MF-DVD-RAM | Yes / Yes ¹ | Yes |
| USB Devices | | |
| STD-GEN-USB-JPEG for Ultrasound images, Structured Reports and Encapsulated PDF Storage | Yes / Yes ¹ | Yes |

Note:

1 Only acts as a FSU for media that may be written to multiple times.

Table 3
STRUCTURED REPORTS

| Concept Name | Supported |
|------------------------------------|------------------|
| Echocardiography Procedure Report | Yes |
| Vascular Ultrasound Report | Yes |
| OB-GYN Ultrasound Procedure Report | Yes |

3 INTRODUCTION

3.1 Audience

This document is intended for potential customers, system integrators of medical equipment, marketing staff interested in system functionality and software designers implementing DICOM interfaces. It is assumed that the readers of this document are familiar with the DICOM Standard and with the terminology and concept which are used in the Standard. If readers are unfamiliar with DICOM terminology they should read the DICOM Standard, prior to reading this DICOM Conformance Statement document.

3.2 Remarks

The scope of this DICOM Conformance Statement is to facilitate integration between SIEMENS Products and other DICOM products. The Conformance Statement should be read and understood in conjunction with the DICOM Standard. DICOM by itself does not guarantee interoperability. The Conformance Statement does, however, facilitate a first-level comparison for interoperability between different applications supporting compatible DICOM functionality. This Conformance Statement is not supposed to replace validation with other DICOM equipment to ensure proper exchange of intended information. In fact, the user should be aware of the following important issues:

- The comparison of different Conformance Statements is the first step towards assessing interconnectivity and interoperability between SIEMENS medical equipment and other DICOM conformant equipments.

Test procedures should be defined and executed to validate the required level of interoperability with specific compatible DICOM equipment, as established by the healthcare facility.

The DICOM standard will evolve to meet the user's growing requirements. SIEMENS is actively involved in the development of the DICOM standard. Therefore, SIEMENS reserves the right to make changes to its products or to discontinue its delivery.

The Ultrasound System follows the IHE SWF, PDI, ED Profiles.

3.3 Terms and Definitions

Abstract Syntax – the information agreed to be exchanged between applications, generally equivalent to a Service/Object Pair (SOP) Class. Examples: Verification SOP Class, Modality Worklist Information Model Find SOP Class, Computed Radiography Image Storage SOP Class.

Application Context – the specification of the type of communication used between *Application Entities*. Example: DICOM network protocol.

Application Entity (AE) – an end point of a DICOM information exchange, including the DICOM network or media interface software; i.e., the software that sends or receives DICOM information objects or messages. A single device may have multiple Application Entities.

Application Entity Title – the externally known name of an *Application Entity*, used to identify a DICOM application to other DICOM applications on the network. The Called AE Title defines the intended receiver of an Association. Nevertheless, the Calling AE Title defines the requestor of an Association.

Application Profile - A Media Storage Application Profile defines a selection of choices at the various layers of the DICOM Media Storage Model which are applicable to a specific need or context in which the media interchange is intended to be performed.

Association – a network communication channel set up between *Application Entities*.

Association Establishment - an Association Establishment is the first phase of communication between two DICOM Application Entities. The AEs use the Association Establishment to negotiate how data will be encoded and the type of data to be exchanged.

Attribute – a unit of information in an object definition; a data element identified by a *tag*. The information may be a complex data structure (Sequence), itself composed of lower level data elements. Examples: Patient ID (0010,0020), Accession Number (0008,0050), Photometric Interpretation (0028,0004), Procedure Code Sequence (0008,1032).

DICOM File Format - the DICOM File Format provides a means to encapsulate in a File the Data Set representing a SOP Instance related to a DICOM Information Object.

DICOM Message Service Element (DIMSE) – a DIMSE defines the services and protocols utilized by an Application Entity to exchange messages.

File - a File is an ordered string of zero or more bytes, where the first byte is at the beginning of the file and the last byte is at the end of the File. Files are identified by an unique File ID and may be written, read, or deleted.

File Meta Information - the File Meta Information includes identifying information on the encapsulated Data Set. It is a mandatory header at the beginning of every DICOM File.

Information Object Definition (IOD) - the specified set of *Attributes* that comprise a type of data object; does not represent a specific instance of the data object, but rather a class of similar data objects that have the same properties. The *Attributes* may be specified as Mandatory (Type 1), Required but possibly unknown (Type 2), or Optional (Type 3), and there may be conditions associated with the use of an Attribute (Types 1C and 2C). Examples: Print Job IOD.

Joint Photographic Experts Group (JPEG) – a set of standardized image compression techniques, available for use by DICOM applications.

Module – a set of *Attributes* within an *Information Object Definition* that are logically related to each other. Example: Patient Module includes Patient Name, Patient ID, Patient Birth Date, and Patient Sex.

Negotiation – first phase of *Association* establishment that allows *Application Entities* to agree on the types of data to be exchanged and how that data will be encoded.

Physical Media - a piece of material with recording capabilities for streams of bits. Characteristics of a Physical Media include form factor, mechanical characteristics, recording properties and rules for recording and organizing bit streams in accessible structures.

Presentation Context – the set of DICOM network services used over an *Association*, as negotiated between *Application Entities*; includes *Abstract Syntaxes* and *Transfer Syntaxes*.

Protocol Data Unit (PDU) – a packet (piece) of a DICOM message sent across the network. Devices must specify the maximum size packet they can receive for DICOM messages.

Security Profile – a set of mechanisms, such as encryption, user authentication, or digital signatures, used by an *Application Entity* to ensure confidentiality, integrity, and/or availability of exchanged DICOM data

Service Class Provider (SCP) – role of an *Application Entity* that provides a DICOM network service; typically, a server that performs operations requested by another *Application Entity* (*Service Class User*). Examples: Picture Archiving and Communication System (image storage SCP, and image query/retrieve SCP), Radiology Information System (modality worklist SCP).

Service Class User (SCU) – role of an *Application Entity* that uses a DICOM network service; typically, a client. Examples: imaging modality (image storage SCU, and modality worklist SCU), imaging workstation (image query/retrieve SCU)

Service/Object Pair (SOP) Class – the specification of the network or media transfer (service) of a particular type of data (object); the fundamental unit of DICOM interoperability specification. Examples: Ultrasound Image Storage Service, Basic Grayscale Print Management.

Service/Object Pair (SOP) Instance – an information object; a specific occurrence of information exchanged in a *SOP Class*. Examples: a specific x-ray image.

Tag – a 32-bit identifier for a data element, represented as a pair of four digit hexadecimal numbers, the “group” and the “element”. If the “group” number is odd, the tag is for a private (manufacturer-specific) data element. Examples: (0010,0020) [Patient ID], (07FE,0010) [Pixel Data], (0019,0210) [private data element]

Transfer Syntax – the encoding used for exchange of DICOM information objects and messages. Examples: JPEG compressed (images), little endian explicit value representation.

Unique Identifier (UID) – a globally unique “dotted decimal” string that identifies a specific object or a class of objects; an ISO-8824 Object Identifier. Examples: Study Instance UID, SOP Class UID, SOP Instance UID.

Value Representation (VR) – the format type of an individual DICOM data element, such as text, an integer, a person’s name, or a code. DICOM information objects can be

transmitted with either explicit identification of the type of each data element (Explicit VR), or without explicit identification (Implicit VR); with Implicit VR, the receiving application must use a DICOM data dictionary to look up the format of each data element.

3.4 Acronyms, Abbreviations, and Symbols

The following acronyms and abbreviations are used in this document.

| | |
|----------|------------------------------------------------|
| ACR | American College of Radiology |
| AE | Application Entity |
| CDR | Compact Disk Recordable |
| DICOM | Digital Imaging and Communications in Medicine |
| DIMSE | DICOM Message Service Element |
| DIMSE-C | DICOM Message Service Element-Composite |
| FSC | File-Set Creator |
| FSR | File-Set Reader |
| FSU | File-Set Updater |
| HIS | Hospital Information System |
| IHE | Integrating the Healthcare Enterprise |
| IOD | Information Object Definition |
| ISO | International Standard Organization |
| JPEG | Joint Photographic Experts Group |
| MODALITY | Ultrasound System |
| MPPS | Modality Performed Procedure Step |
| MWL | Modality Worklist |
| NEMA | National Electrical Manufacturers Association |
| O | Optional (Key Attribute) |
| PACS | Picture Archiving and Communication System |
| PDU | Protocol Data Unit |
| R | Required (Key Attribute) |
| RIS | Radiology Information System |
| SCP | Service Class Provider |
| SCU | Service Class User |

| | |
|--------|-------------------------------------------------|
| SOP | Service Object Pair |
| SR | Structured Reporting |
| TCP/IP | Transmission Control Protocol/Internet Protocol |
| U | Unique (Key Attribute) |
| UL | Upper Layer |
| VR | Value Representation |
| US | Ultrasound |
| UID | Unique Identifier |

4 NETWORKING

4.1 Implementation Model

4.1.1 Application Data Flow

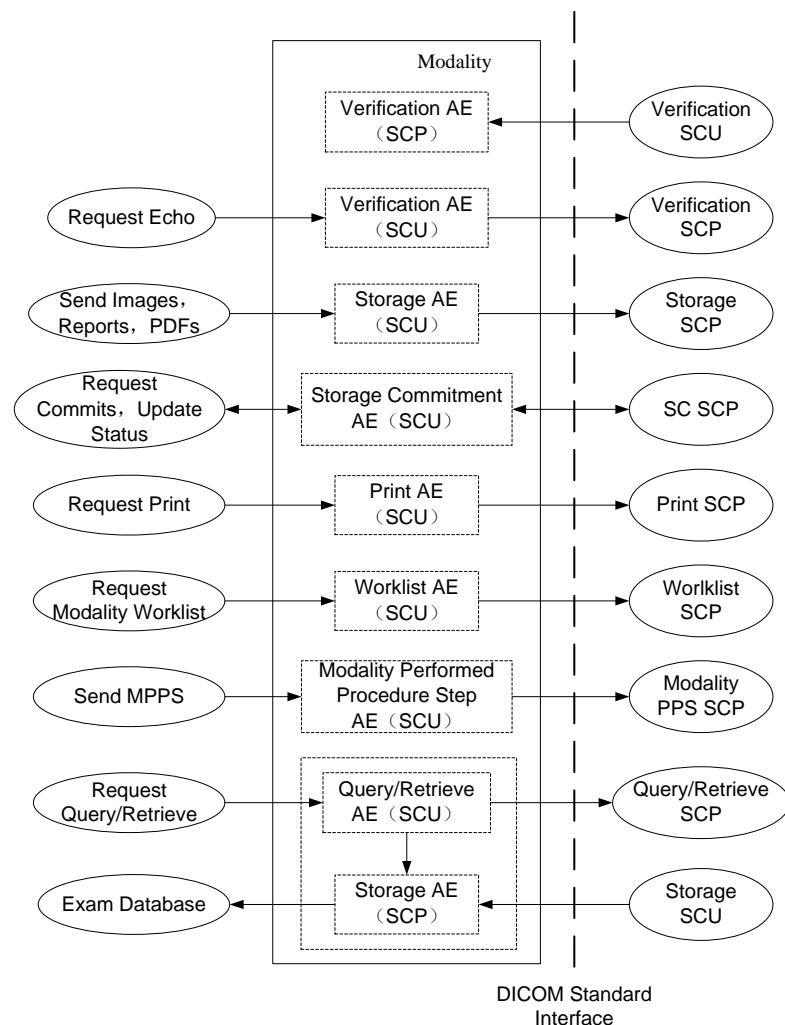

Figure 1

Implementation Model

Note : Storage AE (SCP) only be used in Query/Retrieve

This application entity provides a user interface, internal database and network listener that spawns additional threads as necessary to handle incoming connections.

Conceptually the network services may be modeled as the following AE's, however, in fact all the AE's share a single (configurable) AE Title:

- Verification AE (as SCU and SCP)
- Storage AE (as SCU and SCP)
- Storage Commitment AE (SCU)
- Print AE (as SCU)
- Worklist AE (as SCU)
- MPPS AE (as SCU)
- Query/Retrieve AE (as SCU)

4.1.2 Functional Definitions of AE's

4.1.2.1 Verification AE

The ultrasound system supports the Verification service as a SCU and SCP.

As a SCU, verification is activated when the verify button is selected on the dicom service configuration page where the verification results will also be showed to the user.

As a SCP, verification AE waits in the background for connections, will accept associations with Presentation Contexts for SOP Class of the Verification Service Class, and will respond successfully to echo requests.

4.1.2.2 Storage AE

As a SCU, the Storage AE originates associations for the transfer of DICOM Ultrasound single frame images, multi-frame images, secondary capture images, comprehensive structured reports ,and Encapsulated PDFs to remote AE (selected from a pre-configured list)..

The system supports automatic and manual storage.

The operations for automatic storage service are described below:

Operation 1

Step 1: Enable "Send or printing after End Exam" in the user preset.

Step 2: End Exam, the ended exam (maybe include images, SRs, PDFs) would automatically send to the default storage service SCPs which are set to be default in the DICOM service preset dialog.

Operation 2

Step 1: Open the system preset dialog and switch to the "key config" tab page.

Step 2: Set the shortcut key which means saving image to hard disk and combines the key with the function of sending image to the default DICOM storage SCPs.

Step 3: During the examining, the user can press the Send key to send image to default DICOM storage service SCPs.

The operations for manual storage service are described below:

Operation 1

Step 1: Select the images from thumbnail menu in main UI.

Step 2: Press “Send to” button and select DICOM Storage service SCPs.

Step 3: Send the images to the DICOM Storage service SCPs.

Operation 2

Step 1: Select exams in the iStation Dialog.

Step 2: Press “Send Exam” and select DICOM Storage service SCPs.

Step 3: Send the selected exams (maybe include images, SRs, PDFs) to the DICOM Storage service SCPs.

Operation 3

Step 1: Select thumbnail in the iStation Dialog.

Step 2: Press “Send to” button and select DICOM Storage service SCPs.

Step 3: Send the image to the DICOM Storage service SCPs.

Operation 4

Step 1: Open the review dialog and select the images.

Step 2: Press the “Send To” button to choose the storage SCPs.

Step 3: Send the images to the DICOM Storage service SCPs.

The SR only could be sent in the circumstance as below:

The exam type is obstetric, gynecology, cardiac or vascular.

The SR Key for the exam type must be installed in option preset UI.

Exam is the unit to send.

The status of the exam is "End", "Paused" or "Cancelled". SR would not be sent when an active exam is selected.

The DICOM storage service SCPs should be set as "Attach SR when Store Images" or "Only Store SR".

The Encapsulated PDF only could be sent in the circumstance as below:

Exam is the unit to send.

The status of the exam is "End", "Paused" or "Cancelled". Encapsulated PDF would not be sent when an active exam is selected.

The "Encapsulated PDF" should be enabled in DICOM storage service preset.

3D/4D images could send as pre-configuration form:

Table
3D/4D Transfer Option

4

| 3D/4D Option | SOP Class | SOP Class UID |
|--------------|-----------------------------|-----------------------------|
| Normal | US Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 |
| | US Multiframe Image Storage | 1.2.840.10008.5.1.4.1.1.3.1 |
| Volume | Enhanced US Volume Storage | 1.2.840.10008.5.1.4.1.1.6.2 |
| Rawdata | Raw Data Storage | 1.2.840.10008.5.1.4.1.1.66 |

Transfer with Rawdata form is mainly used for 4DViewer to get the raw data of the image. The Storage SCP received the image could not review it because the image information is coded in private form. 4DViewer or Diagnostic Ultrasound System could retrieve the file and review it.

In the event that the ultrasound system is taken off the network as a portable system or when a network failure occurs during a background store, the Storage SCU maintains a queue of failed C-STORE requests. If pre-configured on Preset UI, the failed C-Store requests will be automatically retried specified times. If no pre-configuration, the user can also retry the failed requests manually.

As a SCP, the Storage AE could only be used in Query/Retrieve, otherwise couldn't.

4.1.2.3 Storage Commitment AE

The Storage Commitment AE originates associations to ensure the reliable storage of DICOM composite information objects on remote DICOM device after sending DICOM Storage Service to the device.

The Storage Commitment service will be executed automatically in the circumstance as below:

The Storage Commitment Service is set to associate with the Storage Service in DICOM storage service preset dialog and the associated Storage Service is executed.

Exam is the unit to send.

The status of the exam is "End". It would not be executed when an "Active", "Paused" or "Cancelled" exam is selected.

4.1.2.4 Print AE

As a SCU, the Print AE originates associations for the print of DICOM Ultrasound single frame images and secondary capture images to remote AE (selected from a pre-configured list).

The system is capable of grayscale (B/W) and color print supporting with automatic and manual print functions.

The operations for automatic print service are described below:

Operation 1

Step 1: Enable "Send or printing after End Exam" in the user preset.

Step 2: End Exam, the single frame images and secondary capture images of ended exam would automatically send to the default print service SCPs which are set to be default in the DICOM service preset dialog.

Notes: This operation associates with the "Display Format" of the DICOM print preset, the DICOM print will be not active until one page is filled with the images or the exam end. For example, if the "Display Format" has been set to "STANDARD\2,3", the DICOM print will be not active until the shortcut key has been pressed 6 times. However, when the exam end, the DICOM print will be active even if one page is not filled.

Operation 2

Step 1: Open the system preset dialog and switch to the "key config" tab page.

Step 2: Set the shortcut key which means saving image to hard disk and combines the key with the function of sending image to the default DICOM print SCPs.

Step 3: During the examining, the user can press the print key to send image to default DICOM print service SCPs.

The operations for manual print service are described below:

Operation 1

Step 1: Select the images from thumbnail menu in main UI.

Step 2: Press “Send to” button and select DICOM print service SCPs.

Step 3: Send the images to the DICOM print service SCPs.

Operation 2

Step 1: Select exams in the iStation Dialog.

Step 2: Press “Send Exam” and select DICOM print service SCPs.

Step 3: Send the single frame images and secondary capture images of the selected exams to the DICOM print service SCPs.

Operation 3

Step 1: Select thumbnail in the iStation Dialog.

Step 2: Press “Send to” button and select DICOM print service SCPs.

Step 3: Send the image to the DICOM print service SCPs.

Operation 4

Step 1: Open the review dialog and select the images.

Step 2: Press the “Send To” button to choose the print SCPs.

Step 3: Send the images to the DICOM print service SCPs.

4.1.2.5 Worklist AE

The Worklist AE is activated through the Worklist UI when the user selects a remote AE to query (from a pre-configured list). The system supports automatic and manual query depending on its configuration on Preset UI. The system supports fuzzy query using “?” and “*”.

- If set one and only one remote AE to be default status. The system can initiate a query with default rules when show the Worklist UI. The Worklist Server is the default server. The Modality Type is US, the Exam Date is today, and the Scheduled Station AE Title is blank.
- Alternatively, if the default status is no, the user can specify query rules on Worklist UI. Such as Patient ID, Patient Name, Accession Number, Requested Procedure ID, Worklist Server, Exam Date, Modality Type and Scheduled Station AE Title.

If no matches are found, a dialogue will be presented to the user to indicate so. The possible reasons for this failure are listed to help trouble shooting.

If more than one matching patient found, user can discover lists number on the UI. The user can also change query rules for another query, or for further filter in local database to locate the patients quickly. And the lists can be sorted in ascending or descending order.

4.1.2.6 MPPS AE

MPPS AE sends event transactions that facilitate the transfer of exam procedure status from the ultrasound system to the information system.

MPPS messages are sent from the system under the following circumstances:

MPPS N-Create, Status = IN PROGRESS. Starting a new exam or reactive an exam result in automated creation of an MPPS Instance managed by a remote AE.

MPPS N-Set, Status = COMPLETE. Completion of the MPPS is performed as the result of an operator action of ending the exam.

MPPS N-Set, Status = DISCONTINUED. “Cancel Exam” causes the “Discontinued” status to be sent. User can select various reasons from the “Reason of cancel Exam” UI when need to cancel an exam.

4.1.2.7 Query/Retrieve AE

The Query/Retrieve AE supports the Query/Retrieve services as an SCU.

As a Query SCU, the system initiates a C-Find request to the remote SCP if pre-configured on the Preset UI, and then query is invoked directly by the user. The system supports fuzzy query using “?” and “*”.

For remote AE, no matter what the default status is, the user can specify query rules on Query/Retrieve UI. Such as Patient ID, Patient Name, Accession Number, Exam Date and select Search Key. If no matches are found, a dialogue will be presented to the user to indicate so. The user can also change query rules for another query, or for further filter in local database to locate the patients quickly.

As a Move SCU, the system supports the Study Root Query Model. The system can only retrieve ultrasound images or structured reports, whose modality attributes are "US" or "SR", but will leap all the other ones. Furthermore, the retrieval destination is only local host.

The system initiates a C-MOVE request to the remote Retrieve SCP when user selects items to retrieve. The remote Retrieve SCP in turn starts C-STORE sub operations to the ultrasound system.

User can discover lists number for queried items, as well as retrieval items. And the lists can be sorted in ascending or descending order.

The system can retrieve the 3D/4D images that have sent to PACS or other Storage SCP in rawdata form. After retrieving, the system can convert it to the identifiable format and review it.

4.1.3 Sequence of Real World Activities

All SCP activities are performed asynchronously in the background and not dependent on any sequencing.

All SCU activities are sequentially initiated in the user interface, and another activity may not be initiated until the prior activity has completed.

4.2 AE Specifications

4.2.1 Modality AE

4.2.1.1 SOP Classes

The ultrasound system provides Standard Conformance to the following SOP Class:

Table 5
SOP Class for Modality AE

| SOP Class Name | SOP Class UID | SCU | SCP |
|---------------------------------------------|-------------------------------|------------|------------------|
| Verification SOP Class | 1.2.840.10008.1.1 | Yes | Yes |
| US Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 | Yes | Yes ¹ |
| US Multiframe Image Storage | 1.2.840.10008.5.1.4.1.1.3.1 | Yes | Yes ¹ |
| Secondary Capture Image Storage | 1.2.840.10008.5.1.4.1.1.7 | Yes | Yes ₁ |
| Comprehensive Structured Report Storage | 1.2.840.10008.5.1.4.1.1.88.33 | Yes | Yes ¹ |
| Encapsulated PDF Storage | 1.2.840.10008.5.1.4.1.1.104.1 | Yes | Yes ¹ |
| Enhanced US Volume Storage | 1.2.840.10008.5.1.4.1.1.6.2 | Yes | No |
| Raw Data Storage | 1.2.840.10008.5.1.4.1.1.66 | Yes | Yes |
| Storage Commitment Push Model | 1.2.840.10008.1.20.1 | Yes | No |
| Basic Grayscale Print Management Meta | 1.2.840.10008.5.1.1.9 | Yes | No |
| Basic Color Print Management Meta SOP Class | 1.2.840.10008.5.1.1.18 | Yes | No |
| Basic Film Session SOP Class | 1.2.840.10008.5.1.1.1 | Yes | No |
| Basic Film Box SOP Class | 1.2.840.10008.5.1.1.2 | Yes | No |
| Basic Grayscale Image Box SOP Class | 1.2.840.10008.5.1.1.4 | Yes | No |

| | | | |
|----------------------------------------------------|-----------------------------|-----|----|
| Printer SOP Class | 1.2.840.10008.5.1.1.16 | Yes | No |
| Print Job SOP Class | 1.2.840.10008.5.1.1.14 | Yes | No |
| Modality Worklist Information Model–Find | 1.2.840.10008.5.1.4.31 | Yes | No |
| Modality Performed Procedure Step SOP Class | 1.2.840.10008.3.1.2.3.3 | Yes | No |
| Study Root Query/Retrieve Information Model - Find | 1.2.840.10008.5.1.4.1.2.2.1 | Yes | No |
| Study Root Query/Retrieve Information Model - Move | 1.2.840.10008.5.1.4.1.2.2.2 | Yes | No |

Note : 1 Yes only used in Query/Retrieve, otherwise No.

4.2.1.2 Association Establishment Policies

General

The DICOM standard application context name for DICOM 3.0 is always proposed:

| | |
|--------------------------------------------------|----------|
| Table | 6 |
| DICOM Application Context for Modality AE | |

| | |
|--------------------------|-----------------------|
| Application Context Name | 1.2.840.10008.3.1.1.1 |
|--------------------------|-----------------------|

The PDU size is configurable with a minimum size of 16,384 and a maximum size of 65,536.

The default PDU size is 32,768.

Number of Associations

The system initiates one Association at a time for each destination to which a transfer request is being processed in the active job queue list. Since Storage and Print tasks are executed within a same thread, when they are selected simultaneously, only one job will be active at a time, the other(s) remain pending until the active job is successful or failed.

| | |
|-----------------------------------------------------------|----------|
| Table | 7 |
| Number of Associations as an Association Initiator | |

| | |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

| | |
|----------------------------------------------------------|----------|
| Table | 8 |
| Number of Associations as an Association Acceptor | |

| | |
|---------------------------------------------|---|
| Maximum number of simultaneous associations | 1 |
|---------------------------------------------|---|

Asynchronous Nature

The ultrasound system will only allow a single outstanding operation on an association.

Implementation Identifying Information

| | |
|---------------------------------------------------------------|----------|
| Table | 9 |
| DICOM Implementation Class and Version for Modality AE | |

| | |
|-----------------------------|-------------------------------|
| Implementation Class UID | 1.2.156.112536.1.2116.0.1.0.1 |
| Implementation Version Name | SIEMENS_V1.1 |

4.2.1.3 Association Initiation Policy

Activity – Request Echo

Description and Sequencing of Activities

The user can verify the existence of a DICOM server on the hospitals network, through a button in the ‘DICOM Service’ screen. When the user presses this button, the ultrasound system will initiate the association.

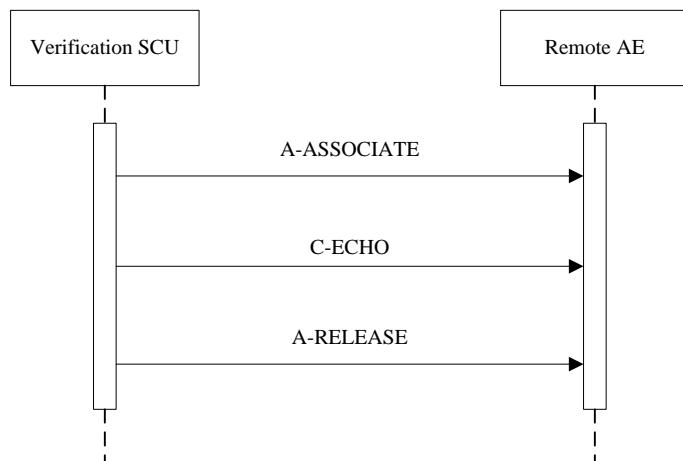

Figure 2
Sequencing of Activity – Send Echo Request

Proposed Presentation Contexts

The Verification AE (as SCU) supports the following Presentation Contexts for Verification.

Table 10
Presentation Contexts for Verification

| PROPOSED PRESENTATION CONTEXTS | | | | | |
|--------------------------------|-----------------------|--------------------------|---------------------|------|-----------|
| Abstract Syntax | | Transfer Syntax | | Role | Ext. Neg. |
| Name | UID | Name | UID | | |
| Verification | 1.2.840.100 08.1.1 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | SCU | None |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | SCU | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | SCU | None |

SOP Specific Conformance

It summarizes the behavior of Ultrasound System when receiving status codes in a C-ECHO response.

Table 11

Verification C-Echo Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior (as SCU) |
|----------------|-------------------|-----------------------|--------------------------------------------|
| Success | Success | 0000 | Device Status is set to: Verify Successful |
| Refused | Out of Resources | A7XX | Device Status is set to: Verify Failed |
| Failed | Unable to process | CXXX | Device Status is set to: Verify Failed |
| * | * | Any other status code | Device Status is set to: Verify Failed |

Activity – Store images, SRs, PDFs, 3D/4D images

Description and Sequencing of Activities

For each exam, image selected from the user interface to be transferred, an attempt will be made to transfer it to the selected remote AE. When the storage fails, not only the failed task will automatically retry specific times if configured on Preset UI, but also user can restart the failed task by pressing "Retry" Button on the ultrasound task management dialog. Besides that, in the event that the ultrasound system is taken off the network or when a network failure occurs during a background store, the Storage SCU maintains a queue of failed C-STORE requests. Once the network is restored, the system will retry automatically.

Structured Reports will contain a part of common used measurements and calculations created by ultrasound system, and custom measurements or calculations will also be sent in SR

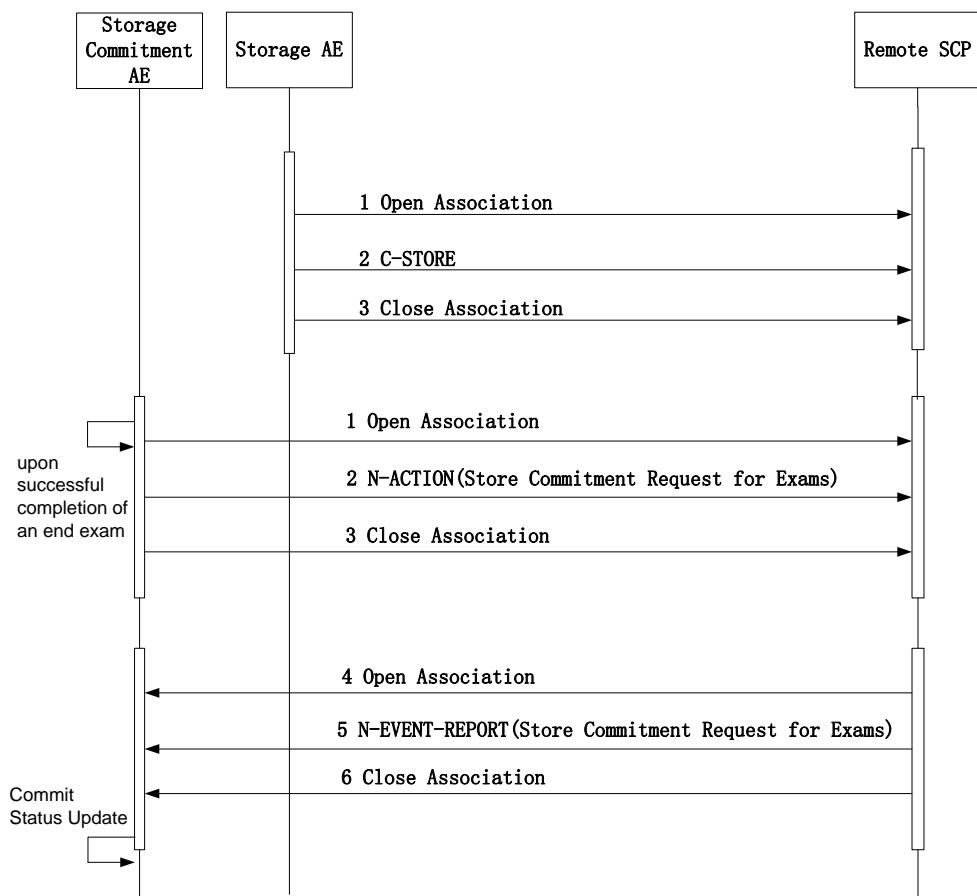

If custom measurements or calculations were defined, all custom measurements or calculations will be contained in private elements(M-99999,MRUS, "custom-measurement-name") in SR, where " custom-measurement-name " means the name of user custom measurement in the ultrasound system.

The OB and Gyn exam types create OB-GYN Ultrasound Procedure Reports.

The Adult Card exam type creates Adult Echocardiography Reports.

The Abd, Uro and Vas exam types create Vascular Reports

The Breast exam types create Breast Imaging Reports.

Figure

Sequencing of Activity – Send Storage Request

3

Proposed Presentation Contexts

If Storage AE is offered a choice of Transfer Syntaxes in the accepted Presentation Contexts, it will apply the first encountered to use for the C-STORE operation. As to Compress Transfer Syntaxes, it will apply the user configured one.

Table

Proposed Presentation Contexts for Storage

| PROPOSED PRESENTATION CONTEXTS | | | | | | |
|--------------------------------|------------------------------------|-----------------------------------------------------------------|----------------------------|-----|------|-----------|
| Abstract Syntax | | Transfer Syntax | | | Role | Ext. Neg. |
| Name | UID | Name | UID | | | |

SOP Specific Conformance

Storage AE provides Standard Conformance to the Storage Service Class.

Storage AE will behave as described in the Table below in response to the status returned in the C-STORE response command message.

Table

13

Storage C-STORE Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-----------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | Image transmission is successful, The status code is logged and the task success is reported to the user via task management. |
| Refused | Out of Resources | A7xx | The association is aborted using A-ABORT and the send task is marked as failed. The reason is logged and, If user selects the failed task, the reasons for this failure will be showed via task management. |
| Error | Data Set does not match SOP Class | A9xx | The association is aborted using A-ABORT and the send task is marked as failed. The reason is logged and, If user selects the failed task, the reasons for this failure will be showed via task management. |
| Error | Cannot Understand | Cxxx | The association is aborted using A-ABORT and the send job is marked as failed. The reason is logged and, If user selects the failed task, the reasons for this failure will be showed via task management. |
| Failure | Any other failure | xxxx | The association is aborted using A-ABORT and the send job is marked as failed. The reason is logged and, If user selects the failed task, the reasons for this failure will be showed via task management. |
| Warning | Coercion of Data Elements | B000 | Image transmission is considered successful but the status meaning is logged. |

| | | | |
|--|-----------------------------------|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Data Set does not match SOP Class | B007 | Image transmission is considered successful but the status meaning is logged. |
| | Elements Discarded | B006 | Image transmission is considered successful but the status meaning is logged. |
| | Any other status code. | xxxx | The Association is aborted using A-ABORT and the send job is marked as failed. The status code is logged and the job failure is reported to the user via task management. |

The behavior during communication failure is summarized in the Table below:

Table 14

Storage Communication Failure Behavior

| Exception | Behavior |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeout | The Association is aborted using A-ABORT and the send job is marked as failed. The reason is logged and the job failure is reported to the user via task management. |
| Association aborted by the SCP or network layers | The send job is marked as failed. The reason is logged and the job failure is reported to the user via task management. |

The following tables provide the list of attributes requested in the Storage.

Conventions used for the Value(s) and Comments section are:

MWL – the attribute value source is from Modality WORKLIST

USER – the attribute value source is from User's input

AUTO – automatically generated by the MODALITY system

CONFIG - the attribute value source is a configurable parameter

Activity – Film Images

Description and Sequencing of Activities

A user composes images onto film sheets and requests them to be sent to a specific hardcopy device. The user can select the desired film format and number of copies. Each print-job is forwarded to the job queue and processed individually.

The system is invoked by the user on “Send to” UI if the print remote AE is pre-configured. Status of the print-job is reported through task management UI. If pre-configured on Preset UI, the failed print task will be automatically retried specified times. If no pre-configuration, the user can also retry manually. Only one task will be active at a time for each separate hardcopy device. The same as Storage, the system could retry automatically the failed task caused by network failure, when the network is restored.

A typical sequence of DIMSE messages sent over an association between Print AE and a Printer is illustrated in **Error! Reference source not found.**:

Print AE opens an association with the Printer.

N-GET on the Printer SOP Class is used to obtain current printer status information.

N-CREATE on the Film Session SOP Class creates a Film Session.

N-CREATE on the Film Box SOP Class creates a Film Box linked to the Film Session. A single Image Box will be created as the result of this operation (Print AE default uses the format STANDARD\1.1, but user can change it on Preset UI).

N-SET on the Image Box SOP Class transfers the contents of the film sheet to the printer.

N-ACTION on the Film Box SOP Class instructs the printer to print the Film Box.

The Printer prints the requested number of film sheets.

The Printer asynchronously reports its status via N-EVENT-REPORT notification (Printer SOP Class). The Printer can send this message at any time. Print AE does not require the N-EVENT-REPORT to be sent. Print AE is capable of receiving an N-EVENT-REPORT notification at any time during an association.

N-DELETE on the Film Box SOP Class deletes the complete Film box SOP Instance hierarchy.

N-DELETE on the Film Session SOP Class deletes the complete Film Session SOP Instance hierarchy.

Print AE closes the association with the Printer.

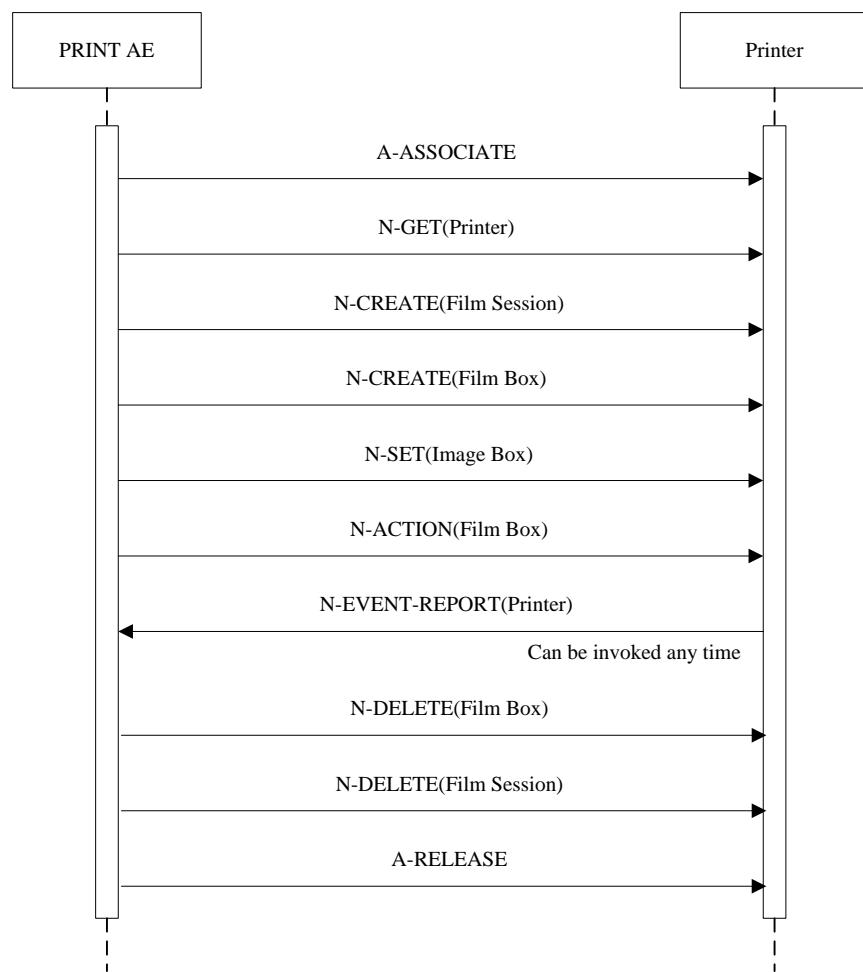

Figure 4
Sequencing of Activity – Film Images

Proposed Presentation Contexts

Print AE is capable of proposing the Presentation Contexts shown in the Table below:

Table 50
Proposed Presentation Contexts for Activity Film Images

| Presentation Context Table | | | | | |
|----------------------------|-----------------------|------------------------------|-------------------|------|-----------|
| Abstract Syntax | | Transfer Syntax | | Role | Ext. Neg. |
| Name | UID | Name List | UID List | | |
| Basic Grayscale | 1.2.840.10008.5.1.1.9 | Implicit VR Little Endian | 1.2.840.10008.1.2 | SCU | None |

| | | | | | |
|-----------------------------------|------------------------|--------------------------|---------------------|-----|------|
| Print Management Meta | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | SCU | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | SCU | None |
| Basic Color Print Management Meta | 1.2.840.10008.5.1.1.18 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | SCU | None |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | SCU | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | SCU | None |
| | | | | | |

Common SOP Specific Conformance for all Print SOP Classes

The general behavior of Print AE during communication failure is summarized in the Table below. This behavior is common for all SOP Classes supported by Print AE.

Table

51

Print AE Communication Failure Behavior

| Exception | Behavior |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------|
| Timeout | The association is aborted using A-ABORT and the print-job is marked as failed. |
| Association aborted by the SCP or network layers | The print-job is marked as failed. The reason is logged and the job failure is reported to the user. |

Recommended abbreviations to be used for the tables are:

- VNAP Value Not Always Present (attribute sent zero length if no value is present)
- ANAP Attribute Not Always Present
- ALWAYS Always Present with a value
- EMPTY Attribute is sent without a value

Recommended abbreviations to be used for the source of the data values in the tables are:

- USER the attribute value source is from User input
- AUTO the attribute value is generated automatically
- CONFIG the attribute value source is a configurable parameter
- PRINTER the attribute value is provided by printer

SOP Specific Conformance for the Printer SOP Class

Print AE supports the following DIMSE operations and notifications for the Printer SOP Class:

- N-GET
- N-EVENT-REPORT

Details of the supported attributes and status handling behavior are described in the following subsections.

Printer SOP Class Operations (N-GET)

Print AE uses the Printer SOP Class N-GET operation to obtain information about the current printer status. The attributes excepted via N-GET are listed in the Table below:

Table

52

Printer SOP Class N-GET Request Attribute Identifier List

| Attribute Name | Tag |
|--------------------------|-------------|
| Printer Status | (2110,0010) |
| Printer Status Info | (2110,0020) |
| Printer Name | (2110,0030) |
| Manufacturer | (0008,0070) |
| Manufacturer Model Name | (0008,1090) |
| Device Serial Number | (0018,1000) |
| Software Version(s) | (0018,1020) |
| Date of Last Calibration | (0018,1200) |
| Time of Last Calibration | (0018,1201) |

The behavior of Print AE when encountering status codes in a N-GET response is summarized in the Table below:

Table

53

Printer SOP Class N-GET Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-----------------|------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The request to get printer status information was success. |
| Warning | any warning | xxxx | The print-job continues to be printed. |
| Failure | any failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

Printer SOP Class Notifications (N-EVENT-REPORT)

Print AE is capable of receiving an N-EVENT-REPORT request at any time during an association. The behavior of Print AE when receiving Event Types within the N-EVENT-REPORT is summarized in the **Error! Reference source not found..**

Table 54
Printer SOP Class N-Event-Report Behavior

| Event Type Name | Event Type ID | Behavior |
|-----------------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Normal | 1 | The print-job continues to be printed. |
| Warning | 2 | The print-job continues to be printed. The contents of Printer Status Info (2110, 0020) is logged and reported to the user via the job-control application. |
| Failure | 3 | The print-job is marked as failed. The contents of Printer Status Info (2110, 0020) is logged and reported to the user via the job-control application. |
| * | * | An invalid Event Type ID will cause a status code of 0113H to be returned in a N-EVENT-REPORT response. |

The reasons for returning specific status codes in a N-EVENT-REPORT response are summarized in the Table below:

Table 55
Printer SOP Class N-EVENT-REPORT Response Status Reasons

| Service Status | Further Meaning | Error Code | Reasons |
|----------------|--------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The notification event has been successfully received. |
| Failure | No Such Event Type | 0113H | An invalid Event Type ID was supplied in the N-EVENT-REPORT request. |
| Failure | Processing Failure | 0110H | An internal error occurred during processing of the N-EVENT-REPORT. A short description of the error will be returned in Error Comment (0000, 0902). |

SOP Specific Conformance for the Film Session SOP Class

Print AE supports the following DIMSE operations for the Film Session SOP Class:

- N-CREATE
- N-DELETE

Details of the supported attributes and status handling behavior are described in the following subsections.

Film Session SOP Class Operations (N-CREATE)

The attributes supplied in an N-CREATE Request are listed in the Table below:

Table
56
Film Session SOP Class N-CREATE Request Attributes

| Attribute Name | Tag | VR | Value | Presence of Value | Source |
|------------------|-------------|----|------------------------------|-------------------|--------|
| Number of Copies | (2000,0010) | IS | [1, 100] | ALWAYS | CONFIG |
| Print Priority | (2000,0020) | CS | LOW, MED,HIGH | ALWAYS | CONFIG |
| Medium Type | (2000,0030) | CS | BLUE FILM, CLEAR FILM, PAPER | ALWAYS | CONFIG |
| Film Destination | (2000,0040) | CS | MAGAZINE, PROCESSOR | ALWAYS | CONFIG |

The behavior of Print AE when encountering status codes in a N-CREATE response is summarized in the Table below:

Table
57
Film Session SOP Class N-CREATE Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|---------------------------------|------------|---------------------------------------------------|
| Success | Success | 0000 | The SCP has completed the operation successfully. |
| Warning | Memory allocation not supported | B600 | The N-CREATE operation is considered successful. |

| | | | |
|---------|-------------|------|----------------------------------------------------------------------------------------------------------------------------------------|
| Warning | any warning | xxxx | The N-CREATE operation is considered successful. |
| Failure | any failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

Film Session SOP Class Operations (N-DELETE)

The behavior of Print AE when encountering status codes in a N-DELETE response is summarized in the Table below:

Table **58**
Printer SOP Class N-DELETE Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-----------------|------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The SCP has completed the operation successfully. |
| Warning | Any warning | xxxx | The N-DELETE operation is considered successful. |
| Failure | Any failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

SOP Specific Conformance for the Film Box SOP Class

Print AE supports the following DIMSE operations for the Film Box SOP Class:

- N-CREATE
- N-ACTION
- N-DELETE

Details of the supported attributes and status handling behavior are described in the following subsections.

Film Box SOP Class Operations (N-CREATE)

The attributes supplied in an N-CREATE Request are listed in the Table below:

Table **59**
Film Box SOP Class N-CREATE Request Attributes

| Attribute Name | Tag | VR | Value | Presence of Value | Source |
|----------------------|-------------|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--------|
| Image Display Format | (2010,0010) | CS | PORTRAIT: STANDARD\1,1 STANDARD\1,2 STANDARD\1,3 STANDARD\2,1 STANDARD\2,2 STANDARD\2,3 STANDARD\2,4 STANDARD\3,3 STANDARD\3,4 STANDARD\3,5 | ALWAYS | CONFIG |

The behavior of Print AE when encountering status codes in a N-CREATE response is summarized in the Table below:

Table 60
Film Box SOP Class N-CREATE Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|---------------------------------------------------------------------------|------------|---------------------------------------------------|
| Success | Success | 0000 | The SCP has completed the operation successfully. |
| Warning | Requested Min Density or Max Density outside of printer's operating range | B605H | The N-CREATE operation is considered successful. |
| Warning | Any other warning | xxxx | The N-CREATE operation is considered successful. |
| Failure | There is an existing Film Box that has | C616H | C The association is aborted using |

| | | | |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------------------------------------------------------------------------------------------------------------------------------|
| | not been printed and N-ACTION at the Film Session level is not supported. A new Film Box will not be created when a previous Film Box has not been printed. | | A-ABORT and the print-job is marked as failed. The status meaning is logged and the job failure is reported to the user. |
| Failure | Any failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

Film Box SOP Class Operations (N-ACTION)

An N-ACTION Request is issued to instruct the Print SCP to print the contents of the Film Box. The Action Reply argument in an N-ACTION response is not evaluated.

The behavior of Print AE when encountering status codes in a N-ACTION response is summarized in the Table below:

Table

61

Film Box SOP Class N-ACTION Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The SCP has completed the operation successfully. The film has been accepted for printing. |
| Warning | Film Box SOP Instance hierarchy does not contain Image Box SOP Instances (empty page) | B603H | The N-ACTION operation is considered successful. |
| Warning | Image size is larger than Image Box size. The image has been demagnified. | B604H | The N-ACTION operation is considered successful. |
| Warning | Image size is larger than Image Box size. The image has been cropped to fit. | B609H | The N-ACTION operation is considered successful. |
| Warning | Image size or Combined Print Image Size is larger than Image Box size. The image or combined Print Image has been decimated to fit. | B60AH | The N-ACTION operation is considered successful. |
| Warning | Any other warning | xxxx | The N-ACTION operation is considered successful. |
| Failure | Unable to create Print Job SOP Instance; print queue is full. | C602 | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure | Image size is larger than Image Box size. | C603 | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure | Combined Print Image Size is | C613 | The Association is aborted using A- |

| | | | |
|---------|-----------------------------|------|----------------------------------------------------------------------------------------------------------------------------------------|
| | larger than Image Box size. | | ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure | Any other failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

Film Session SOP Class Operations (N-DELETE)

The behavior of Print AE when encountering status codes in a N-DELETE response is summarized in the Table below:

Table 62
Printer SOP Class N-DELETE Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The SCP has completed the operation successfully. |
| Warning | Any warning | xxxx | The N-DELETE operation is considered successful. |
| Failure | Any other failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

SOP Specific Conformance for the Image Box SOP Class

Print AE supports the following DIMSE operations for the Image Box SOP Class:

— **N-SET**

Details of the supported attributes and status handling behavior are described in the following subsections.

Image Box SOP Class Operations (N-SET)

The attributes supplied in an N-SET Request are listed in the Table below:

Table 63
Image Box SOP Class N-SET Request Attributes

| Attribute Name | Tag | VR | Value | Presence of Value | Source |
|--------------------------------|-------------|----|----------------------|---------------------------------------------|--------|
| Image Position | (2020,0010) | US | [1, num_image1] | ALWAYS | AUTO |
| Basic Grayscale Image Sequence | (2020,0111) | SQ | | If the service is configured as MONOCHROME2 | AUTO |
| >Samples Per Pixel | (0028,0002) | US | 1 | ALWAYS | AUTO |
| >Photometric Interpretation | (0028,0004) | CS | MONOCHROME2 | ALWAYS | CONFIG |
| >Rows | (0028,0010) | US | Depends on film size | ALWAYS | AUTO |
| >Columns | (0028,0011) | US | Depends on film | ALWAYS | AUTO |

| | | | | | |
|-----------------------------|-------------|----|-------------------------------|-------------------------------------|--------|
| | | | size | | |
| Pixel Aspect Ratio | (0028,0034) | IS | Set to zero length | VNAP | AUTO |
| >Bits Allocated | (0028,0100) | US | 8 | ALWAYS | AUTO |
| >Bits Stored | (0028,0101) | US | 8 | ALWAYS | AUTO |
| >High Bit | (0028,0102) | US | 7 | ALWAYS | AUTO |
| >Pixel Representation | (0028,0103) | US | 0 | ALWAYS | AUTO |
| >Pixel Data | (7FE0,0010) | OB | Pixels of rendered film sheet | ALWAYS | AUTO |
| Basic Color Image Sequence | (2020,0111) | SQ | | If the service is configured as RGB | AUTO |
| >Samples Per Pixel | (0028,0002) | US | 3 | ALWAYS | AUTO |
| >Photometric Interpretation | (0028,0004) | CS | RGB | ALWAYS | CONFIG |
| >Planar Configuration | (0028,0006) | US | 1 | ALWAYS | AUTO |
| >Rows | (0028,0010) | US | Depends on film size | ALWAYS | AUTO |
| >Columns | (0028,0011) | US | Depends on film size | ALWAYS | AUTO |
| Pixel Aspect Ratio | (0028,0034) | IS | Set to zero length | VNAP | AUTO |
| >Bits Allocated | (0028,0100) | US | 8 | ALWAYS | AUTO |
| >Bits Stored | (0028,0101) | US | 8 | ALWAYS | AUTO |
| >High Bit | (0028,0102) | US | 7 | ALWAYS | AUTO |
| >Pixel Representation | (0028,0103) | US | 0 | ALWAYS | AUTO |
| >Pixel Data | (7FE0,0010) | OB | Pixels of rendered film sheet | ALWAYS | AUTO |

Note : 1 If the attribute of Image Display Format is (STANDARD\m, n), num_image is m*n.

The behavior of Print AE when encountering status codes in a N-SET response is summarized in the Table below:

Table
Image Box SOP Class N-SET Response Status Handling Behavior

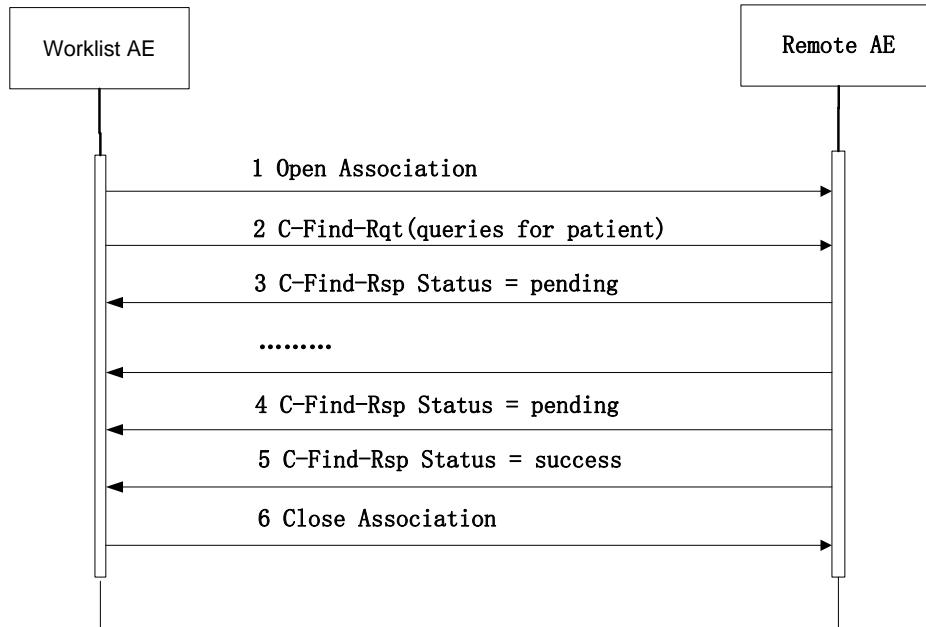

64

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|--------------------------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | Image print is successful, The status code is logged and the task success is reported to the user via task management. |
| Warning | Image size is larger than Image Box size. The image has been | B604H | The N-SET operation is considered successful. |

| | | | |
|---------|-------------------------------------------------------------------------------------------------------------------------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------|
| | demagnified. | | |
| Warning | Requested Min Density or Max Density outside of printer's operating range. | B605H | The N-SET operation is considered successful. |
| Warning | Image size is larger than Image Box size. The image has been cropped to fit. | B609H | The N-SET operation is considered successful. |
| Warning | Image size or Combined Print Image Size is larger than Image Box size. The image or combined Print Image has been decimated to fit. | B60AH | The N-SET operation is considered successful. |
| Warning | Any other warning | xxxx | The N-SET operation is considered successful. |
| Failure | Image size is larger than Image Box size. | C603 | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure | Insufficient memory in printer to store the image. | C605 | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure | Combined Print Image Size is larger than Image Box size. | C613 | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |
| Failure | Any other failure | xxxx | The Association is aborted using A-ABORT and the print-job is marked as failed. The status meaning is logged and reported to the user. |

Activity – Send Find Request

Description and Sequencing of Activities

Figure

5

Sequencing of Activity – Send FIND Request

A possible sequence of interactions between the Worklist AE and a remote AE (e.g. a system such as a RIS or HIS; or a PACS) is illustrated in the Figure below:

The Worklist AE opens an association with the remote AE

The Worklist AE sends a C-FIND request to the remote AE containing the Query attributes.

The remote AE returns a C-FIND response containing the requested attributes of the first matching Item.

The remote AE returns another C-FIND response containing the requested attributes of the second matching Item. And then another one.

When the remote AE returns all the C-FIND responses with status Success indicating that no further matching Items exist.

The C-Find AE closes the association with the remote AE.

Proposed Presentation Contexts

Table

65

Proposed Presentation Contexts for Worklist AE

| Presentation Context Table | | | | | |
|--------------------------------------------|------------------------|---------------------------|---------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name | UID | | |
| Modality Worklist Information Model – Find | 1.2.840.10008.5.1.4.31 | Implicit VR Little Endian | 1.2.840.10008.1.2 | SCU | None |
| | | Explicit VR Little Endian | 1.2.840.10008.1.2.1 | SCU | None |
| | | Explicit VR Big Endian | 1.2.840.10008.1.2.2 | SCU | None |

Worklist AE will propose Presentation Contexts for the SOP Classes listed above. For these SOP Class, Worklist AE will propose multiple Presentation Contexts, one for each of the supported Transfer Syntaxes.

If Worklist AE is offered a choice of Transfer Syntaxes in the accepted Presentation Contexts, it will apply the first encountered to use for the C-FIND operation.

SOP Specific Conformance

Table
66
C_FIND Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior (as SCU) |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Refused | Out of resources | A700 | The association is aborted using A-ABORT and a notify message is displayed: Some errors happen when query worklist server. |
| Failed | Identifier Does Not Match SOP Class | A900 | |
| Failed | Unable to process | Cxxx | |
| Cancel | Matching terminated due to Cancel request | FE00 | / |
| Success | Matching is complete - No final Identifier is supplied. | 0000 | Patient lists show on the UI |
| Pending | Matches are continuing - Current Match is supplied and any Optional Keys were supported in the same manner as Required Keys. | FF00 | The worklist item contained in the Identifier is collected for later display or further processing. |
| Pending | Matches are continuing - Warning that one or more Optional Keys were not supported for existence for this Identifier. | FF01 | The worklist item contained in the Identifier is collected for later display or further processing. |
| * | The Association is aborted using A-ABORT and the query is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in the Response will be logged. | Any other status code. | The association is aborted using A-ABORT and a notify message is displayed: Some errors happen when query worklist server. |

Worklist AE provides Standard Conformance to the Storage Service Class.

Worklist AE will behave as described in the **Error! Reference source not found.** in response to the status returned in the C-FIND response command message.

The behavior of Ultrasound System during communication failure is summarized in the Table below.

Table 67

COMMUNICATION FAILURE BEHAVIOR FOR WORKLIST AE

| Exception | Behavior |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Timeout | The Association is aborted using A-ABORT and the query marked as failed. The reason is logged and reported to the user if an interactive query. |
| Association aborted by the SCP or network layers | The query is marked as failed. The reason is logged and reported to the user if an interactive query. |

The Table below provides a description of the Ultrasound system Query Request Identifier and specifies the attributes that are copied into the images. Unexpected attributes returned in a C-FIND response are ignored.

Requested return attributes not supported by the SCP are set to have no value. Non-matching responses returned by the SCP due to unsupported optional matching keys are ignored. No attempt is made to filter out possible duplicate entries.

Table 68

Worklist Request Identifier

| ATTRIBUTE | VR | ATTRIBUTE NAME | MATCHING KEYS | RETURN KEYS |

The convention used for Matching Keys is:

X - Return keys. An " X " indicates that MODALITY supplies this attribute as a Return Key with zero length for Universal Matching.

DI – Display to the user.

Activity – Send MPPS Request

Description and Sequencing of Activities

Figure

6

Sequencing of Activity – MPPS progress

A possible sequence of interactions between the MPPS AE and a Remote AE (Departmental Scheduler, e.g. a device such as a RIS or HIS which supports the MPPS SOP Class as an SCP) is illustrated in Figure B.4.2-4:

The MPPS AE opens an association with the Remote AE.

The MPPS AE sends an N-CREATE request to the Remote AE to create an MPPS

instance with status of “IN PROGRESS” and create all necessary attributes. The Remote AE acknowledges the MPPS creation with an N-CREATE response (status success).

The MPPS AE closes the association with the Remote AE.

All images are acquired and stored in the local database.

The MPPS AE opens an association with the Remote AE.

The MPPS AE sends an N-SET request to the Remote AE to update the MPPS instance with status of “COMPLETED” and set all necessary attributes. The Departmental Scheduler acknowledges the MPPS update with an N-SET response (status success).

The MPPS AE closes the association with the Remote AE.

Note: The Cancel and End Exam commands are mutually exclusive. They are both represented here for illustration purposes only. Actual workflow uses one or the other for a given exam.

For each exam step transfer, an attempt will be made to transmit it to the selected remote AE. If it fails, it will automatically retry specific times if configured on Preset UI..

Proposed Presentation Contexts

Table 69
Proposed Presentation Contexts for MPPS AE

| Presentation Context Table | | | | | |
|---------------------------------------------|-------------------------|--------------------------|---------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name | UID | | |
| Modality Performed Procedure Step SOP Class | 1.2.840.10008.3.1.2.3.3 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | SCU | None |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | | None |

MPPS-SCU will propose Presentation Contexts for the SOP Classes listed above. For these SOP Class, MPPS-SCU will propose multiple Presentation Contexts, one for each of the supported Transfer Syntaxes.

If MPPS AE is offered a choice of Transfer Syntaxes in the accepted Presentation Contexts, it will apply the first encountered to use for the MPPS AE operation.

SOP Specific Conformance

MPPS AE provides Standard Conformance to the MPPS Service Class.

MPPS-SCU will behave as described in the Table below in response to the status returned in the N-Create or N-Set response command message.

Table 70

MPPS N-CREATE / N-SET Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-------------------------------------------------------------------------------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The SCP has completed the operation successfully. |
| Failure | Processing Failure – Performed Procedure Step Object may no longer be updated | 0110 | The Association is aborted using A-ABORT and the MPPS is marked as failed. The status meaning and Additional information in the Response is logged (i.e. Error Comment and Error ID). |
| Warning | Attribute Value Out of Range | 0116H | The MPPS operation is considered successful but the status meaning is logged. Additional information in the Response identifying the attributes out of range will be logged (i.e. Elements in the Modification List/Attribute List) |
| * | * | Any other status code. | The Association is aborted using A-ABORT and the MPPS is marked as failed. The status meaning is logged. |

The behavior of MPPS AE during communication failure is summarized in the Table below:

Table 71
MPPS COMMUNICATION FAILURE BEHAVIOR

| Exception | Behavior |
|--------------------------------------------------|-------------------------------------------------------------------------------------------|
| Timeout | The Association is aborted using A-ABORT and MPPS marked as failed. The reason is logged. |
| Association aborted by the SCP or network layers | The MPPS is marked as failed. The reason is logged. |

Table below provides a description of the MPPS N-CREATE and N-SET request identifiers sent by ultrasound system. Empty cells in the N-CREATE and N-SET columns indicate that the attribute is not sent. An “x” indicates that an appropriate value will be sent. A “Zero length” attribute will be sent with zero length.

Table 72
MPPS N-CREATE / N-SET Request Identifier

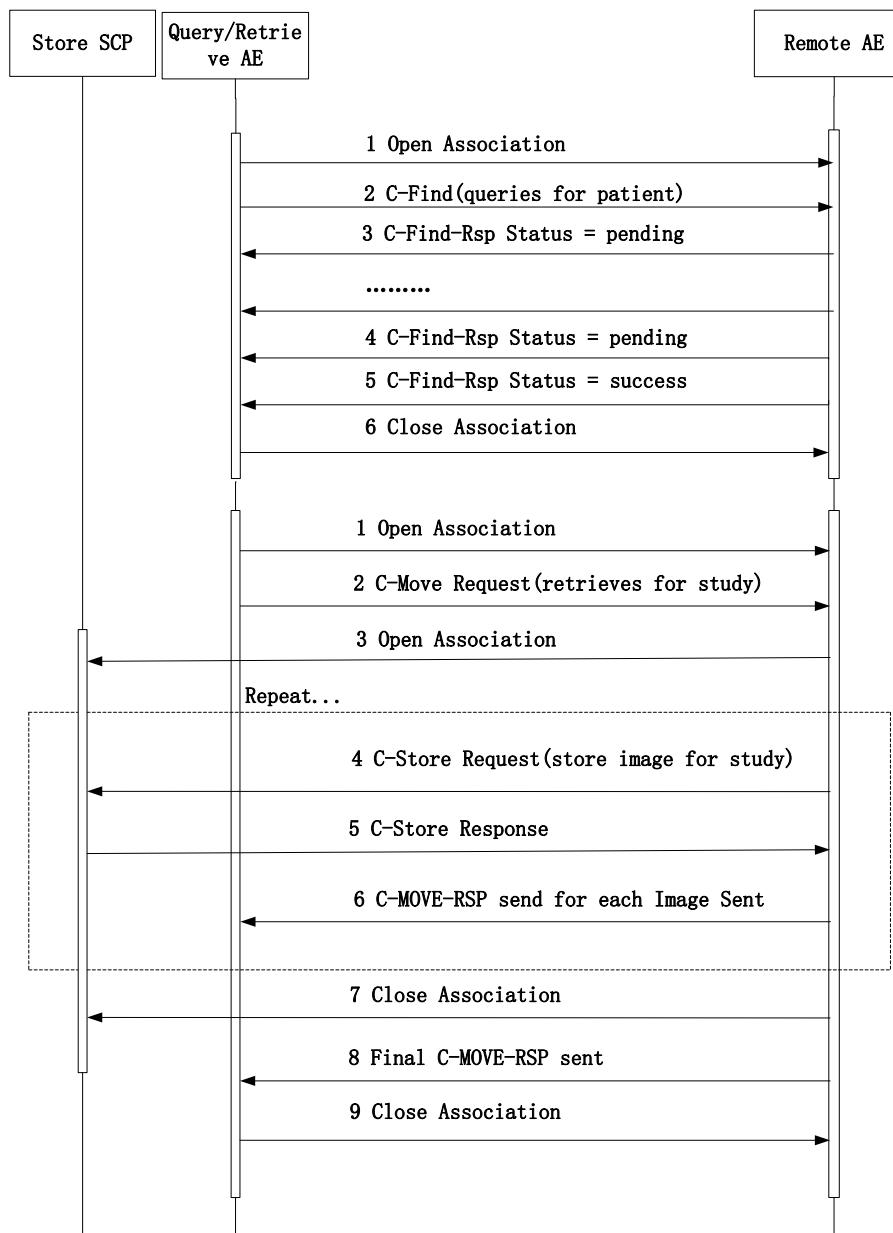

| Attribute Name | Tag | Req. N-CREATE | Type | Req. N-SET | Type |

Activity – Query/Retrieve from Remote AE

Description and Sequencing of Activities for SCU

Figure

7

Sequencing of Activity – Query/Retrieve progress

The associated Real-World activity is a C-Find request initiated by the user. The user specifies some attributes the system should use to query its database. If the query user

successfully establishes an association to the remote AE, it will send a C-Find request (according to the query model) and will then return the results to the application.

The C-MOVE-RQs are used to retrieve the referenced instances. The Query/Retrieve AE supports the Study Root Information Model.

Proposed Presentation Contexts

Table
73
Proposed Presentation Contexts for Query/Retrieve AE

| Presentation Context Table | | | | | |
|----------------------------------------------------|-----------------------------|--------------------------|---------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name | UID | | |
| Study Root Query/Retrieve Information Model - Find | 1.2.840.10008.5.1.4.1.2.2.1 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | SCU | None |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | SCU | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | SCU | None |
| Study Root Query/Retrieve Information Model - Move | 1.2.840.10008.5.1.4.1.2.2.2 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | SCU | None |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | SCU | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | SCU | None |

SOP Specific Conformance

The ultrasound system provides Standard Conformance to the DICOM Query/Retrieve Class.

Response Status

Query/Retrieve AE will behave as described in the Table below in response to the status returned in the C-Find response command message.

Table
74
C-Find Response Status Handling Behavior

| Service Status | Meaning | Protocol Codes | Related Fields | Behavior (as SCU) |
|----------------|-------------------------------------------------------------------------------|----------------|----------------------------|---------------------------------------------------------------------------------------------------------|
| Refused | Refused Out of Resources | A700 | (0000,0902) | The association is aborted using A-ABORT and a notify message is displayed: The remote server error. |
| Failed | Identifier does not match SOP Class | A900 | (0000,0901) (0000,0902) | |
| | Unable to process | CXXX | (0000,0901) (0000,0902) | |
| Canceling | Matching terminated due to Cancel request | FE00 | None | |
| Success | Matching is complete - No final Identifier is supplied | 0000 | None | Patient lists show on the UI |
| Pending | Matches are continuing - Current Match is supplied and any Optional Keys were | FF00 | Identifier | / |

| | | | | |
|--|--------------------------------------------------------------------------------------------------------------------------------------|------|------------|---|
| | supported in the same manner as Required Keys | | | |
| | Matches are continuing - Warning that one or more Optional Keys were not supported for existence and/or matching for this identifier | FF01 | Identifier | / |

The ultrasound system supports the following query levels:

- Study

The Query/Retrieve AE interprets following status codes

Table

75

C-Move Response Status Handling Behavior

| Service Status | Meaning | Protocol Codes | Related Fields | Behavior (as SCU) |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------|----------------|----------------------------|------------------------------------------------------------------------------------------------------|
| Refused | Refused Out of Resources | A700 | (0000,0902) | |
| Failed | Identifier does not match SOP Class | A900 | (0000,0901) (0000,0902) | The association is aborted using A-ABORT and a notify message is displayed: The remote server error. |
| | Unable to process | CXXX | (0000,0901) (0000,0902) | |
| Canceling | Matching terminated due to Cancel request | FE00 | None | |
| Success | Matching is complete - No final Identifier is supplied | 0000 | None | Image retrieve is successful, Patient lists show on the UI |
| Pending | Matches are continuing - Current Match is supplied and any Optional Keys were supported in the same manner as Required Keys | FF00 | Identifier | / |
| | Matches are continuing - Warning that one or more Optional Keys were not supported for existence and/or matching for this identifier | FF01 | Identifier | / |

Study Root Query/Retrieve Attributes

Supported Matching

Following are the types of matching that can be request by the implementation:

- Single Value matching
- Universal Matching
- Wild Card Matching
- Range of date, Range of Time

The user can filter the downloaded C-FIND result, to view a limited set of the result.

Study Level

This section defines the keys at the Study Level of the Study Root Query/Retrieve Information Model that are supported by this implementation.

Table 76

STUDY LEVEL ATTRIBUTES

| MODULE: STUDY ROOT INFORMATION MODEL (M) | | | | | |

4.2.1.4 Association Acceptance Policy

Activity – Receive Echo Request

Description and Sequencing of Activities

The Verification AE (as SCP) accepts associations only if they have valid Presentation Contexts. If Verification AE (as SCP) receives an echo (C-ECHO) request then the response will be sent over the same association used to send the C-ECHO-RQ.

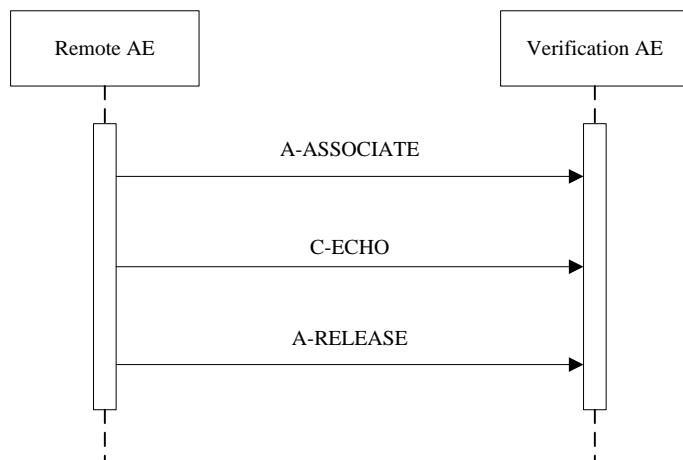

Figure 8
Sequencing of Activity – Receive Echo Request

Accepted Presentation Contexts

It will accept Presentation Contexts as shown in the following table:

Table 79
Proposed Presentation Contexts for Activity Verification

| Presentation Context Table | | | | | |
|----------------------------|-------------------|--------------------------|---------------------|------|----------------------|
| Abstract Syntax | | Transfer Syntax | | Role | Extended Negotiation |
| Name | UID | Name | UID | | |
| Verification | 1.2.840.10008.1.1 | Implicit VR LittleEndian | 1.2.840.10008.1.2 | SCP | None |
| | | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 | | None |
| | | Explicit VR BigEndian | 1.2.840.10008.1.2.2 | | None |

SOP Specific Conformance

The Application conforms to the definition of a Verification SCP in accordance with the DICOM Standard.

Activity – Receive Storage

Description and Sequencing of Activities

The system could act as Storage SCP in Query/Retrieve, otherwise couldn't. A possible sequence of interactions between the Storage AE (as SCP) and a remote AE is illustrated in the **Error! Reference source not found..**

Accepted Presentation Contexts

The Storage AE (as SCP) will accept Presentation Contexts as shown in the Table below.

Table 80
Proposed Presentation Contexts for Storage

| PROPOSED PRESENTATION CONTEXTS | | | | | |
|--------------------------------|-----------------------------|------------------------------------------------------------------------------------------|------------------------|------|-----------|
| Abstract Syntax | | Transfer Syntax | | Role | Ext. Neg. |
| Name | UID | Name | UID | | |
| US Image Storage | 1.2.840.10008.5.1.4.1.1.6.1 | Implicit VR Little Endian | 1.2.840.10008.1.2 | SCP | None |
| | | Explicit VR Little Endian | 1.2.840.10008.1.2.1 | SCP | None |
| | | JPEG Lossy, Baseline Sequential with Huffman Coding (Process 1) | 1.2.840.10008.1.2.4.50 | SCP | None |

| | | Explicit VR Little Endian | 1.2.840.10008.1.2.1 | SCP | None |
| | | JPEG Lossy, Baseline Sequential with Huffman Coding (Process 1) | 1.2.840.10008.1.2.4. 50 | SCP | None |
| | | Explicit VR Big Endian | 1.2.840.10008.1.2.2 | SCP | None |
| | | JPEG Lossless, Non-Hierarchical, First-Order Prediction (Process 14 [Selection Value 1]) | 1.2.840.10008.1.2.4. 70 | SCP | None |
| | | RLE Lossless | 1.2.840.10008.1.2.5 | SCP | None |
| | | JPEG 2000 Image Compression (Lossless Only) | 1.2.840.10008.1.2.4. 90 | SCP | None |
| | | JPEG 2000 Image Compression | 1.2.840.10008.1.2.4. 91 | SCP | None |
| Comprehensive Structured Report Storage | 1.2.840.100 08.5.1.4.1.1 .88.33 | Implicit VR Little Endian | 1.2.840.10008.1.2 | SCP | None |
| | | Explicit VR Little Endian | 1.2.840.10008.1.2.1 | SCP | None |
| | | Explicit VR Big Endian | 1.2.840.10008.1.2.2 | SCP | None |
| Encapsulated PDF Storage | 1.2.840.100 08.5.1.4.1.1 .104.1 | Implicit VR Little Endian | 1.2.840.10008.1.2 | SCP | None |
| | | Explicit VR Little Endian | 1.2.840.10008.1.2.1 | SCP | None |
| | | Explicit VR Big Endian | 1.2.840.10008.1.2.2 | SCP | None |

Note : The system could not support to browser the Encapsulated PDF.

SOP Specific Conformance

The Application conforms to the definition of a Storage SCP in accordance with the DICOM Standard.

Activity – Receive Storage Commitment

Description and Sequencing of Activities

A possible sequence of interactions between the Storage Commitment AE and a remote AE is illustrated in the **Error! Reference source not found..**

Accepted Presentation Contexts

The Storage Commitment AE will accept Presentation Contexts as shown in the Table below.

Table 81

Acceptable Presentation Contexts for Activity Receive Storage Commitment Response

| Presentation Context Table | | | | | | |
|----------------------------|--------------------------|------------------------------|--|-------------------|------|-----------|
| Abstract Syntax | | Transfer Syntax | | | Role | Ext. Neg. |
| Name | UID | Name List | | UID List | | |
| Storage Commitment | 1.2.840.10008.1.2 0.1 | Implicit VR Little Endian | | 1.2.840.10008.1.2 | SCU | None |

| | | | | | | | |
|--------------------|--|------------------------|----|--------|-------------------------|---------|----------|
| t Push Model | | Explicit Endian | VR | Little | 1.2.840.10008.1.2 .1 | SC U | Non e |
| | | Explicit VR Big Endian | | | 1.2.840.10008.1.2 .2 | SC U | Non e |

The Storage Commitment AE will only accept the SCU role within a Presentation Context for the Storage Commitment Push Model SOP Class.

SOP Specific Conformance

Storage Commitment Operations (N-ACTION)

The Storage Commitment AE will request storage commitment for the configured device.

The behavior of Storage Commitment AE when receiving N-Action response status codes is summarized in the Table below:

Table 82

Storage Commitment N-ACTION Response Status Handling Behavior

| Service Status | Further Meaning | Error Code | Behavior |
|----------------|-----------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Success | Success | 0000 | The request for storage comment is considered successfully sent. The ultrasound system waits for the N-EVENT-REPORT in background. |
| * | * | Any other status code. | The request for storage comment is failed. |

The behavior of Storage Commitment AE during communication failure is summarized in the Table below:

Table 83

Storage Commitment Communication Failure Behavior

| Exception | Behavior |
|--------------------------------------------------|--------------------------------------------------------------------------------|
| Timeout | The Association is aborted using A-ABORT and the send job is marked as failed. |
| Association aborted by the SCP or network layers | The send job is marked as failed. |

Storage Commitment Tags (N-ACTION)

The Storage Commitment AE will request storage commitment using the following tags

NOTE: Storage Commitment may only be automatically requested upon successful completion of an end exam storage task,

Table 84

Storage Commitment N-Action-Request Message Contents

| Action Type Name | Event Type ID | Attribute | Tag |
|------------------|---------------|----------------------------|-------------|
| N-ACTION-RQ (M) | 1 | Requested SOP Class UID | (0000,0003) |
| | | Requested SOP Instance UID | (0000,1001) |

| | | | |
|------------------------------------------|---|------------------------------|-------------|
| Module: Additional Attributes Module (O) | 3 | Instance Creation Date | (0008,0012) |
| | | Instance Creation Time | (0008,0013) |
| Request Storage Commitment | 1 | Transaction UID | (0008,1195) |
| | | Referenced SOP Sequence | (0008,1199) |
| | | >Referenced SOP Class UID | (0008,1150) |
| | | >Referenced SOP Instance UID | (0008,1155) |

Storage Commitment Notifications (N-EVENT-REPORT)

The reasons for returning specific status codes in a N-EVENT-REPORT response are summarized in the Table below.

Table 85

Storage Commitment N-EVENT-REPORT Response Status Reasons

| Service Status | Further Meaning | Error Code |
|----------------|-----------------------------------------|------------|
| Success | N-EVENT-REPORT message operate success. | 0000 |
| Failed | N-EVENT-REPORT message operate failed. | 0110 |

Storage Commitment Tags (N-EVENT- REPORT)

Tags supported for receiving an N-Event-Report message.

Table 86

Storage Commitment N-Event-Report Message Contents

| EVENT TYPE NAME | EVE NT TYPE ID | ATTRIBUTE | TAG | REQUIRE MENT TYPE SCP |
|------------------------------------------------------|----------------|------------------------------|-------------|-----------------------|
| Storage Commitment Request Successful | 1 | Transaction UID | (0008,1195) | 1 |
| | | Referenced SOP Sequence | (0008,1199) | 1 |
| | | >Referenced SOP Class UID | (0008,1150) | 1 |
| | | >Referenced SOP Instance UID | (0008,1155) | 1 |
| Storage Commitment Request Complete – Failures Exist | 2 | Transaction UID | (0008,1195) | 1 |
| | | Referenced SOP Sequence | (0008,1199) | 1 |
| | | >Referenced SOP Class UID | (0008,1150) | 1 |
| | | >Referenced SOP Instance UID | (0008,1155) | 1 |
| | | Failed SOP Sequence | (0008,1198) | 1 |
| | | >Referenced SOP Class UID | (0008,1150) | 1 |
| | | >Referenced SOP Instance UID | (0008,1155) | 1 |
| | | >Failure Reason | (0008,1197) | 1 |

4.3 Network Interface

4.3.1 Supported Communications Stacks

Modality DICOM AEs provide DICOM 3.0 TCP/IP Network Communication Support as defined in Part 8 of the DICOM Standard.

4.3.2 TCP/IP Stack

Modality DICOM AEs inherit their TCP/IP stack from the Windows 10 Operating System upon which they execute.

4.3.3 Physical Network Interface

Modality supports a single network interface. One of the following physical network interfaces will be available depending on installed hardware options:

| | |
|----------------------------------------------|-----------|
| Table | 87 |
| Supported Physical Network Interfaces | |

| |
|--------------------|
| ETHERNET 1000BASET |
| Ethernet 100baseT |
| Ethernet 10baseT |

4.3.4 Additional Protocols

Modality does not support additional protocols.

4.4 Configuration

The Configuration Utility allows the service engineer to set and maintain configuration parameters of local and remote DICOM application entities.

4.4.1 AE Title/Presentation Address Mapping

This mapping (including IP and port numbers) is defined during the system Network Configuration procedure.

4.4.2 Configurable Parameters

localhost DICOM Service Property(Including SCU and SCP):

AE Title

Port

PDU

Server Setting:

Device

IP address

Storage:

Device, Service name, AE Title and Port.

Timeout.

Maximum retries. (default value is 3)

Interval Time (In this version, this parameter is not usable.)

Compression Mode, Compression Ratio.

Color Mode (Color, Mixed, or Gray).

Cine Zoom Mode (original, 640*480, 800*600 or 1024*768)

Allow Multiframe(Enable or not)

Max Framerate(options(25, 30, 35, full), or other inputed valid value)

3D/4D(Normal, Rawdata or Volume)

SR Storage Option("Attach SR When Store Images", "Only Store SR", and "Not Store SR")

Encapsulated PDF(Enable or not)

Storage Mode("Parallel file", "Parallel frame",and "Serial file")

Default Service Status (Y/N)

Print:

Device, Service name, AE Title and Port .

Timeout.

Maximum retries. (default value is 3)

Interval Time (In this version, this parameter is not usable.)

Media Type: PAPER, CLEAR FILM, or BLUE FILM

Film Size:

5 MEDIA STORAGE

5.1 Implementation Model

5.1.1 Application Data Flow

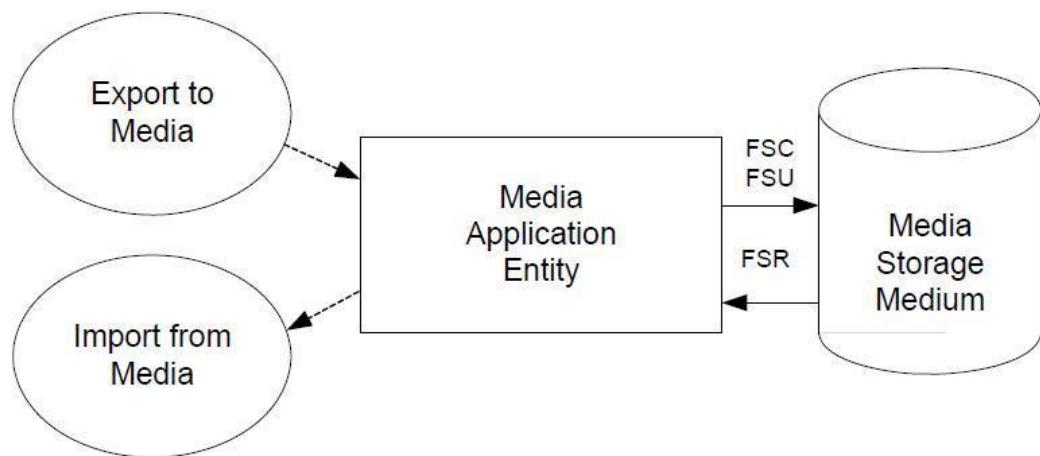

Figure
Application Data Flow Diagram for Media Storage

9

The Media Application Entity exports Images and Structured Reports to a removable storage medium. It is associated with the local real-world activity “Backup” using the configured export selection parameters for selected patients’ data (images and / or Structured Reports).

5.1.2 Functional Definition of AE's

5.1.2.1 Functional Definition of Media Application Entity

Using “Export” will pass the currently selected patients’ exams or individually selected images to the Media Application Entity. The contents of each export job will be written to the selected media destination. The size of the selected media is used to determine and display the number of media required for the export. When a device is filled to capacity, the system will prompt the user for addition media and continue.

5.1.3 Sequencing of Real-World Activities

At least one image must exist and be selected before the Media Application Entity can be invoked. The operator can insert new media at any time. The Media Application Entity will wait indefinitely for media to be inserted before starting to write to the device.

5.1.4 File Meta Information Options

The implementation information written to the File Meta Header in each file is:

| Table | 88 |
|----------------------------------------------------------|----|
| DICOM Implementation Class and Version for Media Storage | |

| | |
|-----------------------------|-------------------------------|
| Implementation Class UID | 1.2.156.112536.1.2123.0.1.0.1 |
| Implementation Version Name | SIEMENS_V1.1 |

5.2 AE Specifications

5.2.1 Media Application Entity Specification

The Media Application Entity provides standard conformance to the Media Storage Service Class. The Application Profiles and roles are listed below: The available physical media is CD-R, CD-RW, DVD-R, DVD-RW, DVD+R, DVD+RW, DVD-RAM, and USB devices.

| Table | 89 |
|--------------------------------------------|----|
| Application Profiles, Activities and Roles | |

| Application Profiles Supported | Real World Activity | Role |
|--------------------------------|---------------------|----------------------|
| STD-GEN-USB-JPEG | Export Exam | FSC/FSU ¹ |
| STD-US-SC-SF&MF-CDR | Read Exam | FSR |
| STD-US-SC-SF&MF-DVD | Import Exam | FSR |
| STD-US-SC-SF&MF-DVD-RAM | | |

Note: 1 functionality requires DVD+RW, DVD-RW, or USB

5.2.1.1 File Meta Information for the Application Entity

The File Meta Header does not include the Source Application Entity Title.

5.2.1.2 Real-World Activities

Activity-FSC-Export exams

When system user exports exams, images, SR, or Encapsulated PDF to a media upon which no DICOM data resides, it creates a DICOM file set and writes this DICOM File Set to this media.

The Media Application Entity acts as an FSC using the interchange option when requested to export SOP Instances from the local database to media upon which no DICOM data resides.

Activity-FSR-Import exams

When system user presents the directory of the media, presses “Restore” button and the selected exams are transferred from the media to the system for review. Objects transferred to the system retain their original SOP Instance UIDs.

The Media Application Entity acts as an FSR using the interchange option when requested to import SOP Instances from media to the local database.

Activity-FSU-Export exams

The system user selects exams from the system’s directory for transfer to media that already contains data. The DICOMDIR is updated allowing access to original and new data.

The Media Application Entity acts as an FSU using the interchange option when requested to export SOP Instances from the local database to media upon which DICOM data already resides.

Media Storage Application Profiles

See **Error! Reference source not found.** for supported Application Profiles.

Options

The Media Application Entity supports the SOP Classes and Transfer Syntaxes listed in the Table below:

Table
IODs, SOP Classes and Transfer Syntaxes

90

| Information Object Definition | SOP Class UID | Transfer Syntax | Transfer Syntax UID |
|-------------------------------|-----------------------------|------------------------------------------------------------------------------------------|------------------------|
| DICOM Media Storage Directory | 1.2.840.10008.1.3.10 | Explicit VR LittleEndian | 1.2.840.10008.1.2.1 |

5.4 Augmented and Private Application Profiles

No augmented/private profile is supported.

5.5 Media Configuration

None.

6 SUPPORT OF CHARACTER SETS

In addition to the default character repertoire, the Defined Terms for Specific Character Set in **Error! Reference source not found.** are supported:

Table **96**
Supported Specific Character Set Defined Terms

| Character Set Description | Defined Term | System Language |
|---------------------------|--------------|-------------------------------------------------------------------------------------------------------|
| ISO 8859-1 | ISO_IR 100 | English, French, German, Italian, Portuguese, Spanish, Finnish, Danish, Icelandic, Norwegian, Swedish |
| ISO 8859-5 | ISO_IR 144 | Russian |
| ISO-8859-2 | ISO_IR 101 | Polish, Czech, Serbian |
| Chinese | GB18030 | Chinese |

If the system language is configured for one of above languages, the corresponding Character Set will be used automatically. Whether or not characters are displayed correctly depends on the operating system. For example, if the system is configured for Polish, the characters of Polish could display correctly.

7 SECURITY

7.1 Security Profiles

None supported.

7.2 Association level security

None supported.

Any Calling AE Titles and/or IP addresses may open an Association.

7.3 Application level security

None supported.

8 ANNEXES

8.1 IOD contents

8.1.1 Created SOP Instances

None.

8.1.2 Usage of attributes from received IOD's

No SOP Class specific fields are required.

The local database makes use of the conventional identification attributes to distinguish patients, studies, series and instances. In particular, if two patients have the same value for Patient ID, Patient's Name and Patient's Sex, they will be treated as the same in the browser and the local database.

8.1.3 Attribute Mapping

Not applicable.

8.1.4 Coerced/Modified fields

No coercion is performed.

8.2 Data Dictionary of private attributes

No private attributes are defined.

8.3 Coded terminology and templates

The value for Code Meaning will be displayed for all code sequences. No local lexicon is provided to look up alternative code meanings.

8.4 Grayscale Image Consistency

Modality does not support the Grayscale Standard Display Function.

8.5 Standard extended/specialized/private sop Classes

None.

8.6 Private Transfer Syntaxes

None.

9 APPENDICES :

9.1 OB – GYN structured reporting template

This appendix lists the DICOM Structured Report (SR) mappings used in the Obstetric and Gynecologic Structured Reports of ultrasound system SR files.

The mappings are organized in a manner similar to the DICOM SR Templates as described in PS 3.16 of the DICOM Standard. The OB-GYN Report mappings follow the DICOM SR Template TID 5000: OB-GYN Ultrasound Procedure Report, except where noted.

All private code values use the Coding Scheme Designator "MRUS".

TID (300) Measurement

This Template provides a general structure for a numeric measurement, together with evaluations of its normality and/or significance, and the inference source(s) for its value.

9.2 Cardiac structured reporting template

This appendix lists the DICOM Structured Report (SR) mappings used in the Cardiac Structured Reports of ultrasound system SR files.

The mappings are organized in a manner similar to the DICOM SR Templates as described in PS 3.16 of the DICOM Standard. The Cardiac Report mappings follow the DICOM SR Template TID 5200: Cardiac Ultrasound Procedure Report, except where noted.

All private code values use the Coding Scheme Designator "MRUS".

TID (5200) Echocardiography Procedure Report

This template forms the top of a content tree that allows an ultrasound system to describe the results of an adult echocardiography imaging procedure.

9.3 Vascular structured reporting template

This appendix lists the DICOM Structured Report (SR) mappings used in the Vascular Structured Reports of ultrasound system SR files.

The mappings are organized in a manner similar to the DICOM SR Templates as described in PS 3.16 of the DICOM Standard. The Vascular Report mappings follow the DICOM SR Template TID 5100: Vascular Ultrasound Procedure Report, except where noted.

All private code values use the Coding Scheme Designator "MRUS".

TID (5100) Vascular Ultrasoud Report

This is the template for the root the content tree for the vascular ultrasound procedure report.
